We did the Me² program this past January. At first I thought we didn't need this program because we had just got new windows a few years ago and we are pretty good at being energy efficient people. What could we get out of this? Boy was I wrong! **It was fantastic!!!** We got about \$10,000 worth of work done for about \$6,000. We saw a dramatic change in our heating bill. We could FEEL the difference when we went upstairs. Even now in the summer we can tell a difference because the house stays cooler.

Everyone from Me² was super nice, friendly and explained things in a very easy to understand way. I love that after the 3 hour house evaluation, they give you a prioritized list of things to be fixed. After the work is done, Me² has to come back out and check the work of the contractors before the contractors get paid. This made me feel good to know the work was done correctly. I would recommend Me² for every homeowner.

I already have recommended the program to several people. Why shouldn't they get the benefits of better energy efficiency as I have? **The whole process, from energy advocate to insulation installation, was smooth and accommodating to my scheduling needs.** Every person I had contact with was friendly, helpful, and very professional. I am so proud to be living in a city that recognizes the need to promote energy efficiency and energy savings for homeowners.

I love that my home feels so much warmer and that my heating costs are so low. The new furnace makes a huge difference in my quality of life. I learned a lot about the structure of my home. I was surprised to learn that my home had two layers of brick in the foundation and that my stove let off high levels of carbon monoxide. Yes I would recommend the program to others, my energy advocate was the best!!

– Monica B., Tippecanoe resident

The workers were great they took pride in their work; they did a fantastic job with some of the problems they ran into and still completed on schedule. **From day one I felt a tremendous difference in the comfort level of the home.** The walls really retain heat I do not have cold spots in the home anymore. I am happiest because it is within my budget. My hat is off to Stacy Trisco (energy advocate) and all who worked on my behalf to make this a most rewarding experience. All I can say when you do the math it all makes sense.

– James G., North Division resident

Having the discounted energy assessment alone was worth it. In the end, the reason we moved forward with the project and why I would definitely recommend the program was the project rebate. We estimated we would get back about 50% of the project to air seal the house, add insulation to our attic and sidewalls, and spray foam the box sills. **We ended up getting nearly 70% of the cost back because of how much we improved.** The return on investment with the rebates, having a professional walk through your home and discuss energy saving ideas specific to your home, and the added comfort are all just three reasons I would recommend the program.

Molly and I are very grateful for being a part of the Me² program. **The significant Me² and Focus on Energy rebates pushed us from 'consideration' into 'action'.** Furthermore, the limited out-of-pocket cost and affordable financing made it possible for us (well-meaning homeowners with limited extra cash on hand) to make the improvements that will save us money and reduce our environmental footprint. We were pleasantly surprised how easy participation was and I've been trumpeting our satisfaction to anyone who will listen. I hope other homeowners will continue to take advantage of this great program! **We have been overjoyed with the Me² program!** We will realize benefits for years to come. Thank you very much for your help!
