**SUBJECT: AAI Phase I Environmental Site Assessment Report  
1027 N. Edison Street, Milwaukee, WI**

Dear Ms. Dettmer:

Sigma Environmental Services, Inc. (Sigma) has completed an All Appropriate Inquiry (ASTM E 1527-05) Phase I Environmental Site Assessment (ESA) of the above noted property located in the City of Milwaukee, Milwaukee County, Wisconsin. Enclosed are one hard copy and one electronic copy of the final report.

Based on the information reviewed, recognized environmental conditions (RECs), as defined by the ASTM Standard E 1527-05, were identified on the subject property. The RECs are as follows:

- Based on a review of Sanborn fire insurance maps, the subject property was part of a coal yard that extended onto the northern adjoining property and was occupied by a 2<sup>nd</sup> Hand Materials Yard. The subject property may have been impacted by these former uses.
- The site appears to be covered with eight to twelve feet of fill comprised of soft sandy silts and silty sands containing gravel along with amounts of brick and wood debris and traces of glass and cinders. Site specific physical and chemical characteristics indicate that fill material containing concentrations of select Polycyclic Aromatic Hydrocarbon (PAH) constituents and lead at concentrations greater than Residual Contaminant Levels (RCLs) for the direct contact pathway is present at the site. Concentrations of PAH constituents within the fill material at the site appear to be greatest in the western portion of the site and decrease across the site to the east. The fill material also contains concentrations of naphthalene and phenanthrene greater than the RCL for the protection of groundwater. Residual impacts to groundwater beneath the site appear to be limited.

The City of Milwaukee conducted a Phase I ESA of the subject property in 2000, which identified similar RECs as identified in this Phase I ESA conducted by Sigma (new RECs were not identified in this Phase I ESA). Based on the RECs identified in the 2000 Phase I ESA conducted by the City of Milwaukee, Sigma conducted limited Phase II ESA activities in 2008 at the subject property to evaluate the RECs. Based on the results of the limited Phase II ESA, subsurface impacts were identified.

Off-site RECs were identified during the course of the Phase I ESA. Please note, with respect to potential off-site issues, the State of Wisconsin created the "property affected by off-site discharges" exemption, s. 292.13, Wisconsin Statutes, which limits the responsibilities of property owners when soil or groundwater contamination is confirmed to be migrating onto his or her property from off-site. Property owners of sites where environmental impacts originate off-site are generally not responsible for taking appropriate environmental response actions if certain conditions are met. The off-site RECs are as follows:

- Environmental Data Resources (EDR) identified six Historical Auto Station sites within 1/8 mile from the subject property; United Auto Service Corp located south/southeast of the subject property at 1005 N. Edison Street, Jeanson David N. located south/southeast of the subject property at 143 E. State Street, Weeks Auto Service located southeast of the subject property at 185 E. State Street, Rackowskas Paul located west of the subject property at 320 Highland Avenue, Kveen Albert E Service Station located south of the subject property at 129 E. State Street, and Juneau Garage located north of the subject property at 114 E. Juneau. Based on the distance between the reported sites and the subject property, with the exception of the Rackowskas Paul site located on the west side of the Milwaukee River, a release(s) from the potential UST systems associated with the auto station sites has the potential to have impacted the subject property.
- EDR identified six Historical Cleaner sites located on the east side of the Milwaukee River include Leong Saml located at 159 E. State Street, Serve U Well Cleaners located at 181 E. State Street, La Salle Cleaners and Dyers located at 1110 N. Water Street, Falconizing Inc. located at 1023 N. Water Street, Henry Hand Laundry located at 1017 N. Water Street, Gong Henry located at 1009 N. Water Street, Gee Don Hoy located at 934 N. Water Street, and Cream City Laundry located at 1005 N. Broadway. Based on the distance between the reported sites and the subject property, cleaning chemicals associated with one or more of the potential cleaners sites have the potential to have impacted the subject property.

We appreciate the opportunity to provide you with Phase I ESA services. If you have any questions or comments, do not hesitate to contact Sigma at (414) 643-4200.

Sincerely,

SIGMA ENVIRONMENTAL SERVICES, INC.

## EXECUTIVE SUMMARY

Ms. Karen Dettmer with the City of Milwaukee Department of City Development retained Sigma Environmental Services, Inc. (Sigma) of Milwaukee, Wisconsin to conduct an All Appropriate Inquiry Phase I Environmental Site Assessment (ESA) of the property located at 1027 N. Edison Street, in the City of Milwaukee, Milwaukee County, Wisconsin (subject property). The purpose of the environmental assessment was to identify recognized environmental conditions (RECs), as defined by ASTM in its *Standard Practice for Environmental Site Assessments* (E 1527-05), on the subject property. To perform the service, Sigma compiled a site history, reviewed available regulatory documents, reviewed area geology and hydrogeology and conducted limited site observations.

RECs, as defined by ASTM, include the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property. The term includes hazardous substances and petroleum products even under conditions in compliance with the law. This term is not intended to include de minimis conditions that do not generally present a material risk to human health or the environment and would not be the subject of an enforcement action if brought to the attention of the appropriate authorities. Conditions determined to be de minimis are not recognized environmental conditions.

The subject property is approximately 0.4 acres (18,918 square feet) and is located on the west side of N. Edison Street, in Milwaukee, Wisconsin. The northern portion of the subject property is landscaped, with a sculpture on the northeast corner of the property. A concrete walkway that connects to a pedestrian footbridge across the Milwaukee River is located on the central portion of the property and is oriented in an east to west direction. The southern portion of the subject property is partially paved with concrete and also includes unpaved ground. Large stone, gravel and dirt are located adjacent to the south side of the concrete walkway. The southern portion of the subject property was most recently used as a parking lot and snow dump area. The current owner of the subject property is the City of Milwaukee. The subject property is located in Sections 28, 29 and 33, in Township 7 North, Range 22 East, in the City of Milwaukee, Milwaukee County, Wisconsin (**Figure 1**).

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR). The subject property was not identified on environmental databases. EDR did identify nearby properties on environmental databases as being within the search radius of the subject property; one or more of the identified sites has the potential to impact the subject property.

The Phase I ESA has been performed in conformance with the scope and limitations of ASTM Practice E 1527-05. This assessment has revealed evidence of recognized environmental conditions in connection with the subject property. The RECs are as follows:

- Based on a review of Sanborn fire insurance maps, the subject property was part of a coal yard that extended onto the northern adjoining property and was occupied by a 2<sup>nd</sup> Hand Materials Yard. The subject property may have been impacted by these former uses.
- The site appears to be covered with eight to twelve feet of fill comprised of soft sandy silts and silty sands containing gravel along with amounts of brick and wood debris and traces of glass and cinders. Site specific physical and chemical characteristics indicate that fill material containing concentrations of select Polycyclic Aromatic Hydrocarbon (PAH) constituents and lead at concentrations greater than Residual Contaminant Levels (RCLs) for the direct contact pathway is present at the site. Concentrations of PAH constituents within the fill material at the site appear to be greatest in the western portion of the site and decrease across the site to the east. The fill material also contains concentrations of

naphthalene and phenanthrene greater than the RCL for the protection of groundwater. Residual impacts to groundwater beneath the site appear to be limited.

The City of Milwaukee conducted a Phase I ESA of the subject property in 2000, which identified similar RECs as identified in this Phase I ESA conducted by Sigma (new RECs were not identified in this Phase I ESA). Based on the RECs identified in the 2000 Phase I ESA conducted by the City of Milwaukee, Sigma conducted limited Phase II ESA activities in 2008 at the subject property to evaluate the RECs. Based on the results of the limited Phase II ESA, subsurface impacts were identified.

Off-site RECs were identified during the course of the Phase I ESA. Please note, with respect to potential off-site issues, the State of Wisconsin created the "property affected by off-site discharges" exemption, s. 292.13, Wisconsin Statutes, which limits the responsibilities of property owners when soil or groundwater contamination is confirmed to be migrating onto his or her property from off-site. Property owners of sites where environmental impacts originate off-site are generally not responsible for taking appropriate environmental response actions if certain conditions are met. The off-site RECs are as follows:

- Environmental Data Resources (EDR) identified six Historical Auto Station sites within 1/8 mile from the subject property; United Auto Service Corp located south/southeast of the subject property at 1005 N. Edison Street, Jeanson David N. located south/southeast of the subject property at 143 E. State Street, Weeks Auto Service located southeast of the subject property at 185 E. State Street, Rackowskas Paul located west of the subject property at 320 Highland Avenue, Kveen Albert E Service Station located south of the subject property at 129 E. State Street, and Juneau Garage located north of the subject property at 114 E. Juneau. Based on the distance between the reported sites and the subject property, with the exception of the Rackowskas Paul site located on the west side of the Milwaukee River, a release(s) from the potential UST systems associated with the auto station sites has the potential to have impacted the subject property.
- EDR identified six Historical Cleaner sites located on the east side of the Milwaukee River include Leong Saml located at 159 E. State Street, Serve U Well Cleaners located at 181 E. State Street, La Salle Cleaners and Dyers located at 1110 N. Water Street, Falconizing Inc. located at 1023 N. Water Street, Henry Hand Laundry located at 1017 N. Water Street, Gong Henry located at 1009 N. Water Street, Gee Don Hoy located at 934 N. Water Street, and Cream City Laundry located at 1005 N. Broadway. Based on the distance between the reported sites and the subject property, cleaning chemicals associated with one or more of the potential cleaners sites have the potential to have impacted the subject property. Where observations were limited, Sigma renders no opinion as to the presence of hazardous substances, wastes or contamination potential.

The conclusions included in this assessment report should not be construed as legal advice. This practice is intended to reflect a commercially prudent and reasonable inquiry as no environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the subject property. Performance of the ASTM E 1527-05 practice is intended to reduce, but not eliminate that uncertainty. Finally, even a finding of no recognized environmental conditions is not a warranty or guarantee that the property is free from contamination.

## 1.0 INTRODUCTION

### 1.1 Purpose

Ms. Karen Dettmer with the City of Milwaukee Department of City Development retained Sigma Environmental Services, Inc. (Sigma) of Milwaukee, Wisconsin to conduct an All Appropriate Inquiry Phase I Environmental Site Assessment (ESA) of the property located at 1027 N. Edison Street, in the City of Milwaukee, Milwaukee County, Wisconsin (subject property). The purpose of the environmental assessment was to identify recognized environmental conditions (RECs), as defined by ASTM in its *Standard Practice for Environmental Site Assessments* (E 1527-05), on the subject property. To perform the service, Sigma compiled a site history, reviewed available regulatory documents, reviewed area geology and hydrogeology and conducted limited site observations.

The ASTM Standard E 1527-05 defines a REC as:

“The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.”

### 1.2 Methodology

Research of the property evaluated its historical use and examined the generation, treatment, storage, and disposal of hazardous chemicals, materials, substances, and wastes for potential sources of environmental concern. Research included a review of reasonably ascertainable records, interviews of knowledgeable local and state officials, and a site reconnaissance.

### 1.3 Significant Assumptions

This report was prepared under constraints of cost, time, and scope, and reflects a limited assessment and evaluation rather than a total, complete, or extensive assessment and evaluation. Sigma’s review was performed using the degree of care and skill ordinarily exercised under similar localities. No other warranty or guarantee, expressed or implied, is made as to the conclusions and recommendations included in this report.

The findings of this report, to the best of our knowledge, are valid as of the date of this review. However, changes in the conditions of a property can occur with the passage of time, whether due to natural processes or the works of man on this or adjacent properties. In addition, changes in applicable or appropriate standards may occur, whether they result from legislation, from the broadening of knowledge, or from other reasons. Accordingly, the findings of this report may be invalidated wholly or partially by changes outside our control.

Specified information contained in this report has been obtained from publicly available sources and other secondary sources of information produced by entities other than Sigma. Although care has been taken by Sigma in compiling the information, Sigma disclaims any and all liability for any errors, omissions, or inaccuracies of the third parties in such information and data, and for any consequences arising there from.

The conclusions contained in this report are based upon information provided by the client, a limited on-site inspection, and our investigation of available public records and should not be considered legal advice. Latent conditions at the site are not known. The review did not include sampling of rock, soil, groundwater, surface water, air or all on-site substances or materials. It is, therefore, not

possible to confirm the presence or absence of toxic or hazardous substances, wastes or materials in the environments associated with the site. Sigma makes no warranties, expressed or implied, as to marketability or fitness of the property for a particular purpose.

#### **1.4 Limitations and Exceptions**

Conclusions in this report represent our professional judgment and are limited to those site conditions and potential impacts from neighboring properties that could be discovered under the scope of services authorized by the proposal. The conclusions presented were based on an inspection of the property and a review of relevant records.

Sigma attempted to review all reasonably ascertainable, practically reviewable information regarding the history of the subject property; however, data gaps were encountered during preparation of this report. It is Sigma's opinion that the data gaps do not significantly affect, as defined by ASTM E 1527-05, the ability to identify recognized environmental conditions in connection with the subject property.

The conclusions and interpretations of this report do not collectively define all the risks associated with purchase or other use of the property. Should you, our client, or other interested parties, wish to further reduce the risks associated with undiscovered or unquantified environmental impacts, you may want to consider having additional assessment activities performed such as collecting and analyzing soil, groundwater, or other appropriate samples for compounds of relevant and particular concern, or complete other investigation activities as appropriate.

This report does not address or include regulatory compliance issues, cultural or historic resources, industrial hygiene, health and safety issues, ecological resources, endangered species or vapor intrusion and indoor air quality. Further this report does not purport to identify or quantify asbestos, radon, lead-based paint, lead in drinking water, extremely low frequency radiation (ELF) or electromagnetic frequency radiation (EMF) on-site.

#### **1.5 Special Terms and Conditions**

No part of this document may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from Sigma Environmental Services, Inc.

#### **1.6 User Reliance**

This document contains proprietary and confidential information, which is the sole and exclusive property of Sigma Environmental Services, Inc. and the City of Milwaukee. This document may not be used or duplicated by those other than the City of Milwaukee in any manner without the express written consent of Sigma Environmental Services, Inc. and the City of Milwaukee. The environmental conditions of an operating facility change continuously. This report documents the status of environmental issues as of the date of the report. We caution reliance on this information as time progresses without an appropriate review and update to this environmental assessment.

## **2.0 SITE DESCRIPTION**

### **2.1 Location, Legal Description, and General Characteristics**

The subject property is approximately 0.4 acres (18,918 square feet) and is located on the west side of N. Edison Street, in Milwaukee, Wisconsin. The northern portion of the subject property is landscaped, with a sculpture on the northeast corner of the property. A concrete walkway that connects to a pedestrian footbridge across the Milwaukee River is located on the central portion of the property and is oriented in an east to west direction. The southern portion of the subject property is partially paved with concrete and also includes unpaved ground. Large stone, gravel and dirt are located adjacent to the south side of the concrete walkway. The southern portion of the subject property was most recently used as a parking lot and snow dump area. The current owner of the subject property is the City of Milwaukee. The subject property is located in Sections 28, 29 and 33, in Township 7 North, Range 22 East, in the City of Milwaukee, Milwaukee County, Wisconsin (**Figure 1**). The legal description for the subject property is identified on the current deeds for the subject property, which are included as **Appendix F**.

### **2.2 Current Use of the Property**

The northern portion of the subject property is landscaped. A concrete walkway that connects to a pedestrian footbridge across the Milwaukee River is located on the central portion of the property. The southern portion of the subject property, most recently used as a parking lot and snow dump area, is currently vacant.

### **2.3 Site and Vicinity Characteristics**

The site is located in a commercial area of downtown Milwaukee. The site slopes toward the Milwaukee River, which borders the subject property to the west. The central portion of the subject property which includes the concrete walkway is higher than the northern and southern portions of the property.

### **2.4 Descriptions of Structures, Roads, and Other Improvements on the Site**

The subject property is not developed with buildings or roads. Two electrical transformers are located on the subject property near the southern property boundary. A concrete walkway that connects to a pedestrian footbridge across the Milwaukee River is located on the central portion of the property. Underground utilities, a sculpture and a hydrant are located on the northern portion of the subject property.

### **2.5 Current Uses of the Adjoining Properties**

The northern adjoining property is developed with residential condominiums. The eastern adjoining property is developed with N. Edison Street with a parking structure located on the east side of the street. The southern adjoining property is developed with a building occupied by a wholesale florist. The Milwaukee River borders the subject property to the west. Adjoining and nearby properties are shown on **Figure 2**.

## **3.0 USER-PROVIDED INFORMATION**

### **3.1 Title Records**

No title records were provided by the user at the time of the preparation of this Phase I ESA.

### **3.2 Environmental Liens or Activity and Use Limitations**

No information was reported by the user of this report regarding known environmental liens on the subject property or activity and use limitations for the subject property. A review of the current deeds indicated that an environmental lien is not present on the property. The current deeds for the subject property are included as **Appendix F**.

### **3.3 Specialized Knowledge**

No user provided information was reported regarding information about previous ownership or uses of the property that may be material to identifying recognized environmental conditions, except for historical use and limited Phase II ESA subsurface investigation information.

### **3.4 Valuation Reduction of Environmental Issues**

No user provided information was reported regarding value reduction of the subject property to comparable properties.

### **3.5 Owner, Property Manager, and Occupant Information**

Sigma submitted a user questionnaire to Ms. Dettmer, user of the report. The completed questionnaire is included as **Appendix G**.

### **3.6 Reasons for Performing Phase I**

The purpose of this report is to assist the user in identifying RECs on the subject property.

## **4.0 RECORDS REVIEW**

### **4.1 Standard Environmental Record Sources**

Sigma utilized the services of Environmental Data Resources to provide regulatory data, meeting the ASTM Standard E 1527-05, from Federal and State agencies. The federal regulatory data includes the National Priorities List (NPL), the Resource Conservation and Recovery Information System (RCRIS) notifiers, the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) database, and the Emergency Response Notification System (ERNS) database. The state data includes the Leaking Underground Storage Tanks (LUST) list, the Registered Underground Storage Tank list, and the State Solid Waste Facilities/Landfill Sites list. During review of the data provided by EDR, Sigma focused on sites within a one mile radius or less of the property. The EDR report is included as **Appendix A** of this Phase I Environmental Site Assessment report. The findings of these inventories are discussed below.

Of the state and federal inventories reviewed by EDR for the subject property and the areas surrounding the subject property, the subject property was not listed on environmental databases. EDR did identify nearby properties on environmental databases. The findings of these inventories are discussed below. The other sites identified by EDR do not have any reported release incidents, have a closed regulatory status, or are too distant to impact the subject property.

#### **4.1.1 National Priority List**

The EPA publishes a National Priorities List (NPL) of sites included in the "Superfund" program as authorized by CERCLA and the Superfund Amendments and Reauthorization Act (SARA). EDR did not identify the subject property as a "Proposed" Superfund, Superfund or "Delisted" Superfund site, nor were "Proposed" Superfund, Superfund or "Delisted" Superfund sites identified within a one mile radius of the subject property.

#### **4.1.2 Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)**

The CERCLIS list is a compilation of known or suspected uncontrolled or abandoned hazardous waste sites that are under investigation or have been investigated by the EPA to determine if the site(s) should be remediated under the Superfund program. EDR did not identify the subject property as a CERCLIS or CERCLIS - No Further Remedial Action Planned (NFRAP) site. In addition, EDR did not identify CERCLIS or CERCLIS - NFRAP sites within a 1/4 mile of the subject property.

#### 4.1.3 Resource Conservation and Recovery Act Corrective Action Report (CORRACTS)

The United States EPA maintains the CORRACTS database. The database includes RCRA facilities, which are undergoing corrective action due to a release of hazardous waste or constituents into the environment. EDR did not identify the subject property as a CORRACTS site. EDR did not identify CORRACTS sites within a 1/4 mile of the subject property.

#### 4.1.4 Resource Conservation and Recovery Act (RCRA)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the RCRA of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the RCRA. EDR did not identify the subject property as a RCRA site. EDR did identify one RCRA small quantity generator (SQG) site within a 1/8 mile of the subject property. The RCRA database does not identify hazardous material releases to the environment; therefore, this RCRA site is not expected to impact the subject property.

#### 4.1.5 Emergency Response Notification System (ERNS)

The ERNS list contains information on reported releases of oil and hazardous substances. EDR did not identify the subject property as an ERNS site.

#### 4.1.6 State Hazardous Waste (SHWS)

The state hazardous waste site record, the Hazard Ranking List, is compiled by the Wisconsin Department of Natural Resources (DNR) and is generally the state's equivalent to the CERCLIS list. EDR did not identify the subject property as a state hazardous waste site, nor were state hazardous waste sites identified within 1/4 mile of the subject property.

#### 4.1.7 State Landfill

The state landfill list, the Registry of Waste Disposal Sites, is compiled by the DNR and includes an inventory of solid waste disposal facilities or landfills. EDR did not identify the subject property as a state landfill site, nor were state landfill sites identified within 1/4 mile of the subject property.

#### 4.1.8 Leaking Underground Storage Tank (LUST)

The LUST list is compiled by the DNR and contains an inventory of reported LUST incidents. EDR did not identify the subject property as a registered LUST site. EDR did identify one property within 1/8 mile of the subject property as a LUST site. The site is located at 1201 N. Edison Street (Parking Lot 2) and is identified as a conditionally closed LUST site and an Activity and Use Limitations (AUL) site with soil and groundwater impacts from a gasoline and diesel release(s). Based on a review of site-specific information for this LUST site, groundwater flow at the site is toward the Milwaukee River, therefore, the release from this site is not expected to impact the subject property.

#### 4.1.9 Leaking Aboveground Storage Tank (LAST)

The LAST list is compiled by the DNR and contains an inventory of reported LAST incidents. EDR did not identify the subject property as a registered LAST site. EDR did not identify properties within 1/8 mile of the subject property as LAST sites.

#### 4.1.10 Underground Storage Tanks (USTs)

The list of registered USTs is compiled by the Wisconsin Department of Commerce (COMM) and contains information on the site name, location, and number of tanks. EDR did not identify the subject property as a registered UST site. EDR did identify four UST sites within 1/8 mile of the subject property; the USTs are identified as closed/removed or closed and filled with inert material.

#### 4.1.11 Activity and Use Limitation (AUL)

The AUL database contains a listing of sites with deed restrictions at closeout. The extent of soil contamination is known but impracticable to remove now or an engineering control is required to be maintained or NR 720 standards are applied. EDR did not identify the subject property as an AUL site. EDR did identify three properties within 1/8 mile of the subject property as AUL sites. The 1201 N. Edison Street (Parking Lot 2) site is identified as an AUL site with soil and groundwater impacts from a gasoline and diesel release(s); refer to section 4.1.8 for additional information. The Commercial Property site located at 1114 N. Water Street is identified as an AUL site with soil impacts from an unknown substance, and the 1232 N. Edison Street site is identified as an AUL site with soil impacts from volatile organic compounds; based on the identified impacts to soil and not to groundwater, releases at these sites are not expected to impact the subject property.

#### 4.1.12 EDR Historical Auto Stations

The EDR Historical Auto Stations list includes listings of potential gas station/filling station/service station sites. The subject property was not identified as a Historical Auto Station site. EDR identified six Historical Auto Station sites within 1/8 mile from the subject property; United Auto Service Corp located south/southeast of the subject property at 1005 N. Edison Street, Jeanson David N. located south/southeast of the subject property at 143 E. State Street, Weeks Auto Service located southeast of the subject property at 185 E. State Street, Rackowskas Paul located west of the subject property at 320 Highland Avenue, Kveen Albert E Service Station located south of the subject property at 129 E. State Street, and Juneau Garage located north of the subject property at 114 E. Juneau. Based on the distance between the reported sites and the subject property, with the exception of the Rackowskas Paul site located on the west side of the Milwaukee River, a release(s) from the potential UST systems associated with the auto station sites has the potential to have impacted the subject property.

#### 4.1.13 EDR Historical Cleaners

The EDR Historical Cleaners list includes potential dry cleaner sites. The subject property was not identified as a Historical Cleaners site. EDR identified six Historical Cleaner sites less than 1/8 mile from the subject property and 11 Historical Cleaner sites located between 1/8 and 1/4 mile from the subject property. Nine of the 17 historical cleaner sites are located on the west side of the Milwaukee River, therefore, are not expected to impact the subject property. The eight sites located on the east side of the Milwaukee River include Leong Saml located at 159 E. State Street, Serve U Well Cleaners located at 181 E. State Street, La Salle Cleaners and Dyers located at 1110 N. Water Street, Falconizing Inc. located at 1023 N. Water Street, Henry Hand Laundry located at 1017 N. Water Street, Gong Henry located at 1009 N. Water Street, Gee Don Hoy located at 934 N. Water Street, and Cream City Laundry located at 1005 N. Broadway. Based on the distance between the reported sites and the subject property, cleaning chemicals associated with one or more of the potential cleaners sites have the potential to have impacted the subject property.

## **4.2 Additional Environmental Record Sources**

Sigma utilized EDR's services to provide regulatory data, exceeding the ASTM Standard E 1527-05, from Federal and State agencies. During review of the data provided by EDR, Sigma focused on sites within a 1.0 mile radius or less of the property.

### 4.2.1 Wisconsin Environmental Repair Program (ERP)

The ERP program database is compiled by the DNR and generally includes non-UST related spills. EDR did not identify the subject property as an ERP site. EDR identified five ERP sites within 1/8 mile of the subject property. The Commercial Property site located east/northeast of the subject property at 1114 N. Water Street is identified as a closed ERP site with soil impacts from an unknown substance. The Car-X Muffler and Brake site located west/northwest of the subject property is identified as a closed ERP site with soil and groundwater impacts from a petroleum release. Usinger Inc. located west of the subject property at 316 W. Highland Avenue is identified as an open ERP site with soil impacts. The Aloft site located north/northwest of the subject property at 202 W. Juneau Avenue is identified as an open ERP site with soil and groundwater

impacts. EDR also identified four ERP sites between 1/8 and 1/4 mile of the subject property. The Red Arrow Park site located southeast of the subject property at 900 N. Water Street is identified as a closed ERP site with soil and groundwater impacts from an antifreeze release. The Vacant Parking Lot site located northeast of the subject property at 1224 N. Market Street is identified as an open ERP site with soil impacts from polynuclear aromatic hydrocarbons. The Park East Freeway site located north/northwest of the subject property at 1252 N. 3<sup>rd</sup> Street is identified as an open ERP site with soil and groundwater impacts from a gasoline and chlorinated solvent release(s). The Ambrosia Chocolate Co. site located west of the subject property at 1133 N. 5<sup>th</sup> Street is identified as a closed ERP site with soil impacts from a petroleum release. Based on a closed regulatory status, impacts to soil and not to groundwater, the location of the site on the west side of the Milwaukee River and/or the distance between the subject property and the identified site, these sites are not expected to impact the subject property.

#### 4.2.2 Lists of Registered Aboveground Storage Tanks

The list of registered ASTs is compiled by the Wisconsin Department of Commerce (COMM) and contains information on the site name, location, and number of tanks. EDR did not identify the subject property as having registered ASTs. EDR did not identify AST sites within 1/8 mile of the subject property.

#### 4.2.3 Emergency Release Reports

The WDNR spills inventory was checked by EDR. EDR did not identify the subject property in the Spills database.

#### 4.2.4 RCRA Administration Action Tracking System (RAATS)

RAATS contains records based on the enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. EDR did not identify the subject property in the RAATS database.

#### 4.2.5 Hazardous Materials Incident Report System (HMIRS)

HMIRS contains a log of hazardous material spill incidents, which have been reported to the United States Department of Transportation. EDR did not identify the subject property in the HMIRS database.

#### 4.2.6 PCB Activity Database (PADS)

The PADS list identifies generators, transporters, commercial storers and/or brokers, and disposers of polychlorinated biphenyls (PCBs) who are required to notify the EPA of such activities. EDR did not identify the subject property in the PADS database.

#### 4.2.7 Toxic Release Inventory System (TRIS)

TRIS identifies facilities, which release toxic chemicals to the air, water, and land in "reportable quantities" under Title III of SARA. EDR did not identify the subject property in the TRIS database.

#### 4.2.8 Toxic Substance Control Act (TSCA)

TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. EDR did not identify the subject property in the TSCA database.

#### 4.2.9 Orphan Summary

Orphan sites are sites with incomplete addresses that could not be plotted on the EDR Radius Map. EDR reported 39 orphan sites in its Radius Map report. Based on a review of available addresses, none of the sites are located at or adjacent to the subject property and are not expected to impact the subject property.

### **4.3 Physical Setting Sources**

Sigma performed a review of topographic maps for the vicinity of the subject property and supplemented the topographic map review by searching additional information sources on physical setting.

#### **4.3.1 United States Geologic Survey Topographic Map**

The subject property is located in Sections 28, 29 and 33, in Township 7 North, Range 22 East, in the City of Milwaukee, Milwaukee County, Wisconsin (**Figure 1**). The region containing the subject property is located on USGS quadrangle map 43087-A8 Milwaukee, Wisconsin (1971 revision). The subject property is shown as being located within a densely developed part of the city (labeled red - city limits).

#### **4.3.2 Regional Geology and Hydrogeology**

Soil information for the area of the subject property was obtained from the USDA's Natural Resource Conservation Service (NRCS) database and from EDR. The subject property is located in Milwaukee County in a region consisting of generally well drained soils. Based on NRCS and EDR data, the area of the subject property is unmapped. Based on a review of site-specific information the subject property appears to be covered with eight to twelve feet of fill comprised of soft sandy silts and silty sands containing gravel along with amounts of brick and wood debris and traces of glass and cinders. The lithology beneath the fill material generally consists of deposits of saturated fine sandy and clayey silts and silty clays to the maximum depth investigated (20 feet below ground surface).

A 2002 report *Groundwater Resources of Southeastern Wisconsin* from the Southeastern Wisconsin Regional Planning Commission (SEWRPC), provides additional information on the regional geology of the area including the subject property. Groundwater flow in the region generally occurs within two different aquifer systems (the Quaternary sand and gravel aquifer and the underlying Silurian Dolomite aquifer, though additional deeper aquifers also exist below the Maquoketa shale confining unit). The surficial soils in Milwaukee County consist of till deposited from end and ground moraines. The soils were deposited by the glacial Lake Michigan Lobe (or a sublobe) and the till is generally represented by the Oak Creek Formation. The Oak Creek Formation includes fine-grained till, lacustrine clay, silt, sand, and some glaciofluvial sand and gravel. Groundwater in the shallow aquifer system typically flows toward nearby rivers, streams, and/or lakes. Beneath the Quaternary glacial deposits lie undifferentiated Silurian dolomites which are underlain by a series of sedimentary rocks consisting largely of sandstones and associated confining layers. Regional groundwater flow within the deeper sandstone and dolomite aquifer system generally flows east towards Lake Michigan.

Groundwater flow at a particular site is best determined using site-specific well data. Cultural influences, including high capacity wells, may effect shallow groundwater flow direction. Based on a review of site-specific information, the depths to groundwater ranged from 9 to 13 feet below ground surface in temporary groundwater monitoring wells in 2008.

### **4.4 Historical Use Information on the Property**

#### **4.4.1 Occupancy History**

Originally a list of residents, City Directories provides the name of resident or business and the type of business (if unclear) in a business index, a resident index and a street index. Sigma obtained city directories from EDR for the subject property from 1920 to 2003. The subject property was not listed in the city directories reviewed. City directories provided by EDR are presented in **Appendix B**. Additionally, city directories were reviewed at the Milwaukee Public Library. The subject property address was not listed in the city directories reviewed from 1930 to the present.

#### 4.4.2 Aerial Photographs

Sigma reviewed aerial photographs for the subject property. Aerial photographs are presented in **Appendix C**. Upon review of each of the available photographs, Sigma’s findings are as follows:

Aerial Photograph Summary	
Year	Subject Property Description
1937	The subject property appears to be vacant.
1956	The northern 1/3 of the property appears to be developed with a dead end right-of-way. The southern 2/3 of the subject property appears to be developed with two small structures, one adjacent to N. Edison Street and one adjacent to the Milwaukee River. No other significant change from the 1937 photo.
1963	No significant change from the 1956 photo.
1969	No significant change from the 1963 photo.
1979	No significant change from the 1969 photo.
1981	An identification of site features is not possible due to the poor resolution of the aerial photograph.
1985	The dead end right-of-way no longer appears to be located on the property No other significant change from the 1979 photo.
1992	No significant change from the 1985 photo.
2005	The subject property appears as it does currently. A pedestrian footbridge spans the Milwaukee River and connects to the west side of the subject property.

#### 4.4.3 Fire Insurance Maps

Sigma requested from EDR available Sanborn Fire Insurance maps of the subject property. The Sanborn Maps are presented in **Appendix D**. The following information is identified on the Sanborn maps:

Sanborn Map Summary	
Year	Subject Property Description
1894	The northern 1/3 of the subject property is developed with Johnson Street (a dead end right-if-way). Two unidentified structures are located near the northern property boundary and are part of the “R.P. Elmore & Company Coal Yard” property, which borders the subject property to the north, and also includes the subject property. An underground shaft connects the northwestern unidentified building to a building in the central portion of the property, which is identified as “wood sawing.”
1910	The northern 1/3 of the subject property is still developed with Johnson Street (dead end right-of-way). A 10 inch wide pipe (fire boat line) is shown under Johnson Street, oriented in an east to west direction. The remainder of the subject property is vacant (no structures located on the property).
1951	Johnson Street is now identified as E. Highland Avenue, and is identified as “not open.” A small structure identified as “carpenter” is located on the east/central portion of the property. The southern 2/3 of the property is identified as “auto parking.”
1968	The subject property is vacant. No structures or roads are located on the property. The 10 inch wide pipe is still located on the property.

#### 4.4.4 Building Department Records

A check for building permit records was made with the City of Milwaukee Building Department. The building records on file for the subject property included 1968 and 1971 occupancy permits for a parking lot and snow dump. No other permits of note were on file with the department.

#### 4.4.5 Previous Environmental Reports

A *Phase I Environmental Site Assessment* for 1027 N. Edison Street, prepared by the City of Milwaukee, dated July 25, 2000 (revised August 1, 2000), was reviewed as part of this assessment. At the time of the assessment, the property was a parking lot and also included a pedestrian right-of-way associated with the "riverwalk." Information of note gleaned from the report includes the following: 1) an 1876 and 1888 Rascher's Fire Insurance Atlas shows the subject property may have been developed with two coal elevators that supplied coal to the coal shed located on the northern adjoining property, and the southern 2/3 of the property was identified as the R.P. Elmore & Co. wood yard," 2) a 1910 Sanborn Map (with updates through 1926) shows the southern 2/3 of the subject property as "2<sup>nd</sup> Hand Materials Yard," which included a small office and a small unidentified structure on the western edge of the property, and also shows the southern adjoining property as an auto repair and painting business.

A Draft *Summary of Additional Site Investigation Activities* report for 1027 N. Edison Street, prepared by Sigma for the City of Milwaukee, dated June 30, 2008, was reviewed as part of this assessment. Phase II investigation activities were conducted at the site by Sigma between January 31, 2008 and February 28, 2008 to assess the site conditions relative to historic uses. Results of the Phase II investigation activities are summarized as follows:

- The site appears to be covered with eight to twelve feet of fill comprised of soft sandy silts and silty sands containing gravel along with amounts of brick and wood debris and traces of glass and cinders. The lithology beneath the fill material generally consists of deposits of saturated fine sandy and clayey silts and silty clays to the maximum depth investigated (20 feet bgs).
- The depths to groundwater ranged from 9 to 13 feet bgs in temporary groundwater monitoring wells. Based on the static groundwater elevations groundwater is interpreted to flow to the northeast.
- Site specific physical and chemical characteristics indicate that fill material containing concentrations of select Polycyclic Aromatic Hydrocarbon (PAH) constituents and lead at concentrations greater than Residual Contaminant Levels (RCLs) for the direct contact pathway is present at the site. The impacted fill material does not appear to be present at the ground surface but extends from approximately 2 to 4 feet to depths of between 8 to 12 feet bgs. Although the fill material also contains concentrations of naphthalene and phenanthrene greater than the RCL for the protection of groundwater, groundwater at the site did not contain concentrations of naphthalene or phenanthrene greater than Ch. NR 140 Preventive Action Limits (PALs). The soil sample collected from below the fill material at 10 to 12 feet bgs in soil boring GP-2 did not contain concentrations of PAHs greater than laboratory method detection limits and the reported concentration of lead in this sample was below the Ch. NR 720 RCL.

- Residual impacts to groundwater beneath the site appear to be limited to chloride at concentrations greater than the Ch. NR 140 Enforcement Standard (ES) and PAL in temporary wells TW-1, TW-2, and TW-3, chrysene at a concentration greater than the Ch. NR 140 ES in temporary well TW-5, pyridine at a concentration greater than the Ch. NR 140 PAL in temporary well TW-1, dissolved chromium at a concentration greater than the Ch. NR 140 PAL in temporary well TW-2, and dissolved arsenic at concentrations greater than the Ch. NR 140 PAL in temporary wells TW-1, TW-2, TW-4, and TW-5.

Based on the Phase II investigation activities, Sigma recommended additional site investigation activities to further characterize subsurface impacts at the site, which are summarized as follows:

#### Subsurface Investigation

On May 21, 2008 three Geoprobe® soil borings (FGP-1 through FGP-3) were completed within the area of the site that would require subsurface excavation. The Geoprobe® borings were advanced to a depth of approximately 12 feet bgs. The soil borings were spaced evenly from east to west across the site.

Two soil samples from each boring (one soil sample collected from within the fill material and one soil sample collected from native material beneath the fill) were collected and submitted for laboratory analysis of PAHs and lead. A composite soil sample from the three soil borings was also submitted for laboratory analysis of semi-volatile organic compounds (SVOCs), TCLP lead, reactive cyanide, reactive sulfide, flash point, pH, and free liquids.

#### Methane Monitoring

Sigma completed methane monitoring at the existing temporary groundwater monitoring wells (TW-1 through TW-4) using a LandTec Infrared Gas Analyzer. Methane monitoring was not completed at the location of temporary monitoring well TW-5 as the PVC casing had been removed from this well (TW-5 was subsequently abandoned with bentonite chips). The monitoring included five days of closed vapor point monitoring followed by five days of open vapor point monitoring to evaluate the potential for subsurface materials to generate methane.

#### Soil Analytical Results

A total of six soil samples collected at the site were submitted for laboratory analysis of PAHs and lead, and a composite soil sample was submitted for laboratory analysis of SVOCs, TCLP lead, reactive cyanide, reactive sulfide, flash point, pH, and free liquids.

PAHs and Lead Discussion: Detectable concentrations of one or more PAH constituents and lead were measured in each soil sample collected from the additional soil borings (FGP-1 through FGP-3). Soil samples collected and submitted from the observed fill material in each boring (FGP-1 4 to 8 feet bgs, FGP-2 0 to 4 feet bgs, and FGP-3 0 to 4 feet bgs) contained reported concentrations of one or more PAH constituents and lead greater than the RCLs for the direct contact pathway. In addition, the fill samples collected from soil borings FGP-2 and FGP-3 contained reported concentrations of phenanthrene greater than the Interim Guidance RCL for the protection of groundwater pathway.

In general, soil samples collected from the native material below the fill material observed in each boring (FGP-1 8 to 12 feet bgs, FGP-2 8 top 12 feet bgs, and FGP-3 8 to 12 feet bgs) did not contain reported concentrations of PAH constituents or lead greater than applicable RCLs, with the exception of the sample collected from soil boring FGP-3 at a depth of 8 to 12 feet bgs. The soil sample collected from soil boring FGP-3 at a depth of 8 to 12 feet bgs contained concentrations of benzo(a)pyrene and lead that exceeded RCLs for the direct contact pathway at a non-industrial site. It is possible that the impacts associated with the fill material have impacted native material underlying the fill material at this location.

Soil analytical results from the additional soil borings are consistent with results collected during the Phase II ESA activities previously completed at the site. Based on the analytical results concentrations of PAH constituents within the fill material at the site appear to be greatest in the western portion of the site and decrease across the site to the east.

Composite Soil Sample Discussion: Analytical results from the composite soil sample indicate that materials, which may require handling and/or off-site disposal during redevelopment of the site, will most likely be considered a special waste. Laboratory analysis did not identify any characteristically hazardous constituents within the composite soil sample.

Methane Monitoring Results

Review of methane monitoring results indicate that a negligible amount (0.1%) or no methane was present at temporary monitoring well locations TW-1, TW-3, and TW-4 during all closed cap and open cap methane monitoring events. Methane was detected at temporary well TW-2 at concentrations between 3.8% and 6.0% during closed cap monitoring and at concentrations between 0.5% and 16.4% during open cap monitoring.

The previous environmental reports are included in **Appendix I**.

**4.5 Historical Use Information on Adjoining Properties**

4.5.1 Occupancy History

Originally a list of residents, City Directories provides the name of resident or business and the type of business (if unclear) in a business index, a resident index and a street index. Sigma obtained city directories from EDR for nearby properties from 1920 through 2003. Nearby and/or adjoining properties generally consisted of commercial and industrial businesses and residences. City directories provided by EDR are presented in **Appendix B**.

4.5.2 Aerial Photographs

Sigma reviewed aerial photographs for the adjoining properties. Aerial photographs are presented in **Appendix C**. Upon review of each of the available photographs, Sigma’s findings are as follows:

Aerial Photograph Summary	
Year	Adjoining Properties Description
1937	The surrounding properties generally appear developed. The northern adjoining property appears to be developed with a structure, N. Edison Street borders the subject property to the east with buildings beyond the street, a building borders the property to the south, and the Milwaukee River borders the subject property to the west.
1956	No significant change from the 1937 photo.
1963	No significant change from the 1956 photo.
1969	No significant change from the 1963 photo.
1979	The eastern adjoining property is developed with a parking garage. No other significant change from the 1969 photo.
1981	An identification of site features is not possible due to the poor resolution of the aerial photograph.
1985	The northern adjoining property is developed with the existing condominiums. No other significant change from the 1979 photo.
1992	No significant change from the 1985 photo.
2005	No significant change from the 1992 photo.

#### 4.5.3 Fire Insurance Maps

Sigma requested from EDR available Sanborn Fire Insurance maps of the adjoining properties. The Sanborn Maps are presented in **Appendix D**. The following information is identified on the Sanborn maps:

Sanborn Map Summary	
Year	Adjoining Properties Description
1894	The northern adjoining property is developed with the "R.P. Elmore Coal Co. Coal Yard." N. Edison Street (River Street) borders the subject property to the east with residences and the "L.M. Pierron Pottery Company" located on the east side of the street. The southern adjoining property is developed with "Struck Bros. Coal and Wood Yard." The Milwaukee River borders the subject property to the west.
1910	The northern and southern adjoining properties are vacant. No other significant changes from the 1894 map.
1951	The eastern adjoining property is developed with a salvation army warehouse, a junk shop, wholesale furniture business, drugs factory and a hotel. The southern adjoining property is developed with a parking garage. No other significant changes from the 1910 map.
1968	The northern adjoining property is identified as "parking." The property on the east side of N. Edison Street is developed with a parking garage. The southern adjoining property is developed with a building occupied by a wholesale florist.

## 5.0 SITE RECONNAISSANCE

### 5.1 Methodology and Limiting Conditions

On October 7, 2009, Mathew Reimer of Sigma conducted site reconnaissance of the subject property to examine the site for visual signs of contamination. Conditions at the time of the visit were sunny with temperatures in the 50s (°F). Photographs of the site are included in **Appendix E** of this report.

### 5.2 Observations

#### 5.2.1 Hazardous Substances and Petroleum Products in Connection with Identified Uses

Small quantities (1 to 5 gallon containers) of hazardous materials were observed along the southern property boundary on the subject property. The substance containers were labeled as follows: one one-gallon can of paint, one 5-gallon container of methyl ethyl ketone, two 5-gallon containers of thinner, one small container identified as a 73 pound container of zinc dust, and one 5-gallon container of reducer. The containers contained varying amounts of liquid. Two small containers, one almost empty and one full, were not labeled. The containers were in good condition with no indications of leaks observed. The containers can be observed on photo 4 in **Appendix E** of this report.

#### 5.2.2 Storage Tanks and Drums

Not observed.

#### 5.2.3 Odors, Pools of Liquids, Stained Soil or Pavement, Stressed Vegetation

Not observed.

#### 5.2.4 Hazardous Substances and Petroleum Products Not Necessarily Used in Connection with Identified Uses

Not observed.

#### 5.2.5 Unidentified Substance Containers

Refer to section 5.2.1.

#### 5.2.6 Polychlorinated Biphenyls (PCBs)

Not observed.

#### 5.2.7 Pits, Ponds or Lagoons

Not observed.

#### 5.2.8 Wastewater

Not observed.

#### 5.2.9 Solid Waste

Not observed.

#### 5.2.10 Heating

Not observed.

#### 5.2.11 Emergency Generators

Not observed.

#### 5.2.12 Stains or Corrosion

Not observed.

#### 5.2.13 Drains or Sumps

Not observed.

#### 5.2.14 Wells

Several temporary groundwater monitoring wells were observed at various location on the subject property.

#### 5.2.15 Septic Systems

Not observed.

#### 5.2.16 Additional Observations

Multiple orange traffic barrels and a few road signs were observed on the southeastern portion of the site adjacent to N. Edison Street.

## 6.0 INTERVIEWS

### **6.1 Interviews with Site Owner**

Sigma submitted an owner questionnaire to Ms. Dettmer, a representative of the owner of the subject property owner. Ms. Dettmer reported no information about previous ownership or uses of the property that may be material to identifying recognized environmental conditions, except for historical use and limited Phase II ESA subsurface investigation information about the property. The completed owner questionnaire is included as **Appendix H**.

### **6.2 Interviews with Previous Site Owners/Occupants**

Previous site owner/occupant information was not readily accessible during this assessment.

### **6.3 Interviews with Local Government Officials**

#### **6.3.1 Milwaukee Building Department**

Sigma visited the Milwaukee Building Department to review inspection records for the subject property. Refer to section 4.4.4 for building permit information.

#### **6.3.2 Milwaukee Fire Department**

Sigma contacted the Milwaukee Fire Department concerning the subject property. A representative of the fire department has not responded to Sigma's request for information as of the date of this report.

### **7.0 FINDINGS**

The subject property is approximately 0.4 acres (18,918 square feet) and is located on the west side of N. Edison Street, in Milwaukee, Wisconsin. The northern portion of the subject property is landscaped, with a sculpture on the northeast corner of the property. A concrete walkway that connects to a pedestrian footbridge across the Milwaukee River is located on the central portion of the property and is oriented in an east to west direction. The southern portion of the subject property is partially paved with concrete and also includes unpaved ground. Large stone, gravel and dirt are located adjacent to the south side of the concrete walkway. The southern portion of the subject property was most recently used as a parking lot and snow dump area. The current owner of the subject property is the City of Milwaukee. The subject property is located in Sections 28, 29 and 33, in Township 7 North, Range 22 East, in the City of Milwaukee, Milwaukee County, Wisconsin.

A search of available environmental records was conducted by EDR. The subject property was not identified on environmental databases. EDR did identify nearby properties on environmental databases as being within the search radius of the subject property; one or more of the identified sites has the potential to impact the subject property.

Recognized environmental conditions were found during the course of the Phase I ESA. In addition, off-sites RECs were identified.

### **8.0 OPINIONS**

Based on the information available to date, it is the opinion of Sigma Environmental Services Inc. that past site usage has impacted the subject property. Additionally, a release from one or more of the identified off-site sources may have impacted the subject property.

### **9.0 CONCLUSIONS**

Sigma has performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 of the property located at 1027 N. Edison Street, in the City of Milwaukee, Milwaukee County, Wisconsin, the subject property. Any exceptions to, or deletions from, this practice are described in **Section 10.0** of this report. This assessment has revealed evidence of RECs in connection with the subject property. The RECs are as follows:

- Based on a review of Sanborn fire insurance maps, the subject property was part of a coal yard that extended onto the northern adjoining property and was occupied by a 2<sup>nd</sup> Hand Materials Yard. The subject property may have been impacted by these former uses.

- The site appears to be covered with eight to twelve feet of fill comprised of soft sandy silts and silty sands containing gravel along with amounts of brick and wood debris and traces of glass and cinders. Site specific physical and chemical characteristics indicate that fill material containing concentrations of select Polycyclic Aromatic Hydrocarbon (PAH) constituents and lead at concentrations greater than Residual Contaminant Levels (RCLs) for the direct contact pathway is present at the site. Concentrations of PAH constituents within the fill material at the site appear to be greatest in the western portion of the site and decrease across the site to the east. The fill material also contains concentrations of naphthalene and phenanthrene greater than the RCL for the protection of groundwater. Residual impacts to groundwater beneath the site appear to be limited.

The City of Milwaukee conducted a Phase I ESA of the subject property in 2000, which identified similar RECs as identified in this Phase I ESA conducted by Sigma (new RECs were not identified in this Phase I ESA). Based on the RECs identified in the 2000 Phase I ESA conducted by the City of Milwaukee, Sigma conducted limited Phase II ESA activities in 2008 at the subject property to evaluate the RECs. Based on the results of the limited Phase II ESA, subsurface impacts were identified.

Off-site RECs were identified during the course of the Phase I ESA. Please note, with respect to potential off-site issues, the State of Wisconsin created the "property affected by off-site discharges" exemption, s. 292.13, Wisconsin Statutes, which limits the responsibilities of property owners when soil or groundwater contamination is confirmed to be migrating onto his or her property from off-site. Property owners of sites where environmental impacts originate off-site are generally not responsible for taking appropriate environmental response actions if certain conditions are met. The off-site RECs are as follows:

- EDR identified six Historical Auto Station site within 1/8 mile from the subject property; United Auto Service Corp located south/southeast of the subject property at 1005 N. Edison Street, Jeanson David N. located south/southeast of the subject property at 143 E. State Street, Weeks Auto Service located southeast of the subject property at 185 E. State Street, Rackowskas Paul located west of the subject property at 320 Highland Avenue, Kveen Albert E Service Station located south of the subject property at 129 E. State Street, and Juneau Garage located north of the subject property at 114 E. Juneau. Based on the distance between the reported sites and the subject property, with the exception of the Rackowskas Paul site located on the west side of the Milwaukee River, a release(s) from the potential UST systems associated with the auto station sites has the potential to have impacted the subject property.
- EDR identified six Historical Cleaner sites located on the east side of the Milwaukee River include Leong Saml located at 159 E. State Street, Serve U Well Cleaners located at 181 E. State Street, La Salle Cleaners and Dyers located at 1110 N. Water Street, Falconizing Inc. located at 1023 N. Water Street, Henry Hand Laundry located at 1017 N. Water Street, Gong Henry located at 1009 N. Water Street, Gee Don Hoy located at 934 N. Water Street, and Cream City Laundry located at 1005 N. Broadway. Based on the distance between the reported sites and the subject property, cleaning chemicals associated with one or more of the potential cleaners sites have the potential to have impacted the subject property.

The conclusions included in this assessment report should not be construed as legal advice. This practice is intended to reflect a commercially prudent and reasonable inquiry. No environmental site assessment can wholly eliminate uncertainty regarding the potential for recognized environmental conditions in connection with the subject property. Performance of the ASTM E 1527-05 practice is intended to reduce, but not eliminate that uncertainty. Finally, even a finding of no recognized environmental conditions is not a warranty or guarantee that the property is free from contamination.

## 10.0 DEVIATIONS

There were no intentional deviations from or additions to standard practices identified in the ASTM standard for Phase I ESAs ASTM-1527-05 except as noted within this report.

## 11.0 REFERENCES

Published referenced sources relied upon in preparing this Phase I Environmental Site Assessment are as noted in the body of the report.

## 12.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of ASTM 1527-05, 40 CFR part 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR part 312.

Mathew Reimer  
Staff Scientist

Kristin Kurzka, P.E.  
Senior Project Engineer

## 13.0 QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONALS

Sigma Environmental Services, Inc. is a full-service environmental consulting and engineering firm located in Milwaukee, Wisconsin. Project team resumes are included in **Appendix J**.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

1027 N. EDISON STREET  
MILWAUKEE, WI 53202

#### COORDINATES

Latitude (North): 43.044300 - 43° 2' 39.5"  
Longitude (West): 87.912600 - 87° 54' 45.4"  
Universal Transverse Mercator: Zone 16  
UTM X (Meters): 425666.6  
UTM Y (Meters): 4765923.5  
Elevation: 590 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 43087-A8 MILWAUKEE, WI  
Most Recent Revision: 1971

### AERIAL PHOTOGRAPHY IN THIS REPORT

PCB TRANSFORMER.....	PCB Transformer Registration Database

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2009 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

#### ***Federal RCRA generators list***

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 4 RCRA-CESQG sites within approximately 0.25 miles of the target property.

### **State and tribal landfill and/or solid waste disposal site lists**

WI WDS: The Registry was created by the DNR to serve as a comprehensive listing of all sites where solid or hazardous wastes have been or may have been deposited.

A review of the WI WDS list, as provided by EDR, and dated 02/03/2009 has revealed that there is 1 WI WDS site within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### **State and tribal registered storage tank lists**

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Commerces' List: All Underground Storage Tanks Except for Fuel Oil.

A review of the UST list, as provided by EDR, and dated 07/03/2009 has revealed that there are 17 UST sites within approximately 0.25 miles of the target property.

### **State and tribal institutional control / engineering control registries**

AUL: Date a deed restriction is recorded at the Register of Deeds office for a property. Extent of soil contamination is known but impracticable to remove now or an engineering control is required to be maintained or NR720 industrial stds are applied. Restricts property use or requires future actions.

A review of the AUL list, as provided by EDR, and dated 07/28/2009 has revealed that there are 24 AUL

### State and tribal voluntary cleanup sites

VCP: The Voluntary Party Liability Exemption is an elective environmental cleanup program. Interested persons who meet the definition of "voluntary party" are eligible to apply. A "voluntary party" is any person who submits an application and pays all the necessary fees.

A review of the VCP list, as provided by EDR, and dated 07/28/2009 has revealed that there are 6 VCP sites within approximately 0.5 miles of the target property.

## EXECUTIVE SUMMARY

### **State and tribal Brownfields sites**

BROWNFIELDS: A listing of brownfields sites included in the BRRTS database. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

A review of the BROWNFIELDS list, as provided by EDR, and dated 07/28/2009 has revealed that there are 9 BROWNFIELDS sites within approximately 0.5 miles of the target property.

### Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 2 RCRA-NonGen sites within approximately 0.25 miles of the target property.

### EDR PROPRIETARY RECORDS

#### ***EDR Proprietary Records***

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the Manufactured Gas Plants list, as provided by EDR, has revealed that there are 2 Manufactured Gas Plants sites within approximately 1 mile of the target property.

PETERS=JOHNSON/3RD WARD COAL G	142 N MILWAUKEE ST	SSE 1/2 - 1 (0.948 mi.)	AQ164	691

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 35 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there are 18 EDR Historical Cleaners sites within approximately 0.25 miles of the target property.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008  
Waste name: LEAD

Waste code: D018  
Waste name: BENZENE

Violation Status: No violations found

Environmental Interest/Information System

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Action Date: 08/01/2008 Action Code: 710  
Action Name: Date Soil Registry Fee Paid  
Action Desc: Date Fee received for Closed Remediation Soil Site Registry.  
Action Cmnts: REC'D CK# 50650 \$250.00

Action Date: 08/01/2008 Action Code: 50  
Action Name: GIS Registry Site  
Action Desc: Site conditions merit placement on GIS registry.  
Action Cmnts: \*\*\* AUTO POPULATED BY 710 ACTION ENTRY \*\*\*

Action Date: 11/12/2008 Action Code: 232  
Action Name: Residual Soil Contamination at or above RCL or SSRCL  
Action Desc: Closure was approved with residual soil contamination at or above the Residual Contamination Level (RCL) or Site Specific Residual Contaminant Level (SSRCL).  
Action Cmnts: \*\*\* AUTO POPULATED AT FINAL CLOSURE DUE TO 710 ACTION \*\*\*

Action Date: 11/12/2008 Action Code: 56  
Action Name: Land Use Controls Required at Closure  
Action Desc: Closure letter (cleanup approval) imposes conditions to ensure residual contamination does not pose a threat to the public or environment. Property is listed in DNR's GIS Registry of Closed Remediation Sites. Prior to June 3, 2006 this would have required a deed restriction.  
Action Cmnts: Not reported

Action Date: 11/12/2008 Action Code: 222  
Action Name: Land Use Control (LUC) for a cap over contaminated area  
Action Desc: Closure was approved with the requirement to maintain a cap or cover to protect against exposure to contaminated soil (direct contact) or to reduce the movement of residual contamination in soil or groundwater.

Action Cmnts: DIRECT CONTACT AND INFILTRATION BARRIER  
Action Date: 11/12/2008 Action Code: 11  
Action Name: Activity Closed  
Action Desc: Date the Closure Letter or No Further Action letter is sent. NOTE: This is the ONLY action code that will close an activity.

Action Cmnts: Not reported  
Action Date: 11/12/2008 Action Code: 48  
Action Name: NR 140 Exemption at Closure  
Action Desc: Variance granted under NR 140 to close the site with groundwater contamination above the preventive action limit (PAL).  
Action Cmnts: BENZENE, NAPHTHALENE AND TRIMETHYLBENZENE AT MW-A, MW-B, MW-9A AND MW-11

<b>Relative:</b> <b>Higher</b>	FINDS:  Registry ID: 110001927005  Environmental Interest/Information System WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).  AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D000  
 Waste name: Not Defined

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018

Owner/Op end date: Not reported

Handler Activities Summary:

U.S. importer of hazardous waste: Unknown  
Mixed waste (haz. and radioactive): Unknown  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: Unknown  
Furnace exemption: Unknown  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No  
Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Violation Status: No violations found

Registry ID: 110005526911

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

CAMDBS (Clean Air Markets Division Business System) is a national information system that supports the implementation of market-based air pollution control programs administered by the Clean Air Markets Division, within the Office of Air and Radiation. These programs include the Acid Rain Program, established by Title IV of the Clean Air Act Amendments of 1990, and regional programs designed reduce the transport of ozone. These emissions trading programs allows regulated facilities (primarily electric utilities) to adopt the most cost-effective strategies to reduce emissions at their units. Units that reduce their emissions below the number of allowances they hold -- each allowance is equivalent to one ton of sulfur dioxide or nitrogen oxides -- may trade allowances with other units in their system, sell them to other utilities on the open market or through EPA auctions, or bank them to cover emissions in future years. CAMDBS functions include registering responsible officials, establishing allowance accounts, reporting hourly emissions data, and transferring allowances between accounts.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

**Hazardous Waste Summary:**

Waste code: D000  
Waste name: Not Defined

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Used oil transporter: No  
Off-site waste receiver: Commercial status unknown

**Hazardous Waste Summary:**

Waste code: D000  
Waste name: Not Defined

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Handler Activities Summary:**

U.S. importer of hazardous waste: Unknown  
Mixed waste (haz. and radioactive): Unknown  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: Unknown  
Furnace exemption: Unknown  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No  
Off-site waste receiver: Commercial status unknown

**Historical Generators:**

Date form received by agency: 04/04/1988  
Facility name: AMBROSIA CHOCOLATE CO  
Classification: Small Quantity Generator

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: F003

**Hazardous Waste Summary:**

Waste code: D000  
Waste name: Not Defined

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

**FINDS:**

Registry ID: 110005424781

**Environmental Interest/Information System**

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

EPA Region: 05  
Classification: Small Small Quantity Generator  
Description: Handler: generates more than 100 and less than 1000 kg of hazardous waste during any calendar month and accumulates less than 6000 kg of hazardous waste at any time; or generates 100 kg or less of hazardous waste during any calendar month, and accumulates more than 1000 kg of hazardous waste at any time

**Owner/Operator Summary:**

Owner/operator name: THE WISCONSIN CENTER DISTRICT  
Owner/operator address: 500 W KILBOURN AVE  
MILWAUKEE, WI 53203  
Owner/operator country: Not reported  
Owner/operator telephone: (414) 271-4000  
Legal status: Private  
Owner/Operator Type: Owner  
Owner/Op start date: Not reported  
Owner/Op end date: Not reported

**Handler Activities Summary:**

U.S. importer of hazardous waste: Unknown  
Mixed waste (haz. and radioactive): Unknown  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: Unknown  
Furnace exemption: Unknown  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No  
Off-site waste receiver: Commercial status unknown

**Hazardous Waste Summary:**

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

related to Wisconsin's DNR (Department of Natural Resources).

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Biennial Reports:

Last Biennial Reporting Year: 2007

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSLEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 400

Waste code: F001  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Amount (Lbs): 671

Waste code: F006  
Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM;

Hazardous Waste Summary:

Waste code: D000  
Waste name: Not Defined

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008  
Waste name: LEAD

Waste code: D018  
Waste name: BENZENE

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

**FINDS:**

Registry ID: 110013294773

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GIS Area Point Flag: P  
Action Date: 01/30/2008 Action Code: 48  
Action Name: NR 140 Exemption at Closure  
Action Desc: Variance granted under NR 140 to close the site with groundwater contamination above the preventive action limit (PAL).  
Action Cmnts: BENZO A PYRENE, BENZO B FLUORANTHENE AND BENZO K FLOURANTHENE  
Action Date: 04/18/2008 3:36:11 PM Action Code: 100  
Action Name: GIS Registry QAQC Completed  
Action Desc: Date and status that this site had QAQC completed for GIS registry.  
Action Cmnts: Not reported  
Action Date: 01/30/2008 Action Code: 56  
Action Name: Land Use Controls Required at Closure  
Action Desc: Closure letter (cleanup approval) imposes conditions to ensure residual contamination does not pose a threat to the public or environment. Property is listed in DNR's GIS Registry of Closed Remediation Sites. Prior to June 3, 2006 this would have required a deed restriction.  
Action Cmnts: Not reported  
Action Date: 01/30/2008 Action Code: 222  
Action Name: Land Use Control (LUC) for a cap over contaminated area  
Action Desc: Closure was approved with the requirement to maintain a cap or cover to protect against exposure to contaminated soil (direct contact) or to reduce the movement of residual contamination in soil or groundwater.  
Action Cmnts: Not reported  
Action Date: 01/30/2008 Action Code: 220  
Action Name: Land Use Control (LUC) for soil at industrial use level  
Action Desc: Closure was approved using soil standards that are appropriate for industrial land use.  
Action Cmnts: Not reported  
Action Date: 11/02/2006 Action Code: 2  
Action Name: RP Letter Sent  
Action Desc: Date of letter to RP notifying of legal responsibilities associated with the discovery of contamination.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: F001  
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF

**Environmental Interest/Information System**

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001  
 Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D018  
Waste name: BENZENE

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Hazardous Waste Summary:**

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D006  
Waste name: CADMIUM

Waste code: D007  
Waste name: CHROMIUM

Waste code: D008  
Waste name: LEAD

Waste code: D010  
Waste name: SELENIUM

Waste code: D039  
Waste name: TETRACHLOROETHYLENE

**Environmental Interest/Information System**

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in

regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Action Cmnts: SITES B,C,D,E  
Action Date: 02/13/2003 Action Code: 36  
Action Name: Site Investigation Workplan Approved or NTP/2  
Action Desc: Date the Site Investigation Workplan is approved verbally or in writing by DNR staff. For state-lead sites and sites the RR Supervisor has designated to be "project-managed."  
Action Cmnts: VERBAL  
Action Date: 01/29/2003 Action Code: 29  
Action Name: Phase II Environmental Site Assessment Rpt Received  
Action Desc: Date that the DNR received a Phase II Environmental Site Assessment Report.  
Action Cmnts: Not reported  
Action Date: 04/08/2003 Action Code: 39  
Action Name: Remedial Action Options Report received (w/out Fee)  
Action Desc: Date the DNR receives the Remedial Action Options Report (workplan). Includes actions to prevent, minimize, stabilize, eliminate threat of discharged hazardous substances, restore the environment to the extent practicable. Identify and evaluate options consistent with DNR standards.  
Action Cmnts: AREA D/SITE E  
Action Date: 04/11/2002 Action Code: 35  
Action Name: Site Investigation Workplan Received (w/out Fee)  
Action Desc: Date the DNR receives the Site Investigation Workplan. States the objectives of the investigation to determine the degree and extent of contamination.  
Action Cmnts: Not reported  
Action Date: 02/02/2005 Action Code: 43  
Action Name: Status Report Received  
Action Desc: Date updates on progress are received. Can be 30, 60, 90 days or other interval.  
Action Cmnts: PM. SITE B/C GW MONITORING REPORT  
Action Date: 03/27/2002 Action Code: 99

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Used oil transporter: No  
Off-site waste receiver: Commercial status unknown

Hazardous Waste Summary:

Waste code: D000  
Waste name: Not Defined

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSLEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D007  
Waste name: CHROMIUM

Waste code: D008  
Waste name: LEAD

**Environmental Interest/Information System**

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

WI-ESR (Wisconsin - Environmental System Registry) is a database that contains core information about facilities, organizations, and people related to Wisconsin's DNR (Department of Natural Resources).

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/02/2009	Source: EPA
Date Data Arrived at EDR: 02/12/2009	Telephone: N/A
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/23/2009	Source: EPA
Date Data Arrived at EDR: 04/28/2009	Telephone: N/A
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/16/2009
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/02/2009	Source: EPA
Date Data Arrived at EDR: 02/12/2009	Telephone: N/A
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/09/2009	Source: EPA
Date Data Arrived at EDR: 01/30/2009	Telephone: 703-412-9810
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 101	Next Scheduled EDR Contact: 10/12/2009
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810
Date Made Active in Reports: 02/20/2008	Last EDR Contact: 09/09/2009
Number of Days to Update: 76	Next Scheduled EDR Contact: 12/14/2009
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/25/2009	Source: EPA
Date Data Arrived at EDR: 04/02/2009	Telephone: 800-424-9346
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/31/2009
Number of Days to Update: 39	Next Scheduled EDR Contact: 11/30/2009
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008  
Date Data Arrived at EDR: 11/18/2008  
Date Made Active in Reports: 03/16/2009

Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/12/2008

Next Scheduled EDR Contact: 10/19/2009  
Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 11/12/2008  
Date Data Arrived at EDR: 11/18/2008

Telephone: 703-603-0695  
Last EDR Contact: 09/18/2009  
Next Scheduled EDR Contact: 12/28/2009  
Data Release Frequency: Varies

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/31/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/22/2009	Telephone: 703-603-0695
Date Made Active in Reports: 05/05/2009	Last EDR Contact: 09/18/2009
Number of Days to Update: 13	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: Varies

## **Federal ERNS list**

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2008	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/30/2009	Telephone: 202-267-2180
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 08/26/2009
Number of Days to Update: 109	Next Scheduled EDR Contact: 10/19/2009
	Data Release Frequency: Annually

## **State- and tribal - equivalent CERCLIS**

### SHWS: Hazard Ranking List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 11/30/1994	Source: Department of Natural Resources
Date Data Arrived at EDR: 02/10/1995	Telephone: 608-266-2632
Date Made Active in Reports: 03/01/1995	Last EDR Contact: 07/21/2009
Number of Days to Update: 19	Next Scheduled EDR Contact: 10/19/2009
	Data Release Frequency: No Update Planned

## **State and tribal landfill and/or solid waste disposal site lists**

### SWF/LF: List of Licensed Landfills

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 07/23/2009	Source: Department of Natural Resources
Date Data Arrived at EDR: 07/23/2009	Telephone: 608-267-7557
Date Made Active in Reports: 08/10/2009	Last EDR Contact: 07/20/2009
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/19/2009
	Data Release Frequency: Semi-Annually

### WDS: Registry of Waste Disposal Sites

The registry was created by the DNR to serve as a comprehensive listing of all sites where solid or hazardous wastes have been or may have been deposited.

Date of Government Version: 02/03/2009	Source: Department of Natural Resources
Date Data Arrived at EDR: 04/23/2009	Telephone: 608-266-2632
Date Made Active in Reports: 06/02/2009	Last EDR Contact: 04/23/2009
Number of Days to Update: 40	Next Scheduled EDR Contact: 07/20/2009
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SHWIMS: Solid & Hazardous Waste Information Management System

Information on sites, and facilities operating at sites, that are regulated by the Waste Management program

Date of Government Version: 07/21/2009	Source: Department of Natural Resources
Date Data Arrived at EDR: 07/23/2009	Telephone: 608-266-2414
Date Made Active in Reports: 08/10/2009	Last EDR Contact: 09/14/2009
Number of Days to Update: 18	Next Scheduled EDR Contact: 10/19/2009
	Data Release Frequency: Quarterly

## State and tribal leaking storage tank lists

### LUST: Leaking Underground Storage Tank Database

Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 07/28/2009	Source: Department of Natural Resources
Date Data Arrived at EDR: 07/30/2009	Telephone: 608-266-2111
Date Made Active in Reports: 08/10/2009	Last EDR Contact: 07/30/2009
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

### LAST: Leaking Aboveground Storage Tank Listing

A listing of leaking aboveground storage tank sites.

Date of Government Version: 07/28/2009	Source: Department of Natural Resources
Date Data Arrived at EDR: 07/30/2009	Telephone: 608-267-7563
Date Made Active in Reports: 08/10/2009	Last EDR Contact: 07/30/2009
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Varies

### INDIAN LUST R8: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Colorado, Montana, North Dakota, South Dakota, Utah and Wyoming.

Date of Government Version: 06/01/2009	Source: EPA Region 8
Date Data Arrived at EDR: 06/03/2009	Telephone: 303-312-6271
Date Made Active in Reports: 06/17/2009	Last EDR Contact: 08/17/2009
Number of Days to Update: 14	Next Scheduled EDR Contact: 11/16/2009
	Data Release Frequency: Quarterly

### INDIAN LUST R7: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Iowa, Kansas, and Nebraska

Date of Government Version: 03/24/2009	Source: EPA Region 7
Date Data Arrived at EDR: 05/20/2009	Telephone: 913-551-7003
Date Made Active in Reports: 06/17/2009	Last EDR Contact: 08/21/2009
Number of Days to Update: 28	Next Scheduled EDR Contact: 11/16/2009
	Data Release Frequency: Varies

### INDIAN LUST R1: Leaking Underground Storage Tanks on Indian Land

A listing of leaking underground storage tank locations on Indian Land.

Date of Government Version: 02/19/2009	Source: EPA Region 1
Date Data Arrived at EDR: 02/19/2009	Telephone: 617-918-1313
Date Made Active in Reports: 03/16/2009	Last EDR Contact: 08/17/2009
Number of Days to Update: 25	Next Scheduled EDR Contact: 11/16/2009
	Data Release Frequency: Varies

### INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Alaska, Idaho, Oregon and Washington.

## ***State and tribal institutional control / engineering control registries***

### CRS: Closed Remediation Sites

A Closed Remediation Site is parcel of land at which the groundwater has become contaminated and which is affected by a particular type of legal restriction. Specifically, certain steps have been taken to stabilize/remediate the contamination, and the state is satisfied that no further efforts are necessary provided that the property is not used for certain purposes.

Date of Government Version: 06/09/2009  
Date Data Arrived at EDR: 06/10/2009  
Date Made Active in Reports: 07/08/2009  
Number of Days to Update: 28

	Data Release Frequency: Varies

## **State and tribal Brownfields sites**

### BEAP: Brownfields Environmental Assessment Program

The Brownfields Environmental Assessment Program (BEAP) was a federal program that assisted municipalities with Environmental Site Assessments (ESA's) for tax delinquent or bankrupt properties, or properties a local government acquired for redevelopment. Using federal dollars, site assessments were conducted by Department of Natural Resources (DNR) staff to determine if the properties were contaminated.

Date of Government Version: 12/31/2000	Source: Department of Natural Resources
Date Data Arrived at EDR: 05/29/2001	Telephone: 608-266-1618
Date Made Active in Reports: 06/29/2001	Last EDR Contact: 08/17/2009
Number of Days to Update: 31	Next Scheduled EDR Contact: 11/16/2009
	Data Release Frequency: No Update Planned

### BROWNFIELDS: Brownfields Site Locations Listing

A listing of brownfields sites included in the BRRTS database. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

Date of Government Version: 07/28/2009	Source: Department of Natural Resources

	Data Release Frequency: Quarterly

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/01/2008  
Date Data Arrived at EDR: 10/31/2008  
Date Made Active in Reports: 12/23/2008

	Data Release Frequency: Varies

## Records of Emergency Release Reports

### HMIRS: Hazardous Materials Information Reporting System

Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 03/31/2009	Source: U.S. Department of Transportation
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-366-4555
Date Made Active in Reports: 05/29/2009	Last EDR Contact: 09/11/2009
Number of Days to Update: 43	Next Scheduled EDR Contact: 10/12/2009
	Data Release Frequency: Annually

### SPILLS: Spills Database

A discharge of a hazardous substance that may adversely impact, or threaten to adversely impact public health, welfare or the environment. Spills are usually cleaned up quickly.

Date of Government Version: 07/28/2009	Source: Department of Natural Resources
Date Data Arrived at EDR: 07/30/2009	Telephone: 608-264-6009
Date Made Active in Reports: 08/10/2009	Last EDR Contact: 07/30/2009
Number of Days to Update: 11	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

### AG SPILLS: Agricultural Spill Cases

Spills reported to the Department of Agriculture, Trade & Consumer Protection. There are two types of spills. Long-term: These are mainly pesticide and fertilizer cases. Some might include other contaminants at the same site. Some might involve wood-treaters - which use pesticides. All of them involve spills of products, but these spills generally result from day to day use (chronic spills) rather than accidental spills (acute). Accidental: These are the acute spills of pesticides and fertilizers and only involve pesticides and fertilizers. Most of these are cleaned up and closed within 3 to 6 months.

## **Other Ascertainable Records**

### RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 04/23/2009	Source: EPA
Date Data Arrived at EDR: 04/28/2009	Telephone: 703-416-0223
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 09/28/2009
	Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 01/05/2009	Source: Department of Energy
Date Data Arrived at EDR: 05/07/2009	Telephone: 505-845-0011
Date Made Active in Reports: 05/08/2009	Last EDR Contact: 09/14/2009
Number of Days to Update: 1	Next Scheduled EDR Contact: 12/14/2009
	Data Release Frequency: Varies

## MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 02/19/2009	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 03/24/2009	Telephone: 303-231-5959
Date Made Active in Reports: 05/05/2009	Last EDR Contact: 09/18/2009
Number of Days to Update: 42	Next Scheduled EDR Contact: 12/21/2009
	Data Release Frequency: Semi-Annually

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2007	Source: EPA
Date Data Arrived at EDR: 04/09/2009	Telephone: 202-566-0250
Date Made Active in Reports: 06/17/2009	Last EDR Contact: 09/14/2009
Number of Days to Update: 69	Next Scheduled EDR Contact: 12/14/2009
	Data Release Frequency: Annually

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 07/14/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 10/12/2009
	Data Release Frequency: Every 4 Years

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act) FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/14/2009
	Data Release Frequency: Quarterly

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

**FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)**  
A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009	Source: EPA
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 09/10/2009
Number of Days to Update: 25	Next Scheduled EDR Contact: 12/14/2009
	Data Release Frequency: Quarterly

**HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing**

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008
	Data Release Frequency: No Update Planned

**HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing**

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 02/26/2009	Source: EPA
Date Data Arrived at EDR: 05/20/2009	Telephone: 202-566-0500
Date Made Active in Reports: 05/29/2009	Last EDR Contact: 08/05/2009
Number of Days to Update: 9	Next Scheduled EDR Contact: 11/02/2009
	Data Release Frequency: Annually

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/02/2009	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/24/2009	Telephone: 301-415-7169
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 06/29/2009
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/28/2009
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 04/28/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/29/2009	Telephone: 202-343-9775
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 07/28/2009
Number of Days to Update: 12	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/28/2009	Source: EPA
Date Data Arrived at EDR: 05/01/2009	Telephone: (312) 353-2000
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 09/18/2009
Number of Days to Update: 18	Next Scheduled EDR Contact: 12/28/2009
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Data Release Frequency: Biennially

## BRRTS: Bureau of Remediation & Redevelopment Tracking System

BRRTS is a tracking system of contaminated sites. It holds key information for finding out more about a site or an activity. Activity types included are: Abandoned Container - An abandoned container with potentially hazardous contents recovered from a site. No discharge to the environment occurs. If the container did release a hazardous substance, a spill would be associated with the site. Superfund - is a federal program created by Congress in 1980 to finance cleanup of the nation's worst hazardous waste sites. VPLE - Voluntary Property Liability Exemptions apply to sites in which a property owner conducts an environmental investigation and cleanup of an entire property and then receives limits on their future liability. General Property - Environmental actions which apply to the property as a whole, rather than a specific source of contamination, such as the LUST or environmental repair site. Examples would be off-site letters, municipal liability clarification letters, lease letters, voluntary party liability exemption actions, and general liability clarification letters.

## DRYCLEANERS: Five Star Recognition Program Sites

Drycleaning facilities enrolled in the Five Star Recognition Program. The primary focus of the Five Star program is to encourage reductions in the use and emissions of perchloroethylene (perc), a common but potentially hazardous drycleaning solvent. Participating cleaners pursue recycling opportunities, spill prevention strategies, more efficient solvent use, and more wet cleaning to reduce their perc consumption.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2006

Telephone: 608-266-9314

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Universal Tranverse Mercator:	Zone 16
UTM X (Meters):	425666.6
UTM Y (Meters):	4765923.5
Elevation:	590 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	43087-A8 MILWAUKEE, WI
Most Recent Revision:	1971

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General West

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u> MILWAUKEE, WI	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
--	---

Flood Plain Panel at Target Property: 5502780005B

Additional Panels in search area: 5502780012B  
5502780004B  
5502780013C

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> NOT AVAILABLE	<u>NWI Electronic Data Coverage</u> Not Available
---	--

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### **Site-Specific Hydrogeological Data\*:**

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles WSW
Site Name:	Geuder Parschke & Frye Co Gpf
Site EPA ID Number:	WID006080741
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	In general, approximately 120 feet, but as shallow as 70 feet to 80 feet.
Hydraulic Connection:	Sand, gravel, and clay deposits overlie the surficial aquifer.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

For additional site information, refer to Physical Setting Source Map Findings.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

Era:	Paleozoic
System:	Devonian
Series:	Middle Devonian
Code:	D2 <i>(decoded above as Era, System &amp; Series)</i>

#### **GEOLOGIC AGE IDENTIFICATION**

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

---

#### Soil Map ID: 1

Soil Component Name: Unmapped area

Soil Surface Texture:  
Hydrologic Group: Not reported

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

---

#### Soil Map ID: 2

Soil Component Name: Water

Soil Surface Texture:  
Hydrologic Group: Not reported

Soil Drainage Class:  
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

---

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Dec latlong datum:	NAD83	District:	55
State:	55	County:	079
Country:	US	Land net:	NENES29 T007N R022E 4
Location map:	MILWAUKEE	Map scale:	24000
Altitude:	640.00		
Altitude method:	Interpolated from topographic map		
Altitude accuracy:	25		
Altitude datum:	National Geodetic Vertical Datum of 1929		
Hydrologic:	Milwaukee, Wisconsin. Area = 861 sq.mi.		
Topographic:	Not Reported		
Site type:	Ground-water other than Spring	Date construction:	Not Reported
Date inventoried:	Not Reported	Mean greenwich time offset:	CST
Local standard time flag:	Y		
Type of ground water site:	Single well, other than collector or Ranney type		
Aquifer Type:	Not Reported		
Aquifer:	Not Reported		
Well depth:	308	Hole depth:	308
Source of depth data:	Not Reported		
Project number:	Not Reported

Basement	0.500 pCi/L	100%	0%	0%

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Wisconsin Well Construction Report File

Source: Department of Natural Resources

Telephone: 608-266-0153

## OTHER STATE DATABASE INFORMATION

### RADON

#### State Database: WI Radon

Source: Department of Health & Family Services

Telephone: 608-266-1865

Wisconsin Measurement Summary

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

## 2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

**City Directory Report.** Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

**Options for Selecting Adjoining Properties.** Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit [www.edrnet.com/2009enhancements](http://www.edrnet.com/2009enhancements)

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2003. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. An aerial photograph of a city grid, likely from 1981. A red arrow points from a red-bordered box containing the text 'SUBJECT PROPERTY' to a specific location on the map. The map shows a dense grid of streets and buildings, with a prominent blue line (possibly a canal or river) winding through the center. The overall color palette is muted, with greys, blues, and earth tones.

## **Certified Sanborn® Map Report Enhancements for 2009**

The accompanying Certified Sanborn Map Report reflects a number of enhancements that make it easier for you to review these historical maps. EDR has digitally joined together the more than one million fire insurance maps from the Sanborn Library collection so that your target property is centered, making it easier for you to review adjoining properties. Here is a list of the new features:

- Your target property is centered on each map. You can quickly locate your target property and view adjoining properties. Plus, adjoining properties are included more often, reducing your need to refer to additional maps.
- All maps are now displayed at a uniform scale. This makes it easier for you to view changes to the property over time.
- We've increased coverage by adding thousands of new maps from 40 cities for years 1994-2007.
- A new Map Key and Sheet Thumbnails let you reference sheet numbers, year and volume of original Sanborn Map panels used for this report.

For more information about the new enhancements to the Certified Sanborn Map Report, contact your EDR representative at 800-352-0050.

This Indenture, Made this 16th day of January, A. D., 1932, between Frank Zelesnik and Frances Zelesnik, his wife,

and City of Milwaukee, a municipal Corporation duly organized and existing under and by virtue of the laws of the State of Wisconsin, located at Milwaukee, Wisconsin, party of the second part.

Witnesseth, That the said part 1st of the first part, for and in consideration of the sum of One Dollar and other valuable consideration to them in hand paid by the said party of the second part, the receipt whereof is hereby confessed and acknowledged, have given, granted, bargained, sold, remised, released, aliened, conveyed and confirmed, and by these presents do give, grant, bargain, sell, remise, release, alien, convey and confirm unto the said party of the second part, its successors and assigns forever, the following described real estate, situated in the County of Milwaukee and State of Wisconsin, to-wit: Lots thirteen (13) and fourteen (14), in block two (2), Arlington Heights, in the south-

west quarter (S.W. 1/4) of section thirty-six (36), town seven (7), north, range twenty-one (21) east, also known as 803 S. Thirty-fifth Street, in the City of Milwaukee, County of Milwaukee, State of Wisconsin.

Together with all and singular the hereditaments and appurtenances thereunto belonging or in any wise appertaining; and all the estate, right, title, interest, claim or demand whatsoever, of the said part 1st of the first part, either in law or equity, either in possession or expectancy of, in and to the above bargained premises and their hereditaments and appurtenance.

To have and to hold the said premises as above described with the hereditaments and appurtenances, unto the said party of the second part and to its successors and assigns FOREVER.

And the said Frank Zelesnik and Frances Zelesnik, his wife

for themselves, their heirs, executors and administrators, do covenant, grant, bargain and agree to and with the said party of the second part, its successors and assigns, that at the time of the encasing and delivery of these presents, they are well seized of the premises above described, as of a good, sure, perfect, absolute indefeasible estate of inheritance in the law, in fee simple, and that the same are free and clear from all incumbrances whatever,

and that the above bargained premises in the quiet and peaceable possession of the said party of the second part, its successors and assigns, against all and every person or persons lawfully claiming the whole or any part thereof, they will forever WARRANT AND DEFEND.

In Witness Whereof, the said part 1st of the first part has hereunto set their hand and seal this 16th day of January, A. D., 1932.

Signed and Sealed in Presence of Alvin Zelesnik, Harold M. Burdick, Frank Zelesnik, Frances Zelesnik

State of Wisconsin, Milwaukee County. Personally came before me, this 16th day of January, A. D., 1932, the above named Frank Zelesnik and Frances Zelesnik, his wife

Received for Record this 10 day of Feb. A. D., 1932, at 9:20 o'clock A.M. Phillip G. Westfahl, Register. Notary Public, Milwaukee, Wis. My Commission expires Jan. 15, A. D., 1935.

Approved as to form and execution this 16 day of Jan. 1932. C. H. Smith, Asst. City atty.

This Indenture, Made this 19th day of January, A. D., 1932, between Nathaniel Greene and Harriet Greene, his wife,

and City of Milwaukee a Municipal Corporation duly organized and existing under and by virtue of the laws of the State of Wisconsin, located at Milwaukee, Wisconsin, party of the second part.

Witnesseth, That the said part 1st of the first part, for and in consideration of the sum of One Hundred Dollars (\$100.00) to them in hand paid by the said party of the second part, the receipt whereof is hereby confessed and acknowledged, have given, granted, bargained, sold, remised, released, aliened, conveyed and confirmed, and by these presents do give, grant, bargain, sell, remise, release, alien, convey and confirm unto the said party of the second part, its successors and assigns forever, the following described real estate, situated in the County of Milwaukee and State of Wisconsin, to-wit: Lots numbered One (1) and Two (2) in Block numbered Forty-nine (49), and Lots numbered

Six (6), Seven (7), Eight (8), Nine (9), Ten (10), and Eleven (11), in Block numbered Fifty (50) in Lot numbered One (1) of the Northeast Fractional Quarter of Section Numbered Twenty-nine (29) in Township Seven (7) North, of Range Twenty-two (22) East, in the Third Ward of the City of Milwaukee.

Together with all and singular the hereditaments and appurtenances thereunto belonging or in any wise appertaining; and all the estate, right, title, interest, claim or demand whatsoever, of the said part 1st of the first part, either in law or equity, either in possession or expectancy of, in and to the above bargained premises and their hereditaments and appurtenances.

To have and to hold the said premises as above described with the hereditaments and appurtenances, unto the said party of the second part and to its successors and assigns FOREVER.

And the said Nathaniel Greene and Harriet Greene, his wife

for themselves, their heirs, executors and administrators, do covenant, grant, bargain and agree to and with the said party of the second part, its successors and assigns, that at the time of the encasing and delivery of these presents, they are well seized of the premises above described, as of a good, sure, perfect, absolute indefeasible estate of inheritance in the law, in fee simple, and that the same are free and clear from all incumbrances whatever, except Municipal Ordinances.

and that the above bargained premises in the quiet and peaceable possession of the said party of the second part, its successors and assigns, against all and every person or persons lawfully claiming the whole or any part thereof, they will forever WARRANT AND DEFEND.

In Witness Whereof, the said part 1st of the first part has hereunto set their hand and seal this 19th day of January, A. D., 1932.

Signed and Sealed in Presence of Harriet Souler, Virginia C. Bruce, Nathaniel Greene, Harriet Greene

State of Wisconsin, Milwaukee County. Personally came before me, this 19th day of January, A. D., 1932, the above named Nathaniel Greene and Harriet Greene, his wife

Received for Record this 10 day of Feb. A. D., 1932, at 9:20 o'clock A.M. Phillip G. Westfahl, Register. Notary Public, Milwaukee, Wis. My Commission expires Sept. 24, A. D., 1933.

Approved as to form and execution this 19 day of Jan. 1932. C. H. Smith, Asst. City atty.

## **APPENDIX G**

User Questionnaire

PHASE I ENVIRONMENTAL SITE ASSESSMENT  
USER QUESTIONNAIRE

---

To: Karen Dettmer

---

From: Mat Reimer

---

Date: 9/18/09

---

RE: 1027 N. Edison Street, Milwaukee, WI

---

Project Number: 11851

---

Thank you for allowing Sigma Environmental Services, Inc. (Sigma) the opportunity to provide you with environmental consulting services in relation to the contracted Phase I Environmental Site Assessment. In accordance with the ASTM 1527-05 standard and in order to provide the requisite service in the most efficient manner, we ask that the following information be provided for the property. Should the information not be available to you at this time, please disregard the question and return the completed questionnaire to my attention at Sigma.

(1) Is the complete and correct address for the property available? Is a map or other documentation available showing property location and boundaries? Please provide each, as available.

yes, map previously provided.

(2) What type of property transaction?

RACM acquisition

(3) Are you aware of any environmental cleanup liens against the *property* that are filed or recorded under federal, tribal, state or local law?

NO

(4) Are you aware of any AULs, such as *engineering controls*, land use restrictions or *institutional controls* that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

NO

(5) As the *user* of this *ESA* do you have any specialized knowledge or experience related to the *property* or nearby properties? For example, are you involved in the same line of business as the current or former *occupants* of the *property* or an adjoining *property* so that you would have specialized knowledge of the chemicals and processes used by this type of business?

NO

(6) Does the purchase price being paid for this *property* reasonably reflect the fair market value of the *property*? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the *property*?

yes

(7) Are you aware of commonly known or *reasonably ascertainable* information about the *property* that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

- (a.) Do you know the past uses of the *property*?
- (b.) Do you know of specific chemicals that are present or once were present at the *property*?
- (c.) Do you know of spills or other chemical releases that have taken place at the *property*?
- (d.) Do you know of any environmental cleanups that have taken place at the *property*?

information provided as Phase I completed by City of Milwaukee

(8) As the *user* of this *ESA*, based on your knowledge and experience related to the *property* are there any *obvious* indicators that point to the presence or likely presence of contamination at the *property*?

Phase II indicates contamination

(9) Are you aware of 1) any pending, threatened or past litigation relevant to hazardous substances or petroleum products in, on or from the *property*; 2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the *property*; and 3) any notices from any governmental entity regarding any possible violation or environmental laws or possible liability relating to hazardous substances or petroleum products?

NO

(10) Do you know if any of the following documents exist and, if so, can you provide copies of the documents: 1) environmental site assessment reports; 2) environmental compliance audit reports; 3) environmental permits (for example, solid waste disposal permits, hazardous waste disposal permits, wastewater permits, NPDES permits, underground injection permits); 4) registrations for underground and aboveground storage tanks; 5) registrations for underground injection systems; 6) material safety data sheets; 7) community right-to-know plan; 8) safety plans; preparedness and prevention plans; spill prevention, countermeasure, and control plans; etc.; 9) reports regarding hydrogeologic conditions on the *property* or surrounding area; 10) notices or other correspondence from any governmental agency relating to past or current violations of environmental laws with respect to the *property* or relating to environmental liens encumbering the *property*; 11) hazardous waste generator notices or reports; 12) geotechnical studies; 13) risk assessments; or 14) recorded AULs?

- 1) previously provided.
- 2) conducted by Sigma

(11) Please identify all of the parties who must be able to rely on the Phase I Report.

Redevelopment Authority of the City of Milwaukee

(12) Is the site contact known and how can he/she be reached?

## **APPENDIX H**

Owner Questionnaire

**PHASE I ENVIRONMENTAL SITE ASSESSMENT  
QUESTIONNAIRE**

This questionnaire has been adopted from the ASTM Standard for Environmental Site Assessments E1527-00 and E1528-00. Sigma Environmental Services, Inc. (Sigma) asks that each of the following questions be answered to the best of your knowledge and in good faith.

**Description of Property**

Address: 1027 N Edison St  
Property Size: 0.46 Acres 19,985 Square Feet

1. Is/was the property used for industrial purposes? Is/was any adjoining property used for an industrial purpose? If yes, please specify industry/processes and location on or adjacent to the subject property.

yes, property was associated with  
coal storage operations

2. Is/was the property used for gasoline stations, motor repair facilities, commercial printing facilities, dry cleaners, photo developing laboratories, junkyards, landfills, waste treatment, storage and disposal facilities, or recycling facilities? Is/was any adjoining property used for the purposes noted above? If yes, please specify use and site location.

see above #1. site has been filled.

3. Are there any damaged or discarded automobiles, industrial batteries, pesticides, paints, or other chemicals in individual containers of greater than five (5) gallons or fifty (50) gallons in aggregate, stored or used on the property? Have they been used or stored on the property in the past? If yes, please specify material/chemical, storage and use location.

Not to my knowledge

- 4. Are there any industrial drums or sacks of chemicals stored on the property? Have any been stored in the past? If yes, please list chemicals stored and their storage location.

Not to my knowledge

- 5. Are there any registered or unregistered storage tanks (above or under ground) located on the property? Were any located on the property in the past? If yes, please indicate location, size, contents and status. Also, indicate the method for filling and emptying the tank(s).

Not to my knowledge

- 6. Has any fill material been placed on the property? Did the fill material originate from a contaminated or unknown site? Has foundry sand been brought onto the property? If yes, please indicate type of fill and location on property.

yes, Phase II shows fill material. Origin of fill material is unknown.

- 7. Are there any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal? Were any previously located on the property? If yes, please specify treatment or disposal and location on-site.

no

- 8. Is there currently any stained soil on the property? Was there in the past? If yes, please identify location, source and remedial efforts performed, if any.

unknown

9. Are there any vent pipes, fill pipes or access ways indicating a fill pipe protruding from the ground on the property or any adjacent properties? Were there any in the past? If yes, please indicate location and source, if known.

unknown

10. Is there currently any evidence of leaks, spills or stains by substances other than water, or foul odors, associated with any flooring, drains, walls ceilings or exposed grounds on the property? Were there any in the past? If yes, please note location and any potential source.

unknown

11. Is/was the property serviced by a private or public well? Have/were contaminants been identified in the well or system which exceed applicable water guidelines or has the well been designated as contaminated by any governmental/health agency? If yes, please identify regulatory agency and known contaminants.

no

12. Do you, the owner or occupant, have knowledge of any past or present environmental liens or governmental notifications relating to past or recurrent violations of environmental law? If yes, please specify liens, notifications, or violations.

no

13. Do you, the owner or occupant, have knowledge of the past or current existence of hazardous substances or petroleum products on the property or of any environmental violations with respects to these substances? If yes, please specify substance, products, locations or violations.

Known contamination in soil and groundwater

14. Do you, the owner or occupant, have any knowledge of any past environmental site assessments that indicated the presence of hazardous substances or petroleum products on the property, or the contamination of the property, which recommended a further assessment? Please provide copies of all previous environmental site assessment reports.

previously provided

15. Do you, the owner or occupant, have any knowledge of past, present, or threatened lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum product on or involving the property? If yes, please identify lawsuit plaintiff/defendant or administrative agency in addition to date of release and release material.

no

16. If applicable, do you the owner or occupant, have any knowledge that the actual purchase price of the property is significantly less than comparable properties. If yes, please provide an explanation of the lower price.

no

17. Does/did the property discharge waste water, other than sanitary waste or storm water, onto or adjacent to the property? To a storm water system? To a sanitary sewer? If yes, please identify water source and discharge location.

unknown

18. Are/were any hazardous substances, petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials dumped above grade, buried, and/or burned on the property? If yes, please indicate type of substance, material, or waste, and location on property.

unknown

---

---

---

---

19. Is/were there any transformers, capacitors, or any hydraulic equipment for which there are any records indicating the presence of PCBs? If yes, please indicate location of unit, level of PCBs, and status.

unknown

---

---

---

---

20. Has asbestos or asbestos-containing building materials been identified on the property? If yes, please indicate type, amount, and location of asbestos or asbestos-containing building material. If removed, please provide abatement contractor name, amount and type removed, and disposal location.

unknown

---

---

---

---

21. If the property is agricultural, please identify all pesticide and/or herbicide products used on the property in addition to their storage, mixing, and use locations.

NA

---

---

---

---

22. Do you have any knowledge of the property being included on any of the following lists?

## **APPENDIX I**

Previous Environmental Reports

## MEMORANDUM

---

**To:** Dan Casanova

**CC:** Dave Misky  
Bunkie Miller

**From:** Karen Dettmer ↵

**Date:** July 12, 2007

**Subject:** Phase I Environmental Site Assessment for 1027 N. Edison St.

---

Dan,

Per your request, I have reviewed the July 25, 2000 (revised August 1, 2000) Phase I Environmental Site Assessment (ESA) for 1027 North Edison Street. The Phase I ESA identified former uses of the site as recognized environmental concerns (RECs), including a portion of a coal yard, and a second hand materials yard. Based on these historical uses, a Phase II Environmental Site Assessment was recommended.

I have reviewed state and federal databases and City of Milwaukee records to evaluate whether the environmental status or condition of the site has likely changed since the date of the Phase I ESA. Review of such records did not reveal any significant alterations that may have resulted in increased environmental liability associated with the site. As such, the information presented in the July 25, 2000 (revised August 1, 2000) Phase I ESA remains current and no additional information is available that may significantly alter the conclusions and recommendations presented therein.

Please feel free to let me know if you have questions or require further information.

**PHASE I ENVIRONMENTAL SITE ASSESSMENT OF  
1027 NORTH EDISON STREET  
MILWAUKEE, WISCONSIN**

**PHASE I ENVIRONMENTAL ASSESSMENT OF  
1027 N. EDISON STREET  
MILWAUKEE, WISCONSIN**

**EXECUTIVE SUMMARY**

**I. PURPOSE**

This Phase I Environmental Site Assessment (ESA) of 1027 N. Edison St. was conducted at the request of Mr. Greg Shelko, Assistant Director, Redevelopment Authority of the City of Milwaukee (RACM). The property is a paved, City-owned parking lot and pedestrian right-of-way (ROW) associated with the “riverwalk.” For the sake of brevity and convenience, we will refer to the property as the “project site,” unless otherwise noted. The project site is located in downtown Milwaukee and is generally bounded by residential condominiums to the north, N. Edison St. to the east, E. State St. to the south, and the Milwaukee River to the west. (Map 1)

We understand that RACM is negotiating with a developer for the possible purchase and development of the project site, for a 25-story residential high-rise that would include 38 condominium units.

**II. SUMMARY OF FINDINGS, CONCLUSIONS, AND RECOMMENDATIONS**

**A. SUMMARY**

1. The project site is a paved, City-owned parking lot and pedestrian ROW located at 1027 N. Edison St. The lot size is approximately 18,950-sq. ft. or 0.4 acre. The property is zoned “C9BA” or Residential and Specialty Use. It is located in downtown Milwaukee.
2. The historical land uses of the project site included, but were not limited to, commercial uses. Selected land uses that raised potential environmental concerns are bolded. (ROW, wood yard, **a portion of a coal yard**, parking lot, snow dump, playground, and a 2<sup>nd</sup> **hand materials yard**)
3. The following are relevant historical land uses of selected properties adjacent to the project site. Selected land uses that raised potential environmental concerns are bolded. (**coal yard**, hotel, sheds, sausage factory, **Edison Electric Illuminating Co.**, **fur cleaning and dyeing**, offices, parking lot, **auto garage**, **auto repair**, floral supplies, **roofing company**, wholesale florist, **auto painting**, **junk shop**, tea co., **moving van parking**, **chemical manufacturer**, **service garage**, pharmaceutical mfr., **WEPCO heating plant**, gas station, **TMER & LCo. Heating Division**, real estate office, **auto parts**, electrical contractor, **printing co.**, apron mfr., sign co., **general plastics mfr.**, electrical supply, furniture mfr., shoe manufacturing supplies, **City trucking yard**, **City yard**, cement contractors, wholesale salvage, blacksmiths shop, performing arts

Summary (cont'd)

center, performing art pavilion, **lawn mower mfr., piston & pins co., offset plating mfg., cab co., transportation oil co.,** amusements co., vending machines, **cleaning supplies mfr., novelty co.,** flavor extracts, pottery co., brewery, **photographer, wax co., used cars, tire store,** warehouse, uniform manufacturer, and City Hall.

4. A review of WDNR, USEPA, and City of Milwaukee's Health Department, Assessor's Office, and Department of City Development (DCD) records did not indicate any relevant open or closed files within the project site.

5. The project site is not located in a wetland. The project site is located within a highly developed environmental corridor, and a portion of the site is within a 500-year floodplain.

6. According to the City's Historic Preservation staff, the project site (1027 N. Edison St.) is neither listed in the National Register of Historic Places, nor has it received local historical designation. Projects involving the project will not impact on any National Registered or locally designated sites or districts. **(Attachment B)**

## **B. CONCLUSIONS**

1. The present land uses (parking lot, pedestrian ROW, and an occasional "snow dump") of the project site did not raise any potential environmental concerns. However, selected historical land uses of the project site (a portion of a coal yard, and a 2<sup>nd</sup> hand materials yard) may raise potential environmental concerns, because these activities may have involved the use, storage, handling, generation, and disposal of hazardous materials or hazardous wastes.

2. Selected historical land uses of adjacent properties (e.g., auto repair garage, DPW ward yard, chemical manufacturer, coal yard, roofing company, concrete yard, furniture manufacturer, etc.) also raised potential environmental concerns.

3. Confirmation of the environmental conditions of the property will involve groundwater and soil sampling and laboratory analyses.

## **C. RECOMMENDATIONS**

1. Based on the available historical land use information regarding the project site, and its intended reuse, we recommend a limited Phase II site assessment.

2. In addition, as a precaution, any land disturbing activity (e.g., soil boring, grading, construction, etc.) should be preceded by a comprehensive and systematic search for underground storage tanks and utility mains and fixtures. Confirmation efforts (e.g., additional record searches, and/or backhoe excavations) should be conducted to investigate suspected tanks.

Recommendations (cont'd)

- a. If found, the contents of underground storage tanks should be sampled and tested for potential reuse, recycling or disposal, according to State regulations.
- b. If found, all abandoned tanks should be properly removed, and a site assessment conducted, according to existing WDNR regulations. The tanks should also be registered with the Wisconsin Department of Commerce (DCOMM)

RNS/MFH/BMT  
City of Milwaukee  
725/00 (Revised 8/1/00)

**PHASE I ENVIRONMENTAL SITE ASSESSMENT OF  
1027 NORTH EDISON STREET  
MILWAUKEE, WISCONSIN**

**I. PURPOSE**

This Phase I Environmental Site Assessment (ESA) of 1027 N. Edison St. was conducted at the request of Mr. Greg Shelko, Assistant Director, Redevelopment Authority of the City of Milwaukee (RACM). The property is a paved, City-owned parking lot and pedestrian right-of-way (ROW) associated with the “riverwalk.” For the sake of brevity and convenience, we will refer to the property as the “project site,” unless otherwise noted. The project site is located in downtown Milwaukee and is generally bounded by residential condominiums to the north, N. Edison St. to the east, E. State St. to the south, and the Milwaukee River to the west. (Map 1)

We understand that RACM is negotiating with a developer for the possible purchase and development of the project site, for a 25-story residential high-rise that would include 38 condominium units.

The purpose of this Phase I ESA is to identify potential environmental concerns associated with the past and present land uses of the properties within the project site, and its immediate neighbors.

**II. PROCEDURES**

This Phase I Environmental Assessment involved the following activities:

1. Detailed Site History Review:

- a. Review of the Wright’s City Directories (1935-1990) to determine the land use history of the project site and adjacent properties
- b. Review of the Polk City Directories (1993 & 2000) to determine current land uses of the project site and adjacent properties
- c. Review of available Sanborn Fire Insurance Maps and Rascher’s Fire Insurance Atlases
- d. Review of available SEWRPC aerial photographs
- e. Review of City of Milwaukee records and files from the Health Department, Department of Neighborhood Services (fka Building Inspection), the Department of City Development, and the City of Milwaukee Assessor’s Office
- f. Review of any record and/or files that the Real Estate Specialist or RACM may have regarding the project site

Phase I: 1027 N. Edison Street, Milwaukee, Wisconsin  
Procedures (cont'd)

2. Detailed Review of Wisconsin Department of Natural Resources (WDNR), Wisconsin Department of Commerce (WDOC), and the United States Environmental Protection Agency (EPA) Records:

- a. Leaking Underground Storage Tanks (LUSTs) at or near the project site
- b. Hazardous Material Spills or Releases at or near the project site
- c. Sites listed on the EPA's Comprehensive Environmental Response Compensation Liability Information Systems (CERCLIS) at or near the project site
- d. Waste Disposal Sites at or near the project site
- e. Properties in the Superfund or National Priorities List (NPL) at or near the project site
- f. Sites listed in the WDNR Emergency Response and Repair Program (ERRP's) Case Tracking System for facilities at or near the project site

3. Detailed Physical Inspection of the Project Site:

- a. Presence of distressed vegetation or discolored soils
- b. Evidence of chemical contamination and/or unreported spills
- c. Evidence of filling or dumping activity
- d. Location of project area in relation to 100-year floodplain, environmental corridor, and/or wetland
- e. Presence of active or abandoned barrels, drums, and/or tanks

4. Examination of Adjacent Properties for:

- a. Presence of distressed vegetation or discolored soils
- b. Evidence of filling or dumping activity
- c. Presence of active or abandoned barrels, drums, and/or tanks

**III. FINDINGS**

**A. PROJECT SITE HISTORY AND OVERVIEW**

1. The project site consists of a single parcel which is currently being used as a City –owned parking lot and pedestrian ROW. The City of Milwaukee acquired the property in 1932 and has used the site occasionally as a “snow dump.” According to City of Milwaukee plat maps, the project site consists of a vacated ROW and three (3) original parcels that currently share a common address and Tax Key #. (Map 2)

2. The following table presents relevant data pertaining to the project site:

<u>Address</u>	<u>Tax Key #</u>	<u>Lot Size</u>	<u>Zoning</u>	<u>Owner</u>
1027 N. Edison St.	392-1177-100-7	18,950-sq. ft.	C9BA	City of Milwaukee

The lot size of the property is approximately 0.4 acre. The property is zoned “C9BA” or Residential and Specialty Use.

3. The project site is situated on a relatively level block. City staff believes surface runoff in the project site drains directly into the Milwaukee River or the storm sewer system of the Metropolitan Milwaukee Sewerage District (MMSD). The direction of the groundwater flow in the area is not known at this time. However, it may be toward the west, i.e., toward the Milwaukee River, immediately to the west of the project site.

**B. HISTORIC LAND USES**

This section presents the historical land uses of the project site, according to the: (1) Wright’s City Directories (1935-1998); (2) Rascher’s Fire Insurance Atlas; (3) Sanborn Fire Insurance Maps; (4) 1920 Land Use Map; (5) 1945 Central Business District Land Use Map; and (6) SEWRPC Aerial Photographs

**1. There are no entries in the **Wright’s City Directories** (1935-1990) or **Polk City Directories** (1993 & 2000) for the project site (1027 N. Edison Street).**

**2. 1876 and 1888 Rascher’s Fire Insurance Atlas**

An 1876 and an 1888 Rascher’s Fire Insurance Atlas both show the northern 1/3 of the project site was Johnson St. (a dead-end ROW that has since been vacated). Two coal elevators were located along the north side of Johnson St. City staff believes that the elevators supplied the RP Elmore Coal Co.’s “covered coal shed” located directly north of the project site. A portion of the coal elevators may have been located partially on the site. The southern 2/3 of the project site was the “RP Elmore & Co. wood yard.” A building labeled “wood splitting” was located along the south side of Johnson St. The project site was generally bounded by the “RP Elmore Coal Co. covered coal shed” to the north, River St. (nka N. Edison St.) and mixed-use

**Phase I: 1027 N. Edison Street, Milwaukee, Wisconsin  
Rascher's Insurance Atlases (cont'd)**

commercial/residential buildings to the east, "Struch Bros. wood yard" and "Coorse Bros. Roofers" were located to the south, and the Milwaukee River was to the west of the project site.

**3. Sanborn Fire Insurance Maps**

- a. An 1894 Sanborn Fire Insurance Map (with updates through 1809) shows the northern 1/3 of the project site was occupied by Johnson St. (a dead-end ROW). A "fire boat connection with a 10-inch wide pipe" ran underneath Johnson St. (from east to west). The southern 2/3 of the site was vacant. However, during the process of updating the map, a "woodpile" and an unspecified structure were covered up (which signifies that they were removed from the site or razed). The woodpile and unspecified structure were located near the southeastern corner of the site. The project site was bounded by the "RP Elmore Coal Co. covered coal shed" to the north, mixed-use commercial/residential buildings to the east, the "Struch Bros. wood yard" and the "Coorse Bros. Roofers" to the south, and the Milwaukee River to the west.
- b. A 1910 Sanborn Fire Insurance Map (with updated information through 1926) showed the northern 1/3 of the site was occupied by Johnson St., a dead end ROW, and the southern 2/3 of the site was labeled "2<sup>nd</sup> Hand Materials Yard" and contained a small "office" and one small unspecified structure on the western edge of the property. The project site was generally bounded by vacant land to the north, Edison St. and mixed-use commercial/residential dwellings to the east, the W.R. Sherin Co. (auto repair and painting) to the south, and the Milwaukee River to the west.
- c. A 1969 Sanborn Fire Insurance Map shows the project site was vacant. The northern portion of the site was labeled "parking," while the southern portion was unspecified. The project site was surrounded the following land uses: parking to the north, an "open deck parking garage" to the east, a "wholesale florist" shop to the south, and the Milwaukee River to the west. (Map 3)

**4. 1920 Land Use Map**

A 1920 Land Use Map shows the project site was vacant. The project site was surrounded by the following land uses: vacant land to the north, River St. (nka N. Edison St.) a junk shop, tea co., hotel, and mixed-use commercial residential structures to the east, a single-story "shop" and Martin St. (nka E. State St.) to the south, and the Milwaukee River to the west.

**Phase I: 1027 N. Edison Street, Milwaukee, Wisconsin  
Historical Land Uses (cont'd)**

**5. 1945 Central Business District (CBD) Land Use Map**

A 1945 CBD Land Use Map shows the project site was vacant. The project site was surrounded by the following land uses: a “shed,” and vacant land to the north, a chemical manufacturer, moving storage building, moving van parking, and a hotel to the east, an auto service garage and parking lot to the south, and the Milwaukee River to the west.

**6. SEWRPC Aerial Photographs**

The following SEWRPC aerial photographs for the general area show the land uses at the project site, for selected years. Note: Staff was unable to positively identify all of the relevant features in the aerial photographs because of poor resolution.

Year                      Site Description/Comments

1948                      A 1948 aerial photograph of the project site and the surrounding area shows the project site was used as a parking lot. A small, unspecified building, which fronted onto N. Edison St., was located in the southern portion of the property. The project site was generally bounded by parking/vacant land to the north, mixed-use commercial/residential buildings to the east, a large building and a parking lot to the south, and the Milwaukee River to the west.

1958                      A 1958 aerial photograph of the project site and surrounding area shows the project site was occupied by four small, unidentified structures. The northern portion of the site was vacant, and the southern portion was occupied by one small structure fronting onto N. Edison St., and three small structures along the Milwaukee River. The project site was generally bounded by vacant land to the north, mixed-use commercial/residential buildings to the east, a large building and parking lot to the south, and the Milwaukee River to the west.

**C. ADJACENT SITES' PAST AND PRESENT USES**

1. The following adjacent land uses currently exist within the general project area. The adjacent land uses are generally commercial/residential in character.

Glossary of Environmental Terms and Acronyms: Gasoline Range Organics (GRO), Diesel Range Organics (DRO), Volatile Organic Compounds (VOC), Polynuclear Aromatic Hydrocarbons (PAH), Polychlorinated Biphenyls (PCBs), Cyanides (CN).

<u>Address</u>	<u>Occupant/Land Use</u>	<u>Years</u>	<u>Potential Concern</u>
1001 N. Water St.	City Parking Structure	1965-present	
1005 N. Edison St.	Wholesale Florist	1955-present	
1122 N. Edison St.	Riverhouse Restaurant	1997-present	
1101-47 N. Edison St.	Riverhouse Condominiums	1984-present	

**Phase I: 1027 N. Edison Street, Milwaukee, Wisconsin**  
**Adjacent Land Uses (cont'd)**

2. According to the Wright's City Directories (1935-1990) and the Polk City Directories (1993 & 2000), the following are the historical land uses of properties adjacent to the project site. The land uses that raise potential environmental concerns are asterisked (\*) because they may have used, handled, stored, generated, treated or disposed of hazardous materials or hazardous wastes.

Note: For the sake of efficiency and brevity, the specific years when properties were indicated in the Wright's City Directories and/or Polk Directory either as "not listed," "vacant," "not verified," or "no return" will not be presented below. However, the complete historical land use information for the properties is available for inspection at the Department of City Development, Environmental Planning Division.

3. Sites listed in the US EPA's Comprehensive Environmental Response Compensation Liability Information Systems (CERCLIS) located in or near the project site, Milwaukee, Wisconsin According to a May 1993 US EPA Regulatory Listing, there were three (3) such sites or facilities within a radius of one (1) mile of the project site. This is presented only of the sake of complete information.

<u>Site Name</u>	<u>Street Address</u>	<u>Comments</u>
* Aldrich Chemical Co.	940 W. St. Paul Ave.	Active Facility
* JG Milligan & Co., Inc.	101 S. 2 <sup>nd</sup> St.	John Komevies – owner
* Milwaukee Road Muskego Yd.	433 W. St. Paul Ave.	Active Rail Facility

Addresses with an asterisked (\*) have been removed as of May 5, 1995, from the Superfund (CERCLIS) Inventory. No further remedial action is planned for these sites under the Superfund statutes. It does **not** mean, however, that the sites are clean.

4. Waste Disposal Sites in or near the project site, Milwaukee, Wisconsin

(Note: According to a June 1993 WDNR Regulatory Listing, there was one (1) Waste Disposal site located within a radius of one mile of the project site.) This is presented only of the sake of complete information.

<u>Site Name</u>	<u>Street Address</u>	<u>Comments</u>
Framatized Steel Co.	260 N. 12 <sup>th</sup> St.	Not Available

6. Superfund or NPL Sites in or near the project site, Milwaukee, Wisconsin

(Note: There are NO Superfund or NPL Sites within a one-mile radius of the project site, Milwaukee, Wisconsin)

7. Wisconsin DNR Emergency Response and Repair Program (ERRPs) Facilities in or near the project site, Milwaukee, Wisconsin

(Note: According to an October 1997 WDNR Regulatory Listing, the following are ERRP sites within a ½-mile radius of the project site. There is NO such facility within the project site.) This is presented only for the sake of complete information.

**Phase I: 1027 N. Edison Street, Milwaukee, Wisconsin

10/12/84	1144 N. Edison St.	Installed (2) Gas Furnaces and A/C

**F. REVIEW OF SOUTHEASTERN WISCONSIN REGIONAL PLANNING COMMISSION (SEWRPC) RECORDS:**

1. The project site is NOT located in a designated wetland.
2. The project site IS located in an environmental corridor. However, this portion of Milwaukee is highly developed and is part of the Central Business District.

**G. REVIEW OF FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA) RECORDS:**

1. The project site is NOT located in a 100-year floodplain. (Source: FEMA Panel #12; March 1, 1982.) Note: The project site is adjacent to the Milwaukee River Waterway. The northwestern corner of the project site is located within a 500-year floodplain.

**IV. OTHER RELEVANT OBSERVATIONS**

1. According to the Open Records Clerical Assistant at the DNR, there are no registered Federal Identification (FID) and/or Wisconsin Identification (WID) numbers for the project site. This means that the property is not officially registered as a significant generator of air emissions, water effluent, or solid waste.

2. An 1845 plat map and an 1855 land use map (Map 4) show the project site was located on a peninsula between with the Milwaukee River to the west and the river inlet to the east. The inlet was filled in with unknown material in the 1860's. The spur of the Milwaukee River extended north, from E. Wells St. to E. Juneau Ave., parallel to N. Edison St.

3. Department of City Development records show that the northern 1/3 of the project site, which was formerly E. Highland Ave., was vacated on November 8, 1983.

4. On July 18, 2000, City staff conducted a cursory drive-by inspection of the project site located at 1027 N. Edison St. The site had a cyclone fence running along the southern ¾ of the property. The northern 1/3 of the property was landscaped and used as a public right-of-way (ROW) leading to a pedestrian foot bridge, which extends across the Milwaukee River. The southern 2/3 of the project site was a parking lot with a concrete surface. A construction trailer and building materials for the "riverwalk" (under construction) were located at the western end of the site. Six (6) five-gallon pails and two (2) 55-gallon drums were located along the north side of the trailer. Neither the pails nor the drums had legible identification labels.

**Phase I: 1027 N. Edison Street, Milwaukee, Wisconsin**  
**Other Relevant Observations (cont'd)**

Two Wisconsin Electric Power Company (WEPCO) high voltage boxes were located along the southeast edge of the property. The project site was generally bounded by residential dwellings to the north, a City-owned parking garage to the east (across N. Edison St.), Rojahn & Malaney Co. Wholesale Florists to the south, and the Milwaukee River to the west. City staff did not observe any soil discoloration, distressed vegetation, abandoned drums, tanks, or any sign of dumping on the site. **(Attachment A)**

5. According to the City's Historic Preservation staff, the project site (1027 N. Edison St.) is neither listed in the National Register of Historic Places, nor has it received local historical designation. Projects involving the project will not impact on any National Registered or locally designated sites or districts. **(Attachment B)**

## **V. SUMMARY OF FINDINGS, CONCLUSIONS, AND RECOMMENDATIONS**

### **A. SUMMARY**

1. The project site is a paved, City-owned parking lot and pedestrian ROW located at 1027 N. Edison St. The lot size is approximately 18,950-sq. ft. or 0.4 acre. The property is zoned "C9BA" or Residential and Specialty Use. It is located in downtown Milwaukee.

2. We understand that RACM is negotiating with a developer for the possible purchase and development of the project site for a 25-story residential high-rise that would include 38 condominium units.

3. The historical land uses of the project site included, but were not limited to, commercial uses. Selected land uses that raised potential environmental concerns are bolded. (ROW, wood yard, a portion of a coal yard, parking lot, snow dump, playground, and a 2<sup>nd</sup> hand materials yard)

4. The following are relevant historical land uses of selected properties adjacent to the project site. Selected land uses that raised potential environmental concerns are bolded. (coal yard, hotel, sheds, sausage factory, **Edison Electric Illuminating Co.**, cleaning & dyeing, offices, parking lot, **auto garage**, **auto repair**, floral supplies, wholesale florist, **auto painting**, **junk shop**, tea co., **moving van parking**, , **chemical manufacturer**, **service garage**, pharmaceutical mfr., **WEPCO heating plant**, **gas station**, **TMER & LCo. Heating Division**, **real estate office**, **auto parts**, **electrical contractor**, **printing co.**, **apron mfr.**, **sign co.**, **general plastics mfr.**, **electrical supply**, **furniture mfr.**, **shoe manufacturing supplies**, **City trucking yard**, **City yard**, **cement contractors**, **wholesale salvage**, **blacksmiths shop**, **performing arts center**, **performing art pavilion**, **lawn mower mfr.**, **piston & pins co.**, **offset plating mfg.**, **cab co.**, **transportation oil co.**, **amusements co.**, **vending machines**, **cleaning supplies mfr.**, **novelty co.**, **flavor extracts**, **pottery co.**, **brewery**, **photographer**, **wax co.**, **used cars**, **tire store**, **warehouse**, **uniform manufacturer**, and **City Hall**.

**Phase I: 1027 N. Edison Street, Milwaukee, Wisconsin  
Summary (cont'd)**

5. A review of WDNR, USEPA, and City of Milwaukee's Health Department, Assessor's Office, and Department of City Development (DCD) records did not indicate any relevant open or closed files within the project site.
6. The project site is not located in a wetland. The project site is located within a highly developed environmental corridor, and a portion of the site is within a 500-year floodplain.
7. According to the City's Historic Preservation staff, the project site (1027 N. Edison St.) is neither listed in the National Register of Historic Places, nor has it received local historical designation. Projects involving the project will not impact on any National Registered or locally designated sites or districts. (**Attachment B**)

**B. CONCLUSIONS**

1. The present land uses (parking lot, pedestrian ROW, and an occasional "snow dump") of the project site did not raise any potential environmental concerns. However, selected historical land uses of the project site (a portion of a coal yard, and a 2<sup>nd</sup> hand materials yard) may raise potential environmental concerns, because these activities may have involved the use, storage, handling, generation, and disposal of hazardous materials or hazardous wastes.
2. Selected historical land uses of adjacent properties (e.g., auto repair garage, DPW ward yard, chemical manufacturer, coal yard, concrete block factory, furniture manufacturer, etc.) also raised potential environmental concerns.
3. Confirmation of the environmental conditions of the property will involve groundwater and soil sampling and laboratory analyses.

**C. RECOMMENDATIONS**

1. Based on the available historical land use information regarding the project site, and its intended reuse, we recommend a limited Phase II site assessment.
2. In addition, as a precaution, any land disturbing activity (e.g., soil boring, grading, construction, etc.) should be preceded by a comprehensive and systematic search for underground storage tanks and utility mains and fixtures. Confirmation efforts (e.g., additional record searches, and/or backhoe excavations) should be conducted to investigate suspected tanks.
  - a. If found, the contents of underground storage tanks should be sampled and tested for potential reuse, recycling or disposal, according to State regulations.

**Phase I: 1027 N. Edison Street, Milwaukee, Wisconsin  
Recommendations (cont'd)**

- b. If found, all abandoned tanks should be properly removed, and a site assessment conducted, according to existing WDNR regulations. The tanks should also be registered with the Wisconsin Department of Commerce (DCOMM)

Re: Property at 1027 North Edison Street

We have reviewed the above property, which is currently a vacant lot. It is not listed in the National Register of Historic Places, and has not received local historic designation. Projects involving this property will not directly impact on any National Register or locally designated sites or districts.

Milwaukee, Wisconsin 53202

RE: Summary of Additional Site Investigation Activities  
1027 N. Edison St.  
Milwaukee, Wisconsin

Dear Ms. Dettmer:

## **INTRODUCTION**

Sigma Environmental Services, Inc. (Sigma) was retained by the City of Milwaukee, Department of City Development, to complete additional site investigation activities at the property located at 1027 North Edison Street, Milwaukee, Wisconsin. The purpose of the additional investigation activities was to further characterize residual subsurface impacts at the site. This letter presents the results of these activities.

## **BACKGROUND**

The site is located in the northeast  $\frac{1}{4}$  of the northeast  $\frac{1}{4}$  of Section 29, Township 7 North, Range 22 East in the City of Milwaukee, Milwaukee County Wisconsin. The site is located on the west side of N. Edison Street on the east edge of the Milwaukee River between Juneau Avenue to the north and State Street to the south. The site is approximately 19,985 square feet in size; however, only the southern half of the site is readily developable due to the presence of underground utilities and existing public access for a pedestrian bridge (over the Milwaukee River) on the northern portion of the site (*Figure 1*).

The City completed a Phase I Environmental Assessment of the site in July 2000; this Phase I report was again reviewed by the City and updated on July 12, 2007. As summarized in the report, the following historic uses of the parcel raise concerns regarding the potential for site impact: a coal yard, a second-hand materials yard, and a snow dump. Past operations at adjacent properties include, but are not limited to, a coal yard, Edison Electric Illumination Co., fur cleaning and dyeing, auto garage/repair/painting, roofing company, junk shop, gas station, electrical contractor, printing company, City yard/trucking yard, wholesale salvage, cleaning supplies manufacturer, and a wax company.

Phase II investigation activities were conducted at the site by Sigma between January 31, 2008 and February 28, 2008 to assess the site conditions relative to historic uses. A letter report summarizing the Phase II investigation activities and their results was provided to the City on April 15, 2008. Results of the Phase II investigation activities are summarized as follows:

- The site appears to be covered with eight to twelve feet of fill comprised of soft sandy silts and silty sands containing gravel along with amounts of brick and wood debris and traces of glass and cinders. The lithology beneath the fill material generally consists of deposits of saturated fine sandy and clayey silts and silty clays to the maximum depth investigated (20 feet bgs).
- The depths to groundwater ranged from 9 to 13 feet bgs in temporary groundwater monitoring wells. Based on the static groundwater elevations groundwater is interpreted to flow to the northeast.
- Site specific physical and chemical characteristics indicate that fill material containing concentrations of select Polycyclic Aromatic Hydrocarbon (PAH) constituents and lead at concentrations greater than Residual Contaminant Levels (RCLs) for the direct contact pathway is present at the site. The impacted fill material does not appear to be present at the ground surface but extends from approximately 2 to 4 feet to depths of between 8 to 12 feet bgs. Although the fill material also contains concentrations of naphthalene and phenanthrene greater than the RCL for the protection of groundwater, groundwater at the site did not contain concentrations of naphthalene or phenanthrene greater than Ch. NR 140 Preventive Action Limits (PALs). The soil sample collected from below the fill material at 10 to 12 feet bgs in soil boring GP-2 did not contain concentrations of PAHs greater than laboratory method detection limits and the reported concentration of lead in this sample was below the Ch. NR 720 RCL.
- Residual impacts to groundwater beneath the site appear to be limited to chloride at concentrations greater than the Ch. NR 140 Enforcement Standard (ES) and PAL in temporary wells TW-1, TW-2, and TW-3, chrysene at a concentration greater than the Ch. NR 140 ES in temporary well TW-5, pyridine at a concentration greater than the Ch. NR 140 PAL in temporary well TW-1, dissolved chromium at a concentration greater than the Ch. NR 140 PAL in temporary well TW-2, and dissolved arsenic at concentrations greater than the Ch. NR 140 PAL in temporary wells TW-1, TW-2, TW-4, and TW-5.

Based on the Phase II investigation activities, Sigma recommended additional site investigation activities to further characterize subsurface impacts at the site. The scope of activities and results are presented below.

#### **SCOPE OF WORK**

Sigma on behalf of the City of Milwaukee completed the following:

- 1) Soil sampling via geoprobe soil boring advancement to further characterize subsurface impacts in the area of potential excavation, and
- 2) Methane monitoring at existing temporary monitoring wells.

The activities completed in May and June 2008 provide the following results.

## **INVESTIGATION ACTIVITIES**

### **Subsurface Investigation**

On May 21, 2008 three Geoprobe® soil borings (FGP-1 through FGP-3) were completed within the the area of the site that will require subsurface excavation. The Geoprobe® borings were advanced to a depth of approximately 12 feet bgs. The soil borings were spaced evenly from east to west across the site. Soil boring locations are presented on *Figure 1*.

During boring advancement, soil samples were collected on a continuous basis and described on the basis of color, texture, grain size, and plasticity, and classified in accordance with the USCS. The soil classifications, sampling intervals, and descriptions are presented on the Soil Boring Logs in *Attachment A*.

Soil samples were collected from each sampling interval and containerized for headspace analysis using an organic vapor monitor (OVM) that was periodically calibrated for direct response to 250 ppm isobutylene in air. Field screening results are presented on Soil Boring Logs in *Attachment A*.

Two soil samples from each boring (one soil sample collected from within the fill material and one soil sample collected from native material beneath the fill) were collected and submitted for laboratory analysis of PAHs and lead. A composite soil sample from the three soil borings was also submitted for laboratory analysis of semi-volatile organic compounds (SVOCs), TCLP lead, reactive cyanide, reactive sulfide, flash point, pH, and free liquids.

The soil borings were abandoned upon completion. The borehole abandonment forms are included in *Attachment B*.

### **Methane Monitoring**

Sigma completed methane monitoring at the existing temporary groundwater monitoring wells (TW-1 through TW-4) using a LandTec Infrared Gas Analyzer. Methane monitoring was not completed at the location of temporary monitoring well TW-5 as the PVC casing had been removed from this well (TW-5 was subsequently abandoned with bentonite chips). The monitoring included five days of closed vapor point monitoring followed by five days of open vapor point monitoring to evaluate the potential for subsurface materials to generate methane.

## **ADDITIONAL INVESTIGATION RESULTS**

### **Soil Analytical Results**

A total of six soil samples collected at the site were submitted for laboratory analysis of PAHs and lead, and a composite soil sample was submitted for laboratory analysis of SVOCs, TCLP lead, reactive cyanide, reactive sulfide, flash point, pH, and free liquids.

**PAHs and Lead Discussion:** Detectable concentrations of one or more PAH constituents and lead were measured in each soil sample collected from the additional soil borings (FGP-1 through FGP-3). Soil samples collected and submitted from the observed fill material in each boring (FGP-1 4 to 8 feet bgs, FGP-2 0 to 4 feet bgs, and FGP-3 0 to 4 feet bgs)

contained reported concentrations of one or more PAH constituents and lead greater than the RCLs for the direct contact pathway. In addition, the fill samples collected from soil borings FGP-2 and FGP-3 contained reported concentrations of phenanthrene greater than the Interim Guidance RCL for the protection of groundwater pathway.

In general, soil samples collected from the native material below the fill material observed in each boring (FGP-1 8 to 12 feet bgs, FGP-2 8 top 12 feet bgs, and FGP-3 8 to 12 feet bgs) did not contain reported concentrations of PAH constituents or lead greater than applicable RCLs, with the exception of the sample collected from soil boring FGP-3 at a depth of 8 to 12 feet bgs. The soil sample collected from soil boring FGP-3 at a depth of 8 to 12 feet bgs contained concentrations of benzo(a)pyrene and lead that exceeded RCLs for the direct contact pathway at a non-industrial site. It is possible that the impacts associated with the fill material have impacted native material underlying the fill material at this location.

Soil analytical results from the additional soil borings are consistent with results collected during the Phase II ESA activities previously completed at the site. Based on the analytical results concentrations of PAH constituents within the fill material at the site appear to be greatest in the western portion of the site and decrease across the site to the east. Soil analytical results are summarized in *Table 1* and presented on *Figure 2*. The soil analytical laboratory report is included in *Attachment C*.

Composite Soil Sample Discussion: Analytical results from the composite soil sample indicate that materials, which may require handling and/or off-site disposal during redevelopment of the site, will most likely be considered a special waste. Laboratory analysis did not identify any characteristically hazardous constituents within the composite soil sample. The soil analytical laboratory report is included in *Attachment C*.

#### **Methane Monitoring Results**

Review of methane monitoring results indicate that a negligible amount (0.1%) or no methane was present at temporary monitoring well locations TW-1, TW-3, and TW-4 during all closed cap and open cap methane monitoring events. Methane was detected at temporary well TW-2 at concentrations between 3.8% and 6.0% during closed cap monitoring and at concentrations between 0.5% and 16.4% during open cap monitoring.

Methane monitoring results are summarized in *Table 2*. Based on the detected presence of methane at temporary well TW-2, methane abatement measures may be required to be included in any new construction associated with site redevelopment.

As discussed in Sigma's letter dated April 15, 2008, due to the presence of historic fill material at the site (containing glass and traces of other non-exempt fill), the WDNR will require an exemption to ch. NR 506.085 and NR 500.08(4) of the Wisconsin Administrative Code to build on a historic landfill be obtained, prior to development activities. Any required methane abatement measures will depend on the type of structure proposed for the site and approval by the Wisconsin Department of Natural Resources as part of the NR 506.085 and NR 500.08(4) exemption process.

City of Milwaukee

Notes:

- µg/kg = micrograms per kilogram (equivalent to parts per billion, ppb)
  - mg/kg = milligrams per kilogram (equivalent to parts per million, ppm)
  - NA = not analyzed
  - GW RCLs = Groundwater Residual Contaminant Levels based on the following:  
For petroleum hydrocarbons, GW RCLs based on Wisconsin Administrative Code, Chapter NR 720.09 generic Residual Contaminant Level for protection of groundwater.  
For PAHs, GW RCLs based on interim guidance RCL for protection of groundwater pathway from PAH compounds, from WDNR publication RR-519-97 "Soil Cleanup Levels for Polycyclic Aromatic Hydrocarbons (PAHs) Interim Guidance" (April 1997)
  - DC RCLs for Non-Industrial Soil = Direct Contact Residual Contaminant Levels based on the following:  
For petroleum hydrocarbons, DC RCLs based on Wisconsin Administrative Code, Chapter NR 746.06 Table 1 ("Indicators of Residual Petroleum Product in Soil Pores") soil screening levels / Table 2 ("Protection of Human Health from Direct Contact with Contaminated Soil") concentrations.  
For PAHs, DC RCLs based on interim guidance RCL for protection of direct contact with PAH compounds for non-industrial land use, from WDNR publication RR-519-97 "Soil Cleanup Levels for Polycyclic Aromatic Hydrocarbons (PAHs) Interim Guidance" (April 1997), target risk of 1 x 10<sup>-6</sup> used per NR 720.19(5)(a).  
For metals, DC RCLs based on Wisconsin Administrative Code, Chapter NR 720.11 generic Residual Contaminant Level for protection of direct contact for non-industrial land use
  - PRG for Residential Soil = US EPA Region IX Preliminary Remediation Goal for residential soil (October 2004) to use as a guideline to evaluate the direct contact exposure pathway
  - SSL = US EPA Region IX Soil Screening Level for protection of groundwater with a dilution-attenuation factor of 20 (October 2004) - provided as a guideline to evaluate soil
  - = PRG and SSL not provided for PAHs because complete list of WDNR interim guidance standards exists for the PAH compounds
  - NS = no standard established
  - Laboratory flags: "J" = Analyte detected between Limit of Detection and Limit of Quantitation
  - Exceedances: **box** = Concentration exceeds GW RCL  
[ brackets ] = Concentration exceeds DC RCL for Non-Industrial Soil (note that soil is located within 4 feet of the ground surface)  
underline = Concentration exceeds DC RCL for Non-Industrial Soil (note that soil is located deeper than 4 feet of the ground surface)
- \* Exceedances for PRGs and SSLs are not identified in this table, as these values are intended only as a preliminary screening tool at this time.

## **APPENDIX J**

Resumes of Project Team

**Areas of Expertise**

- ◆ Environmental Site Assessments
- ◆ Soil/Groundwater Investigations

**Education/Training**

- ◆ B.A., Urban and Environmental Studies, Marquette University-Milwaukee, WI, 1998
- ◆ M.S., Environmental Management, University of San Francisco-San Francisco, CA, 2005

**Registrations/Certifications**

- ◆ Certified Asbestos Inspector, Wisconsin No. AII-116724
- ◆ Certified Asbestos Supervisor, Wisconsin No. ACS-116724
- ◆ OSHA 40-Hour HAZWOPER Certificate
- ◆ OSHA 8-Hour HAZWOPER Refresher Certificate

**Professional Affiliations**

- ◆ Association of Engineering Geologists Member
- ◆ National Association of Environmental Professionals Member
- ◆ National Groundwater Association Member

**PROFILE**

Mr. Reimer provides environmental consulting services for a variety of residential, commercial, and industrial clients. Mr. Reimer has four years of consulting experience in environmental site investigation and remediation related projects. His experience includes Phase I Environmental Site Assessment (ESA) and Phase II ESA projects, interpreting soil and groundwater data, and completing reports for clients and regulatory agencies.

**REPRESENTATIVE EXPERIENCE**

***Phase I Environmental Site Assessments - Real Estate***

Completed Phase I ESA consistent with ASTM requirements, identifying environmental hazards and assessing their extent and potential impacts. Conducted lead-based paint inspections, asbestos identification surveys and performed collection of suspect lead and asbestos containing materials for laboratory analysis.

***Phase II Environmental Site Assessments - Commercial Properties***

Conducted Phase II ESA investigations at numerous types of contaminated sites including leaking underground storage tank (UST) sites, former landfills, and active and former dry cleaning facilities. Prepared Phase II ESA scopes of work and cost estimates. Performed fieldwork including soil and groundwater sampling, active soil gas sampling, methane monitoring, groundwater monitoring, groundwater monitoring well installation and development, groundwater monitoring well abandonment, subsurface geophysical investigations, provided drilling oversight, and supervision of excavation and removal of contaminated soils. Prepared and finalized Phase II ESA reports documenting findings and recommendations for further action, groundwater monitoring reports, site-specific health and safety plans and recorded site geology in general conformance with the Unified Soil Classification System.

**Areas of Expertise**

- ◆ Brownfield Redevelopment
- ◆ Soil/Groundwater Investigations
- ◆ Grant Writing/Procurement
- ◆ Demolition Planning

**Education/Training**

- ◆ Bachelor of Science in Geological Engineering, University of Wisconsin-Madison, 1994
- ◆ Bachelor of Science in Geology, University of Wisconsin-Madison, 1994
- ◆ Master of Science in Environmental Engineering, Milwaukee School of Engineering, 1998
- ◆ OSHA 40-Hour Health & Safety Training, October 1994
- ◆ OSHA 8-Hour Contaminated Site Refresher, October 2006

**Registrations/Certifications**

- ◆ Professional Engineer, Wisconsin No. 34322-006

**PROFILE**

Ms. Kurzka is a Senior Engineer with responsibilities ranging from the oversight and direction of subsurface investigation and remediation for various brownfield redevelopment projects to assisting industrial clients with maintaining regulatory compliance. She has over 16 years of regulatory and consulting experience having worked for the Wisconsin Department of Natural Resources prior to joining the Sigma team.

**REPRESENTATIVE EXPERIENCE**

***EPA Petroleum Assessment Fund Program - City of Racine***

Project Manager for the implementation of the EPA Funded Petroleum Assessment Fund for the City of Racine. Responsible for assisting the City with the development of the selection criteria for property candidates, completion of Phase I Environmental Site Assessments (ESA), Phase II ESA and Remedial Options development. Completed all relevant EPA correspondence and compliance of all activities within the constraints of the grant program.

***EPA Petroleum and Hazardous Assessment Fund Programs - City of Milwaukee***

Project Manager for City of Milwaukee properties participating within the EPA Funded Petroleum and Hazardous Assessment Fund programs. Responsible for assisting the City with the completion of Phase I ESA, Phase II ESA and Remedial Options development. Completed all relevant EPA correspondence and compliance of all activities within the constraints of the grant program.

***Brownfield Redevelopment - City of Milwaukee former Milwaukee Road Property***

Project Manager for a City of Milwaukee due diligence investigation of the 100-acre former rail yard located in the Menomonee Valley. Project responsibilities included research and review of site history, investigation strategy development, coordination of field activities, data evaluation, remedial alternative consideration and implementation and construction management.

***Hospital Expansion - Large Southeastern Wisconsin Hospital***

Project Manager for a southeastern Wisconsin hospital due diligence investigation and remediation of four phases of renovation and construction. Responsible for investigation and remedial planning for construction activities. The projects were completed with aggressive schedules and budgets.

---

***Brownfield Redevelopment - City of Milwaukee Menomonee Valley EPA Brownfield Pilot Project***

Project Manager for the City of Milwaukee Menomonee Valley EPA Brownfield Pilot Project Grant project. Responsible for developing project strategies, implementing sampling and data collection activities in accordance with the project Quality Assurance Project Plan (QAPP), compiling and evaluating the study findings, presenting study findings to the EPA, City of Milwaukee and other members of the study group, and maintaining the project schedule and budget.

***Infrastructure Reconstruction/Brownfield Development - City of Milwaukee Canal Street Reconstruction***

Project Manager for remedial activities conducted for the City of Milwaukee during Canal Street reconstruction/extension project. Responsible for identification of impacted materials, proper management of excavated soil/fill material, water removed from excavations, proper abandonment of underground storage tanks discovered during work, and contractor and project management team training.

***Chlorinated Solvent Remediation - Large Industrial Client***

Project Manager for an old industrial site impacted with hydrocarbon and chlorinated constituents where remediation by natural attenuation (RNA) was approved by the WDNR as the final remedial strategy program to facilitate the sale of the property.

***Voluntary Party Liability Exemption Investigation and Remediation - Sigma Headquarters***

Project Manager for the Voluntary Party Liability Exemption (VPLE) Program investigation and remediation of Sigma's headquarters located in the Menomonee Valley.
