Training Grant!

Building Analyst Certification

The Me² program and the Focus on Energy Home Performance program work together to provide affordable financing and rebates for qualified energy efficiency work, performed by Participating Contractors.

Full service and insulation contractors must have a Building Performance Institute (BPI) certified building analyst on staff to participate in these programs.

Me² is providing training grants to up to 10 individuals to receive this BPI training and certification.

This training is a \$3,000 value!

Full \$3,000 grants and a \$300 training stipend are available to eligible employees of Participating Me² Contractors and other licensed contractors that seek to participate in Me². If you are a contractor that would like to send an existing employee or hire a new employee with this certification, please apply for this program. Additionally, contractors may receive On the Job training funds for hiring a new employee who has successfully completed the training.

Partial grants of \$2,000 are available individuals who own a Participating Me² contracting company or company that has applied to participate in the Me² program.

Visit **SmartEnergyPays.com/contractors** to apply by May 27th, 2014.

Are you...
A contractor or home inspector interested in being able to offer incentives from Focus on Energy Home Performance with ENERGY STAR programs?

Are You...
Interested growing your business by being able to offer Me2 financing to your customers?

Are you...
Interested in learning the science of how homes use energy and how to improve them?
