**Weekly Construction Meetings**  
Weekly construction meetings are held every Monday at 9:00 a.m. at the DPW Field Office, located at 3865 S. 27th Street. Businesses are invited to attend and share any concerns they may have about the project. Business concerns will be addressed before the official start of the meeting.

Phase 2 of the South 27th Street construction project has reached some major milestones. All of the utility work has been completed which included a lot of coordination among the project inspectors, the utilities and the businesses.

Concrete has been poured at the major intersections of Howard Avenue, Morgan Avenue and Oklahoma Avenue and are nearing completion. The contractor has completed two main driving lanes on the east side of South 27th Street, from Howard Avenue to the South 27th Street Bridge over the Kinnickinnic River Parkway. The east side of the bridge deck was poured the week of October 21st. (see photo)

Additional work that needs to be completed on the bridge includes the painting of the railings, exposed wing walls and deck edges with coordinated paint colors. The painting of the underside of the structural steel will occur in 2015.

The bioswales will be installed on the boulevards this year.

However, there are some walks and driveways that have not been removed on the east side of the construction project. These areas will be completed in 2015.

The roadway is anticipated to open to traffic by November 21st.

Thank you for reaching out and informing the Department of Public Works of your concerns during the construction project and for your patience.
