MEDIA ADVISORY

Underground Utilities to be Examined

Aldewoman Milele A. Coggs and **Alderman Nik Kovac** are examining sinkhole incidents by sponsoring a communication file before the Public Works Committee tomorrow, **March 30 at 9:00 a.m.** Recent sinkhole incidents in both aldermanic districts have prompted discussion of underground utilities and sewerage issues that may have caused the two unrelated road problems.

“The Department of Public Works worked in an expedient manner to repair the sinkhole on Humboldt Ave. and ensure the safety of residents in that area and they should be commended for that,” Alderwoman Coggs said. “Residents should also be aware that other road work continues on the bridge and DPW will continue to exercise expediency in repairing the thoroughfare.”

The file presented before committee tomorrow calls on Department of Public Works spokespersons to explain the various substructures that can cause sinkhole problems and to outline the strategies for repairs and maintenance the department has implemented.
