I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the front dwelling at 1942 South 6th Street, Milwaukee, Wisconsin.

The inspection included plaster, drywall/joint compound, blown in insulation, ceiling tile, linoleum, window glazing compound, floor tile, and paper insulation to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On March 5, 2014 HMG conducted an asbestos inspection of a two family front dwelling, scheduled for mechanical demolition, located at 1942 South 6th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14730.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled except where on concrete.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, drywall/joint compound, blown in insulation, ceiling tile, linoleum, window glazing compound, floor tile, and paper insulation. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1a	1 st floor – front entry – west wall – plaster skim coat	Negative	N/A	SPI
1b	1 st floor – front entry – west wall – plaster base coat	Negative	N/A	SPI
2a	1 st floor – living room – south wall – plaster skim coat	Negative	N/A	SPI
2b	1 st floor – living room – south wall – plaster base coat	Trace <1% Actinolite/ Tremolite	N/A	SPI
2b	POINT COUNT RESULT	Trace <25% Chrysotile	N/A	SPI
3	1 st floor – stair – east wall – plaster	Negative	N/A	SPI
4a	Basement – ceiling – plaster skim coat	Negative	N/A	SPI
4b	Basement – ceiling – plaster base coat	Negative	N/A	SPI
5a	Basement – south wall – plaster skim coat	Negative	N/A	SPI
5b	Basement – south wall – plaster base coat	Negative	N/A	SPI
6	2 nd floor – east room – ceiling – drywall	Negative	N/A	MDW
7	2 nd floor – northwest room – north wall – drywall	Negative	N/A	MDW
8a	Basement – living room – east wall – joint compound	Positive 3% Chrysotile	N/A	MDW
8b	Basement – living room – east wall – drywall	Negative	N/A	MDW
8b	COMPOSITE POINT COUNT RESULT	Trace 0.75% Chrysotile	N/A	MDW
9	Attic – in ceiling – blown in insulation	Negative	N/A	MBI
10	Attic – near stair – blown in insulation	Negative	N/A	MBI
11	Attic – in ceiling – blown in insulation	Negative	N/A	MBI
12	1 st floor – back hall – ceiling tile	Negative	N/A	MSCT
13	Basement – living room – west window – glazing compound	Negative	N/A	MPG
14	Basement – south room – south window – glazing compound	Negative	N/A	MPG
15	1 st floor – living room – west window – glazing compound	Negative	N/A	MPG

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
16	1 st floor – south room – under carpet – gray linoleum	Negative	N/A	MFLy
17	1 st floor – bathroom – on wall – yellow and black linoleum	Negative	N/A	MFLk
18	1st floor – kitchen – top layer – tan and white linoleum	Positive 25% Chrysotile	160 Sq. Ft.	MFLtw
19	2 nd floor – stair landing – under floor tile – green and white linoleum	Negative	N/A	MFLgw
20	1 st floor – bathroom – on wall under yellow and black linoleum – pink linoleum	Negative	N/A	MFLp
21a	Basement – entry – 9” brown floor tile	Positive 7% Chrysotile	40 Sq. Ft.	MF9n
21b	Basement – entry – under floor tile – mastic	Negative	N/A	MF9n
22a	Basement – kitchen – 9” tan and brown floor tile	Positive 8% Chrysotile	150 Sq. Ft.	MF9tn
22b	Basement – entry – under floor tile – mastic	Negative	N/A	MF9n
23a	Basement – living room – 9” black floor tile	Positive 7% Chrysotile	280 Sq. Ft.	MF9k
23b	Basement – entry – under floor tile – mastic	Negative	N/A	MF9n
24a	Basement – living room – 9” black floor tile	Positive 7% Chrysotile	Reference Sample 23a	MF9k
24b	Basement – entry – under floor tile – mastic	Negative	N/A	MF9n
25a	Basement – south room – 9” black floor tile	Positive 6% Chrysotile	Reference Sample 23a	MF9k
25b	Basement – south room – under floor tile – mastic	Negative	N/A	MF9n
26	1 st floor – front entry – on floor – paper insulation	Negative	N/A	MPI
27	1 st floor – living room – on floor – paper insulation	Negative	N/A	MPI
28	1 st floor – living room – on floor – paper insulation	Negative	N/A	MPI

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	700 Sq. Ft.
1 st /2 nd	Dwelling	Asphalt Shingle Siding	1,100 Sq. Ft.
1 st	Kitchen/Bathroom/Stair	Floor Tile & Mastic	220 Sq. Ft.
1 st	South Room/Bathroom	Floor & Wall Mastic	60 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
MDW	Drywall/Joint Compound
MBI	Blown in Insulation
MSCT	Ceiling Tile
MPG	Glazing Compound
MFLy	Gray Linoleum
MFLk	Black Linoleum
MFLtw	Tan & White Linoleum
MFLgw	Green & White Linoleum
MFLp	Pink Linoleum

Homogeneous Material Codes

MF9n	9" Brown Floor Tile
MF9tn	9" Tan & Brown Floor Tile
MF9k	9" Black Floor Tile
MPI	Paper Insulation

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>N/A</u>	Fluorescent Lights
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>N/A</u>	Old Thermostats
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 1 Breaker Box in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>N/A</u>	Oil Tanks
<u>N/A</u>	Well Abandonment
<u>1</u>	Junk Auto Tires – Basement
<u>N/A</u>	Junk Vehicles

* 2 Gas Meters on Exterior

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the rear dwelling at 1942 South 6th Street, Milwaukee, Wisconsin.

The inspection included plaster, drywall/joint compound, fiberboard, linoleum, paper insulation, and tar paper to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On March 6, 2014 HMG conducted an asbestos inspection of a one family rear dwelling, scheduled for mechanical demolition, located at 1942 South 6th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14730.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP

regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, drywall/joint compound, fiberboard, linoleum, paper insulation, and tar paper. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1a	1 st floor – kitchen – ceiling – plaster skim coat	Negative	N/A	SPI
1b	1 st floor – kitchen – ceiling – plaster base coat	Negative	N/A	SPI
2a	1 st floor – pantry – north wall – plaster skim coat	Negative	N/A	SPI
2b	1 st floor – pantry – north wall – plaster base coat	Negative	N/A	SPI
3a	1 st floor – living room – east wall – plaster skim coat	Negative	N/A	SPI
3b	1 st floor – living room – east wall – plaster base coat	Negative	N/A	SPI
4a	1 st floor – living room – north wall – plaster skim coat	Negative	N/A	SPI
4b	1 st floor – living room – north wall – plaster base coat	Negative	N/A	SPI
5a	1 st floor – living room – south wall – plaster skim coat	Negative	N/A	SPI
5b	1 st floor – living room – south wall – plaster base coat	Negative	N/A	SPI
6	1 st floor – pantry – west wall – drywall	Negative	N/A	MDW
7	1 st floor – pantry – west wall – drywall	Negative	N/A	MDW
8	1 st floor – pantry – west wall – drywall	Negative	N/A	MDW
9	1 st floor – kitchen – west wall – fiberboard	Negative	N/A	MFB
10	1 st floor – living room – south wall – fiberboard	Negative	N/A	MFB
11	1 st floor – living room – north wall – fiberboard	Negative	N/A	MFB
12	1 st floor – kitchen – top layer – gray and green linoleum	Negative	N/A	MFLyg
13	1 st floor – kitchen – 2 nd layer – red and white linoleum	Negative	N/A	MFLrw
14	1 st floor – kitchen – 3 rd layer – red and blue linoleum	Negative	N/A	MFLrw
15	1 st floor – kitchen – 4 th layer – red linoleum	Negative	N/A	MFLr
16	1 st floor – kitchen – 5 th layer – brown linoleum	Negative	N/A	MFLn
17	1 st floor – living room west side – red and green linoleum	Negative	N/A	MFLrg
18	1 st floor – living room south side – red and green linoleum	Negative	N/A	MFLrg
19	1 st floor – living room center – red and green linoleum	Negative	N/A	MFLrg
20	Exterior – west wall under vinyl siding – drywall #2	Negative	N/A	MDW2

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
21	Exterior – south wall under vinyl siding – drywall #2	Negative	N/A	MDW2
22	Exterior – north wall under vinyl siding – drywall #2	Negative	N/A	MDW2
23	1 st floor – living room west side – under linoleum – paper insulation	Negative	N/A	MPI
24	1 st floor – living room south side – under linoleum – paper insulation	Negative	N/A	MPI
25	1 st floor – living room center – under linoleum – paper insulation	Negative	N/A	MPI
26	Exterior – east wall – tar paper	Negative	N/A	MPT

Notes: N/A = Not Applicable

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	400 Sq. Ft.
1 st	All Rooms	Floor Mastic	350 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
MDW	Drywall
MDW2	Drywall #2
MFB	Fiberboard
MFLyg	Gray & Green Linoleum
MFLrw	Red & White Linoleum
MFLrb	Red & Blue Linoleum
MFLr	Red Linoleum
MFLn	Brown Linoleum
MPI	Paper Insulation
MPT	Tar Paper

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

V. EXCLUSIONS

Attic not accessible. Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those

materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>N/A</u>	Fluorescent Lights
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>N/A</u>	Old Thermostats
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS

<u> N/A </u>	Load Meters and Supply Relays
<u> N/A </u>	Phase Splitters
<u> N/A </u>	Microwave Relays
<u> N/A </u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u> N/A </u>	Transformers
<u> N/A </u>	Capacitors (appliances, electronic equipment)
<u> N/A </u>	Heat Transfer Equipment
<u> N/A </u>	Light Ballasts
<u> N/A </u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u> N/A </u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u> N/A </u>	Hazardous Waste
<u> N/A </u>	Oil Tanks
<u> N/A </u>	Well Abandonment
<u> N/A </u>	Junk Auto Tires
<u> N/A </u>	Junk Vehicles

* 1 Gas Meter on Exterior

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the front dwelling at 2603 North 6th Street, Milwaukee, Wisconsin.

The inspection included plaster, tar paper, blown in insulation, window glazing compound, linoleum drywall/joint compound, magnesia pipe insulation, and flue packing to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On March 3, 2014 HMG conducted an asbestos inspection of a two family front dwelling, scheduled for mechanical demolition, located at 2603 North 6th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14730.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk

sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, tar paper, blown in insulation, window glazing compound, linoleum drywall/joint compound, magnesia pipe insulation, and flue packing. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1	Exterior – east wall under wood siding – tar paper	Negative	N/A	MPT
2	Exterior – west wall under wood siding – tar paper	Negative	N/A	MPT
3	Exterior – south wall under wood siding – tar paper	Negative	N/A	MPT
4	1 st floor – bedroom – south window – glazing compound	Negative	N/A	MPG
5	1 st floor – kitchen – west window – glazing compound	Negative	N/A	MPG
6	1st floor – living room – north window – glazing compound	Positive 2% Chrysotile	27 Windows	MPG
7	2 nd floor – north bedroom – under carpet – green linoleum	Negative	N/A	MFLg
8	2 nd floor – southwest bedroom – under carpet – yellow and blue linoleum	Negative	N/A	MFLlb
9	2 nd floor – southwest bedroom – under yellow and blue linoleum – red and green linoleum	Negative	N/A	MFLrg
10	2 nd floor – east bedroom – under carpet – tan linoleum	Negative	N/A	MFLt
11	1 st floor – dining room – north side – yellow and brown linoleum	Negative	N/A	MFLln
12	1 st floor – dining room – south side – yellow and brown linoleum	Negative	N/A	MFLln
13	1 st floor – dining room – west side – yellow and brown linoleum	Negative	N/A	MFLln
14a	1 st floor – living room – north wall – patch layer	Negative	N/A	SPI
14b	1 st floor – living room – north wall – plaster	Negative	N/A	SPI
15	1 st floor – dining room – north wall – plaster	Negative	N/A	SPI
16	1 st floor – kitchen – west wall – plaster	Negative	N/A	SPI
17	1 st floor – bathroom – east wall – plaster	Negative	N/A	SPI
18	2 nd floor – stair – north wall – plaster	Negative	N/A	SPI
19	2 nd floor – hall – north wall – plaster	Negative	N/A	SPI
20	2 nd floor – east room – closet wall – plaster	Negative	N/A	SPI
21	2 nd floor – hall – south wall – drywall	Negative	N/A	MDW
22	2 nd floor – closet – west wall – drywall	Negative	N/A	MDW
23	2 nd floor – north bedroom – south wall – drywall	Negative	N/A	MDW

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
24	1 st floor – front entry – on floor – blown in insulation	Negative	N/A	MBI
25	2 nd floor – bathroom – on floor – blown in insulation	Negative	N/A	MBI
26	2 nd floor – bathroom – on floor – blown in insulation	Negative	N/A	MBI
27	Basement – east side - <5” diameter magnesia pipe insulation	Positive 8% Chrysotile	90 Ln. Ft.	TM5
28	Basement – south side - <5” diameter magnesia pipe insulation	Positive 5% Chrysotile	Reference Sample 27	TM5
29	Basement – center - <5” diameter magnesia pipe insulation	Positive 5% Chrysotile	Reference Sample 27	TM5
30a	Basement – on chimney – flue packing top layer	Negative	N/A	TFP
30b	Basement – on chimney – flue packing 2 nd layer	Negative	N/A	TFP
30c	Basement – on chimney – flue packing 3 rd layer	Negative	N/A	TFP
30d	Basement – on chimney – flue packing 4 th layer	Negative	N/A	TFP
31	2 nd floor – east bedroom closet – red and tan linoleum	Negative	N/A	MFLrt

Notes: N/A = Not Applicable
Ln. Ft. = Linear Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	800 Sq. Ft.
1 st	Kitchen	Floor Tile & Mastic	400 Sq. Ft.
1 st	Dining Room	Floor Mastic	220 Sq. Ft.
2 nd	Bedrooms	Floor Mastic	420 Sq. Ft.
2 nd	Bathroom	Floor Tile & Mastic	100 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
MPT	Tar Paper
MPG	Glazing Compound
MFLg	Green Linoleum
MFLlb	Yellow & Blue Linoleum
MFLrg	Red & Green Linoleum
MFLt	Tan Linoleum
MFLln	Yellow & Brown Linoleum
MFLrt	Red & Tan Linoleum
MDW	Drywall
MBI	Blown in Insulation
TM5	<5” Diameter Magnesia Pipe Insulation
TFP	Flue Packing

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

Note#4: Additional magnesia may be within walls and ceilings.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>N/A</u>	Fluorescent Lights
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>N/A</u>	Old Thermostats
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS – 2 Furnaces & 1 Water Heater in Basement

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 1 Breaker Box in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>N/A</u>	Oil Tanks
<u>N/A</u>	Well Abandonment
<u>3</u>	Junk Auto Tires – Exterior
<u>N/A</u>	Junk Vehicles

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the rear dwelling at 2603 North 6th Street, Milwaukee, Wisconsin.

The inspection included plaster, drywall/joint compound, linoleum, tar paper, blown in insulation, window glazing compound, and flue packing to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On March 5, 2014 HMG conducted an asbestos inspection of a one family rear dwelling, scheduled for mechanical demolition, located at 2603 North 6th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14730.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk

sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, drywall/joint compound, linoleum, tar paper, blown in insulation, window glazing compound, and flue packing. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1a	1 st floor – living room – east wall – plaster skim coat	Negative	N/A	SPI
1b	1 st floor – living room – east wall – plaster base coat	Negative	N/A	SPI
2a	1 st floor – living room – west wall – plaster skim coat	Negative	N/A	SPI
2b	1 st floor – living room – west wall – plaster base coat	Negative	N/A	SPI
3a	1 st floor – southwest bedroom – east wall – plaster skim coat	Negative	N/A	SPI
3b	1 st floor – southwest bedroom – east wall – plaster base coat	Negative	N/A	SPI
4a	1 st floor – northwest bedroom – south wall – plaster skim coat	Negative	N/A	SPI
4b	1 st floor – northwest bedroom – south wall – plaster base coat	Negative	N/A	SPI
5a	2 nd floor – dining room – west wall – plaster skim coat	Negative	N/A	SPI
5b	2 nd floor – dining room – west wall – plaster base coat	Negative	N/A	SPI
6a	2 nd floor – living room – east wall – plaster skim coat	Negative	N/A	SPI
6b	2 nd floor – living room – east wall – plaster base coat	Negative	N/A	SPI
7a	2 nd floor – kitchen – south wall – plaster skim coat	Negative	N/A	SPI
7b	2 nd floor – kitchen – south wall – plaster base coat	Negative	N/A	SPI
8	1 st floor – kitchen – east wall – drywall	Negative	N/A	MDW
9a	1 st floor – bathroom – south wall – joint compound	Negative	N/A	MDW
9b	1 st floor – bathroom – south wall – drywall	Negative	N/A	MDW
10	2 nd floor – kitchen – north wall – joint compound	Negative	N/A	MDW
10	2 nd floor – kitchen – north wall – drywall	Negative	N/A	MDW
11	1 st floor – living room – center under carpet – yellow and brown linoleum	Negative	N/A	MFLIn
12	1 st floor – living room – west side under carpet – yellow and brown linoleum	Negative	N/A	MFLIn

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
13	1 st floor – dining room – under carpet – yellow and brown linoleum	Negative	N/A	MFLln
14	1 st floor – southwest bedroom – under carpet – yellow linoleum	Negative	N/A	MFLl
15	1 st floor – northwest bedroom – under carpet – yellow and tan linoleum	Negative	N/A	MFLlt
16	1 st floor – bathroom – tan and white linoleum	Negative	N/A	MFLtw
17	2 nd floor – dining room – under carpet – orange and tan linoleum	Negative	N/A	MFLot
18	2 nd floor – dining room – under orange and tan linoleum – red and pink linoleum	Negative	N/A	MFLrp
19	2 nd floor – living room – under carpet – green and brown linoleum	Negative	N/A	MFLgn
20	2 nd floor – northwest bedroom – under carpet – yellow and gray linoleum	Negative	N/A	MFLly
21	2 nd floor – bathroom – under floor tile and plywood – green linoleum	Negative	N/A	MFLg
22	2 nd floor – living room – under green and brown linoleum – tar paper	Negative	N/A	MPT
23	Attic – on floor – blown in insulation	Negative	N/A	MBI
24	Attic – on floor – blown in insulation	Negative	N/A	MBI
25	Basement – on stair – blown in insulation	Negative	N/A	MBI
26	Basement – west window – glazing compound	Positive 2% Chrysotile	30 Windows	MPG
27	1st floor – kitchen – north window – glazing compound	Positive 2% Chrysotile	Reference Sample 26	MPG
28	Attic – window stack – glazing compound	Positive 2% Chrysotile	Reference Sample 26	MPG
29	Basement – on south side of chimney – flue packing	Negative	N/A	TFP
30	Basement – on east side of chimney – flue packing #2	Negative	N/A	TFP2

Notes: N/A = Not Applicable
Ln. Ft. = Linear Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	800 Sq. Ft.
1 st	Kitchen	Floor Tile & Mastic	500 Sq. Ft.
1 st	Living Room/Dining Room/Bedrooms/Bathroom	Floor Mastic	340 Sq. Ft.
2 nd	Living Room/Dining Room/Bedroom	Floor Mastic	300 Sq. Ft.
2 nd	Bathroom/Kitchen	Floor Tile & Mastic	350 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
MDW	Drywall
MFLg	Green Linoleum
MFLln	Yellow & Brown Linoleum
MFLl	Yellow Linoleum

Homogeneous Material Codes

MFLlt	Yellow & Tan Linoleum
MFLtw	Tan & White Linoleum
MFLot	Orange & Tan Linoleum
MFLrp	Red & Pink Linoleum
MFLrg	Red & Green Linoleum
MFLly	Yellow & Gray Linoleum
MPT	Tar Paper
MBI	Blown in Insulation
MPG	Glazing Compound
TFP	Flue Packing
TFP2	Flue Packing #2

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

V. EXCLUSIONS

Basement floor covered with debris and only partially accessible. Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the

Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services.

Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>1</u>	Refrigerators , Freezers, Chillers – 1 st Floor Kitchen
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>N/A</u>	Fluorescent Lights
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>N/A</u>	Old Thermostats
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 2 Electric Meters on Exterior.

- N/A Load Meters and Supply Relays
- N/A Phase Splitters
- N/A Microwave Relays
- N/A Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

- N/A Transformers
- N/A Capacitors (appliances, electronic equipment)
- N/A Heat Transfer Equipment
- N/A Light Ballasts
- N/A Specialty Paints (such as for swimming pools or other industrial applications)
- N/A Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

- N/A Hazardous Waste
- N/A Oil Tanks
- N/A Well Abandonment
- N/A Junk Auto Tires
- N/A Junk Vehicles

* 2 Gas Meters on Exterior

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the rear dwelling at 2552-54 North 10th Street, Milwaukee, Wisconsin.

The inspection included plaster, texture, linoleum, window glazing compound, joint compound patch, flue packing, tar paper, and drywall/joint compound to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On June 26, 2013, HMG conducted an asbestos inspection of a one family rear dwelling scheduled for mechanical demolition, located at 2552-54 North 10th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14370.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I nonfriable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining),

morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents. The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) plaster, texture, linoleum, window glazing compound, joint compound patch, flue packing, tar paper, and drywall/joint compound. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1-2552Ra	1 st floor – kitchen – under plywood – tan linoleum	Negative	N/A	MFLt
1-2552Rb	1 st floor – kitchen – under linoleum – tar paper	Negative	N/A	MPT
2-2552R	1 st floor – dining room – north wall – texture	Negative	N/A	STX
3-2552R	1 st floor – dining room – south wall – texture	Negative	N/A	STX
4-2552R	1 st floor – bedroom – ceiling – texture	Negative	N/A	STX
5-2552Ra	Basement – stair – north wall – plaster skim coat	Negative	N/A	SP1
5-2552Rb	Basement – stair – north wall – plaster base coat	Negative	N/A	SP1
6-2552Ra	1 st floor – pantry – west wall – plaster skim coat	Negative	N/A	SP1
6-2552Rb	1 st floor – pantry – west wall – plaster base coat	Negative	N/A	SP1
7-2552Ra	1 st floor – bedroom – south wall – plaster skim coat	Negative	N/A	SP1
7-2552Rb	1 st floor – bedroom – south wall – plaster base coat	Negative	N/A	SP1
8-2552Ra	1 st floor – bathroom – north wall – plaster skim coat	Negative	N/A	SP1
8-2552Rb	1 st floor – bathroom – north wall – plaster base coat	Negative	N/A	SP1
9-2552Ra	1 st floor – living room – east wall – plaster skim coat	Negative	N/A	SP1
9-2552Rb	1 st floor – living room – east wall – plaster base coat	Negative	N/A	SP1
10-2552Ra	2 nd floor – east room – south wall – joint compound	Negative	N/A	MDW
10-2552Rb	2 nd floor – east room – south wall – drywall	Negative	N/A	MDW
11-2552Ra	1 st floor – kitchen – north wall – joint compound	Negative	N/A	MDW
11-2552Rb	1 st floor – kitchen – east wall – drywall	Negative	N/A	MDW
12-2552Ra	1 st floor – kitchen – east wall – joint compound	Negative	N/A	MDW
12-2552Rb	1 st floor – kitchen – north wall – drywall	Negative	N/A	MDW
13-2552R	2 nd floor – west room – south wall – texture #2	Negative	N/A	STX2
14-2552R	2 nd floor – west room – north wall – texture #2	Negative	N/A	STX2
15-2552R	2 nd floor – west room – east wall – texture #2	Negative	N/A	STX2

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
16-2552R	Basement – on windows – glazing compound	Negative	N/A	MPG
17-2552R	Basement – on chimney – flue packing	Negative	N/A	TFP
18-2552R	1 st floor – bedroom – on south wall – joint compound patch	Negative	N/A	MJC
19-2552R	1 st floor – bathroom – on north wall – joint compound patch	Negative	N/A	MJC
20-2552R	1 st floor – front entry – on west wall – joint compound patch	Negative	N/A	MJC
21-2552R	Quality Assurance/Quality Control sample of 1-2552R	Negative	N/A	QA/QC

Notes: N/A = Not Applicable

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	600 Sq. Ft.
1 st	Kitchen/Bathroom/Pantry	Floor Tile & Mastic	160 Sq. Ft.

Homogeneous Material Codes

SP1	Plaster
STX	Texture
STX2	Texture #2
MFLt	Tan Linoleum
MPG	Glazing Compound
MDW	Drywall/Joint Compound
MJC	Joint Compound Patch
MPT	Tar Paper
TFP	Flue Packing
QA/QC	Quality Assurance/Quality Control Sample

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and

above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

- | | |
|------------|--|
| <u>N/A</u> | Fluorescent Lights |
| <u>N/A</u> | High Intensity Discharge
-Metal Halide
-High Pressure Sodium
-Mercury Vapor |
| <u>N/A</u> | Neon |
| <u>N/A</u> | Switches for lighting using mercury relays
-Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches. |

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

- | | |
|------------|-----------------|
| <u>N/A</u> | Old Thermostats |
| <u>N/A</u> | Aquastats |
| <u>N/A</u> | Firestats |
| <u>N/A</u> | Manometers |
| <u>N/A</u> | Thermometers |

BOILERS, FURNACES, HEATERS AND TANKS – 1 Furnace in Basement

- | | |
|------------|---------------------------------------|
| <u>N/A</u> | Mercury Flame Sensors by pilot lights |
| <u>N/A</u> | Manometers, Thermometers, Gauges |
| <u>N/A</u> | Pressure-trol |
| <u>N/A</u> | Float or Level Controls |
| <u>N/A</u> | Space Heaters |

ELECTRICAL SYSTEMS – 1 Breaker Box in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>N/A</u>	Oil Tanks
<u>N/A</u>	Well Abandonment
<u>N/A</u>	Junk Auto Tires
<u>N/A</u>	Junk Vehicles

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the dwelling at 1828 South 11th Street, Milwaukee, Wisconsin.

The inspection included plaster, texture, transite, tar paper, linoleum, flue packing, window glazing compound, ceiling tile, blown in insulation, and drywall/joint compound and to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On February 15, 2013, HMG conducted an asbestos inspection of a two family rear dwelling scheduled for mechanical demolition, located at 1828 South 11th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII - 14370.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I nonfriable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining),

morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents. The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, texture, transite, tar paper, linoleum, flue packing, window glazing compound, ceiling tile, blown in insulation, and drywall/joint compound. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1-1828R	Exterior – west wall – transite siding	Positive 20% Chrysotile	2,800 Sq. Ft.	MTP
2-1828R	Exterior – south wall – transite siding	Positive 20% Chrysotile	Reference 1-1828R	MTP
3-1828R	Exterior – east wall – transite siding	Positive 20% Chrysotile	Reference 1-1828R	MTP
4-1828R	Exterior – west wall under transite – tar paper	Negative	N/A	MPT
5-1828R	Exterior – south wall under transite – tar paper	Negative	N/A	MPT
6-1828R	Exterior – east wall under transite – tar paper	Negative	N/A	MPT
7-1828R	Basement – northeast corner – beige and black linoleum	Negative	N/A	MFLek
8-1828R	Basement – southwest corner under carpet – brown and black linoleum	Negative	N/A	MFLnk
9-1828R	Basement – south side under carpet – brown and black linoleum	Negative	N/A	MFLnk
10-1828R	Basement – south center under carpet – brown and black linoleum	Negative	N/A	MFLnk
11-1828R	Basement – on west chimney – flue packing	Negative	N/A	TFP
12-1828R	Basement – west window – glazing compound	Negative	N/A	MPG
13-1828R	Basement – northwest corner – tan and gold linoleum	Negative	N/A	MFLtd
14-1828R	1 st floor – east apartment – living room closet – tan and brown linoleum	Negative	N/A	MFLtn
15-1828R	1 st floor – east apartment – kitchen – west side under floor tile – brown linoleum	Negative	N/A	MFLn
16-1828R	1 st floor – east apartment – kitchen – east side under floor tile – beige and brown linoleum	Positive 15% Chrysotile	130 Sq. Ft.	MFLen
17-1828R	1 st floor – east apartment – kitchen – southeast corner – gray and black linoleum	Negative	N/A	MFLyk
18-1828R	1 st floor – east apartment – kitchen – southeast corner on wall – cream and black linoleum	Negative	N/A	MFLck

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
19-1828R	1 st floor – east apartment – bedroom – 1' x 1' ceiling tile	Negative	N/A	MSCT11
20-1828R	Attic – west side – tan/brown/yellow linoleum	Negative	N/A	MFLml
21-1828R	Attic – east side under floor – blown in insulation	Negative	N/A	MBI
22-1828R	Attic – north side under floor – blown in insulation	Negative	N/A	MBI

42-1828R	Quality Assurance/ Quality Control Sample of Sample 7-1828R	Negative	N/A	QAQC
43-1828R	Quality Assurance/ Quality Control Sample of Sample 8-1828R	Negative	N/A	QAQC

Notes: N/A = Not Applicable

Sq. Ft. = Square Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	1,400 Sq. Ft.
1 st	West Apt-Kitchen/Bathroom	Floor Mastic	200 Sq. Ft.
1 st	East Apt-Kitchen/Bathroom/Living Room	Floor Tile & Mastic	240 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
STX	Texture
MTP	Transite
MPT	Tar Paper
MFLeK	Beige & Black Linoleum
MFLnk	Brown & Black Linoleum
MFLtd	Tan & Gold Linoleum
MFLtn	Tan & Brown Linoleum
MFLn	Brown Linoleum
MFLen	Beige & Brown Linoleum
MFLyk	Gray & Black Linoleum
MFLck	Cream & Black Linoleum
MFLtl	Tan/Brown/Yellow Linoleum
MFLcr	Cream & Red Linoleum
MFLyc	Gray & Cream Linoleum
MFLl	Yellow Linoleum
MPG	Window Glazing Compound
MSCT11	1' x 1' Ceiling Tile
MBI	Blown in Insulation
MDW	Drywall/Joint Compound
TFP	Flue Packing
QA/QC	Quality Assurance/Quality Control Sample

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

Note#4: Estimated cost for friable asbestos removal 

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas or material were excluded from this scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Schneider Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>2</u>	Fluorescent Lights -- East Apt. Living Room
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>1</u>	Old Thermostats -- East Apt. Living Room
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS -- 1 Furnace in Basement

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 1 Breaker Box in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building were PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>1</u>	Light Ballasts – East Apt. Living Room
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>N/A</u>	Oil Tanks
<u>N/A</u>	Well Abandonment
<u>N/A</u>	Junk Auto Tires
<u>N/A</u>	Junk Vehicles

Total Number of Pages in Report: 7

Results relate only to samples as received by the laboratory.

Visit www.slabinc.com for current certifications.

Samples analyzed by the EPA Test Method are subject to the limitations of light microscopy including matrix interference. Gravimetric reduction and correlative analyses are recommended for all non-friable, organically bound materials. This method has a reporting limit of 1% or greater. Visual estimation contains an inherent range of uncertainty. This report must not be reproduced except in full with the approval of the lab, and must not be used to claim NVLAP or other gov't agency endorsement. The EPA states that any asbestos found in vermiculite is a concern and the sample should be treated as asbestos containing material.

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the front dwelling at 1729 South 14th Street, Milwaukee, Wisconsin.

The inspection included plaster, drywall/joint compound, window glazing compound, linoleum, tar paper, ceiling tile, fiberboard, blown in insulation, and ceramic tile to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On October 8, 2013, HMG conducted an asbestos inspection of a one family front dwelling, scheduled for mechanical demolition, located at 1729 South 14th Street, Milwaukee, Wisconsin. The inspection was conducted by Demicca Coe, Wisconsin License No. AII – 156385.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk

sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, drywall/joint compound, window glazing compound, linoleum, tar paper, ceiling tile, fiberboard, blown in insulation, and ceramic tile. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1-1729	1 st floor – front hall – west wall – plaster	Negative	N/A	SPI
2-1729a	1 st floor – living room – north wall – patch layer	Negative	N/A	SPI
2-1729b	1 st floor – living room – north wall – plaster	Negative	N/A	SPI
3-1729	1 st floor – southeast bedroom – east wall – plaster	Negative	N/A	SPI
4-1729	1 st floor – kitchen – ceiling – plaster	Negative	N/A	SPI
5-1729	1 st floor – north bedroom – north wall – plaster	Negative	N/A	SPI
6-1729a	1 st floor – bathroom – south wall – joint compound	Negative	N/A	MDW
6-1729b	1 st floor – bathroom – south wall – drywall	Negative	N/A	MDW
7-1729a	Basement – stair – ceiling – joint compound	Negative	N/A	MDW
7-1729b	Basement – stair – ceiling – drywall	Negative	N/A	MDW
8-1729a	Basement – north wall – joint compound	Negative	N/A	MDW
8-1729b	Basement – north wall – drywall	Negative	N/A	MDW
9-1729	1 st floor – southeast bedroom – south bedroom – glazing compound	Negative	N/A	MPG
10-1729	1 st floor – living room – south bedroom – glazing compound	Negative	N/A	MPG
11-1729	Basement – south bedroom – glazing compound	Negative	N/A	MPG
12-1729	1 st floor – hall – blue linoleum	Negative	N/A	MFLb
13-1729	1 st floor – kitchen south side – blue linoleum	Negative	N/A	MFLb
14-1729	1 st floor – kitchen north side – blue linoleum	Negative	N/A	MFLb
15-1729	1 st floor – pantry – cream linoleum	Negative	N/A	MFLc
16-1729	1 st floor – bathroom – cream linoleum	Negative	N/A	MFLc
17-1729	1 st floor – bathroom – cream linoleum	Negative	N/A	MFLc
18-1729	1 st floor – kitchen west side – white ceiling tile	Negative	N/A	MSCTw
19-1729	1 st floor – kitchen east side – white ceiling tile	Negative	N/A	MSCTw
20-1729	1 st floor – kitchen center – white ceiling tile	Negative	N/A	MSCTw
21-1729	1 st floor – kitchen – west side above ceiling tile – fiberboard	Negative	N/A	MFB
22-1729	1 st floor – kitchen – east side above ceiling tile – fiberboard	Negative	N/A	MFB
23-1729	1 st floor – kitchen – center above ceiling tile – fiberboard	Negative	N/A	MFB
24-1729	Attic – under floor – blown in insulation	Negative	N/A	MBI
25-1729	Attic – under floor – blown in insulation	Negative	N/A	MBI
26-1729	Attic – under floor – blown in insulation	Negative	N/A	MBI

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
27-1729a	1 st floor – bathroom floor – white ceramic tile	Negative	N/A	MCTMw
27-1729b	1 st floor – bathroom floor – grout	Negative	N/A	MCTMw
28-1729a	1 st floor – bathroom wall – white and blue ceramic tile	Negative	N/A	MCTMwb
28-1729b	1 st floor – bathroom wall – grout	Negative	N/A	MCTMwb

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	1,400 Sq. Ft.
1 st	Kitchen/Bathroom/Hall/Pantry	Floor Mastic	370 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
MDW	Drywall/Joint Compound
MPG	Glazing Compound
MFLb	Blue Linoleum
MFLc	Cream Linoleum
MSCTw	White Ceiling Tile
MFB	Fiberboard
MBI	Blown in Insulation
MCTMw	White Ceramic Tile
MCTMwb	White & Blue Ceramic Tile

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

- | | |
|------------|--|
| <u>4</u> | Fluorescent Lights – Kitchen, Attic |
| <u>N/A</u> | High Intensity Discharge
-Metal Halide
-High Pressure Sodium
-Mercury Vapor |
| <u>N/A</u> | Neon |
| <u>N/A</u> | Switches for lighting using mercury relays
-Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches. |

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

- | | |
|------------|-------------------------------|
| <u>1</u> | Old Thermostats – Living Room |
| <u>N/A</u> | Aquastats |
| <u>N/A</u> | Firestats |
| <u>N/A</u> | Manometers |
| <u>N/A</u> | Thermometers |

BOILERS, FURNACES, HEATERS AND TANKS

- | | |
|------------|---------------------------------------|
| <u>N/A</u> | Mercury Flame Sensors by pilot lights |
| <u>N/A</u> | Manometers, Thermometers, Gauges |
| <u>N/A</u> | Pressure-trol |
| <u>N/A</u> | Float or Level Controls |
| <u>N/A</u> | Space Heaters |

ELECTRICAL SYSTEMS

- N/A Load Meters and Supply Relays
- N/A Phase Splitters
- N/A Microwave Relays
- N/A Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

- N/A Transformers
- N/A Capacitors (appliances, electronic equipment)
- N/A Heat Transfer Equipment
- N/A Light Ballasts
- N/A Specialty Paints (such as for swimming pools or other industrial applications)
- N/A Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

- N/A Hazardous Waste
- N/A Oil Tanks
- N/A Well Abandonment
- N/A Junk Auto Tires
- N/A Junk Vehicles

* 1 Gas Meter on Exterior

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the dwelling at 2756 North 21st Street, Milwaukee, Wisconsin.

The inspection included plaster, texture, stucco, tar paper, drywall/joint compound, duct paper, aircell pipe insulation, window glazing compound, paper insulation, linoleum, leveling compound, and ceramic tile to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On March 20, 2014 HMG conducted an asbestos inspection of a three family dwelling and garage, scheduled for mechanical demolition, located at 2756 North 21st Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14370.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk

sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, texture, stucco, tar paper, drywall/joint compound, duct paper, aircell pipe insulation, window glazing compound, paper insulation, linoleum, leveling compound, and ceramic tile. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1a	Exterior – south wall on brick foundation – stucco skim coat	Negative	N/A	STC
1b	Exterior – south wall on brick foundation – stucco base coat	Negative	N/A	STC
1c	Exterior – south wall on brick foundation – stucco yellow layer	Negative	N/A	STC
2a	Exterior – south wall on brick foundation – stucco skim coat	Negative	N/A	STC
2b	Exterior – south wall on brick foundation – stucco base coat	Negative	N/A	STC
3a	Exterior – north wall on brick foundation – stucco skim coat	Negative	N/A	STC
3b	Exterior – north wall on brick foundation – stucco base coat	Negative	N/A	STC
4	Exterior – northwest wall on brick foundation – stucco #2	Negative	N/A	STC2
5	Exterior – north wall under wood siding – tar paper	Negative	N/A	MPT
6	Exterior – south wall under wood siding – tar paper	Negative	N/A	MPT
7	Exterior – west wall under wood siding – tar paper	Negative	N/A	MPT
8	Attic – bedroom – north wall – drywall	Negative	N/A	MDW
9	1 st floor – living room – north wall – drywall	Negative	N/A	MDW
10a	1 st floor – dining room – south wall – joint compound	Negative	N/A	MDW
10b	1 st floor – dining room – south wall – drywall	Negative	N/A	MDW
11a	2 nd floor – living room – east wall – joint compound #2	Negative	N/A	MDW2
11b	2 nd floor – living room – east wall – drywall #2	Negative	N/A	MDW2
12	2 nd floor – dining room – west wall – drywall #3	Negative	N/A	MDW3

17	2 nd floor – stair – on window – glazing compound	Negative	N/A	MPG
18a	1 st floor – front entry – under floor tile – paper insulation	Negative	N/A	MPI
18b	1 st floor – front entry – under floor tile – leveling compound	Negative	N/A	MPI
24	1 st floor – front entry – north wall – plaster	Negative	N/A	SPI
25	1 st floor – stair – north wall – plaster	Negative	N/A	SPI
26a	2 nd floor – stair – north wall – patch layer	Negative	N/A	SPI
26b	2 nd floor – stair – north wall – plaster	Negative	N/A	SPI
27	2 nd floor – pantry – east wall – plaster	Negative	N/A	SPI
28	2 nd floor – bathroom – south wall – plaster	Negative	N/A	SPI
29a	1 st floor – bathroom – ceiling – texture	Negative	N/A	STX
29b	1 st floor – bathroom – ceiling – texture layer 2	Negative	N/A	STX
29c	1 st floor – bathroom – ceiling – texture layer 3	Negative	N/A	STX
30a	1 st floor – hall – tan linoleum	Negative	N/A	MFLt
30b	1 st floor – hall – under linoleum – tar paper	Negative	N/A	MFLt
30c	1 st floor – hall – under tar paper – leveling compound	Negative	N/A	MFLt
31a	2 nd floor – east bedroom – ceiling – texture #2	Negative	N/A	STX2
31b	2 nd floor – east bedroom – ceiling – texture #2 layer 2	Negative	N/A	STX2
32	2 nd floor – east bedroom – ceiling – texture #2	Negative	N/A	STX2
32	2 nd floor – east bedroom – ceiling – texture #2 layer 2	Negative	N/A	STX2
33	2 nd floor – bathroom – ceiling – texture #2	Negative	N/A	STX2
33	2 nd floor – bathroom – ceiling – texture #2 layer 2	Negative	N/A	STX2
34	2 nd floor – kitchen – top layer – brown linoleum	Negative	N/A	MFLn
35	2 nd floor – pantry – top layer – brown linoleum	Negative	N/A	MFLn
36	2 nd floor – living room – top layer – brown linoleum	Negative	N/A	MFLn
37	2 nd floor – bathroom floor – ceramic tile	Negative	N/A	MCTM
38a	2 nd floor – bathroom floor – under ceramic tile – leveling compound	Negative	N/A	MLC
38b	2 nd floor – bathroom floor – under ceramic tile – leveling compound layer 2	Negative	N/A	MLC

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet
Ln. Ft. = Linear Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	1,000 Sq. Ft.
1 st / 2 nd	Dwelling	Asphalt Shingle Siding	2,500 Sq. Ft.
1 st	All Rooms	Floor Tile & Mastic	1,000 Sq. Ft.
1 st	Hall/Bathroom	Floor Mastic	60 Sq. Ft.
2 nd	Kitchen/Pantry/Stair/Living Room/Dining Room	Floor Tile & Mastic	700 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
STC	Stucco
STC2	Stucco #2
STX	Texture
STX	Texture #2
MPT	Tar Paper
MDW	Drywall/Joint Compound
MDW2	Drywall/Joint Compound #2
MDW3	Drywall/Joint Compound #3
MPG	Glazing Compound
MPI	Paper Insulation
MFLt	Tan Linoleum
MFLn	Brown Linoleum
MCTM	Ceramic Tile
MLC	Leveling Compound
TA5	<5" Diameter Aircell Pipe Insulation
TDW	Duct Paper

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

Note#4: Additional aircell and duct paper may be within walls and ceilings.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the

preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>1</u>	Fire Extinguishers (both portable and installed HALON suppression systems) – Basement
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>N/A</u>	Fluorescent Lights
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>3</u>	Old Thermostats - 1 st & 2 nd Floor Living Rooms
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>2</u>	Oil Tanks – Basement
<u>N/A</u>	Well Abandonment
<u>1</u>	Junk Auto Tires – Basement
<u>N/A</u>	Junk Vehicles

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct a supplemental inspection for asbestos containing plaster materials in the dwelling at 1926-28 North 26th Street, Milwaukee, Wisconsin.

The inspection included plaster to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

During an asbestos inspection conducted in August 2013, five samples of plaster surfacing had been collected and analyzed for asbestos by polarized light microscopy (PLM). One sample, collected from the 1st floor living room south wall, contained 3% actinolite/tremolite. HMG recommended to the City of Milwaukee Department of Neighborhood Services a supplemental inspection to isolate the location of asbestos containing plaster as permitted in the USEPA guidance "Asbestos in Buildings: Simplified Sampling Scheme for Friable Surfacing Materials".

On August 15, 2013, HMG conducted a supplemental asbestos inspection of a three family dwelling, scheduled for mechanical demolition, located at 1926-28 North 26th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14370.

During the initial inspection, plaster had been identified in all 1st and 2nd floor rooms, the basement stair and ceiling, and the attic stair. Samples had been collected from the 1st floor living room, bathroom, and west bedroom, the 2nd floor kitchen, and the basement. The approximate quantity of plaster is 9,000 sq. ft.

Additional plaster samples were collected from each of the other rooms that have plaster plus the additional plaster surfaces in the 1st floor living room. If at least one plaster sample had previously been collected from other rooms, no additional samples were collected during the supplemental inspection.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents. The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) included plaster. This material was sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
44-1926a	1 st floor – living room – west wall – plaster skim coat	Negative	N/A	SPI
44-1926b	1 st floor – living room – west wall – plaster skim coat 2	Negative	N/A	SPI

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet

Asbestos containing plaster (SPI) observed in 1st floor living room west, north, and south walls, and ceiling.

Homogeneous Material Codes

SPI Plaster

Note#1: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#2: A copy of this report should be transmitted to the demolition contractor.

Note#3: Asbestos containing linoleum, window glazing compound, ceramic tile, aircell, fittings, and duct paper were also identified during the initial inspection in August 2013.

Note#4: Estimated cost for asbestos containing plaster, linoleum, window glazing compound, ceramic tile, aircell, fittings, and duct paper removal.....

V. EXCLUSIONS

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the dwelling at 1926-28 North 26th Street, Milwaukee, Wisconsin.

The inspection included plaster, texture, paper insulation, linoleum, drywall/joint compound, ceramic tile, fiberboard, blown in insulation, aircell pipe insulation, fittings, duct paper, and glazing compound to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On August 2, 2013, HMG conducted an asbestos inspection of a 3 family dwelling scheduled for mechanical demolition, located at 1926-28 North 26th Street, Milwaukee, Wisconsin. The inspection was conducted by Demicca Coe, Wisconsin License No. AII – 156385.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I nonfriable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining),

morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents. The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) plaster, texture, paper insulation, linoleum, drywall/joint compound, ceramic tile, fiberboard, blown in insulation, aircell pipe insulation, fittings, duct paper, and glazing compound. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1-1926	Exterior – porch wall under vinyl siding – paper insulation	Negative	N/A	MPI
2-1926	Exterior – north wall under vinyl siding – paper insulation	Negative	N/A	MPI

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet
Ln. Ft. = Linear Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Building	Asphalt Shingles & Flashing	1,300 Sq. Ft.
1 st	Front Entry/Living Room	Floor Mastic	220 Sq. Ft.
1 st	Kitchen/Bathroom/Bedroom/Hall/Stair	Floor Tile & Mastic	700 Sq. Ft.
2 nd	Kitchen/Bathroom/Hall/Stair	Floor Tile & Mastic	650 Sq. Ft.
2 nd	Bedroom/Closet	Floor Mastic	170 Sq. Ft.

Homogeneous Material Codes

SP1	Plaster
MPI	Paper Insulation
MPI2	Paper Insulation #2
MFLg	Green Linoleum
MFLt	Tan Linoleum
MFLn	Brown Linoleum
MFLe	Beige Linoleum
MFLw	White Linoleum
MCTMw	White Ceramic Tile
MDW	Drywall/Joint Compound
MPG	Glazing Compound
MFB	Fiberboard
MBI	Blown in Insulation
TFPy	Gray Flue Packing
TFPydark	Dark Gray Flue Packing
TFPylight	Light Gray Flue Packing
TA5	<5" Diameter Aircell Pipe Insulation
TF5	<5" Diameter Pipe Insulation Fitting
TDW	Duct Paper

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

Note#4: Additional aircell, fittings, and duct paper may be within walls and ceilings. Exploratory demolition required for exact quantity.

Note#5: Estimated cost for friable asbestos 

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers -- Basement
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

- | | |
|------------|--|
| <u>1</u> | Fluorescent Lights – 1 st Floor Dining Room |
| <u>N/A</u> | High Intensity Discharge
-Metal Halide
-High Pressure Sodium
-Mercury Vapor |
| <u>N/A</u> | Neon |
| <u>N/A</u> | Switches for lighting using mercury relays
-Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches. |

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

- | | |
|------------|--|
| <u>2</u> | Old Thermostats – 1 st & 2 nd Floor Living Rooms |
| <u>N/A</u> | Aquastats |
| <u>N/A</u> | Firestats |
| <u>N/A</u> | Manometers |
| <u>N/A</u> | Thermometers |

BOILERS, FURNACES, HEATERS AND TANKS

- | | |
|------------|---------------------------------------|
| <u>N/A</u> | Mercury Flame Sensors by pilot lights |
| <u>N/A</u> | Manometers, Thermometers, Gauges |
| <u>N/A</u> | Pressure-trol |
| <u>N/A</u> | Float or Level Controls |
| <u>N/A</u> | Space Heaters |

ELECTRICAL SYSTEMS – 2 Breaker Boxes in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building were PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>N/A</u>	Oil Tanks
<u>N/A</u>	Well Abandonment
<u>N/A</u>	Junk Auto Tires
<u>N/A</u>	Junk Vehicles

* 2 Gas Meters on Exterior

* 1 Bottle Power Steering Fluid in 2nd Floor Dining Room

VII. HMG Certifications8

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct a supplemental inspection for asbestos containing plaster materials in the dwelling at 1926-28 North 26th Street, Milwaukee, Wisconsin.

The inspection included plaster to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

During an asbestos inspection conducted in August 2013, five samples of plaster surfacing had been collected and analyzed for asbestos by polarized light microscopy (PLM). One sample, collected from the 1st floor living room south wall, contained 3% actinolite/tremolite. HMG recommended to the City of Milwaukee Department of Neighborhood Services a supplemental inspection to isolate the location of asbestos containing plaster as permitted in the USEPA guidance "Asbestos in Buildings: Simplified Sampling Scheme for Friable Surfacing Materials".

On August 15, 2013, HMG conducted a supplemental asbestos inspection of a three family dwelling, scheduled for mechanical demolition, located at 1926-28 North 26th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14370.

During the initial inspection, plaster had been identified in all 1st and 2nd floor rooms, the basement stair and ceiling, and the attic stair. Samples had been collected from the 1st floor living room, bathroom, and west bedroom, the 2nd floor kitchen, and the basement. The approximate quantity of plaster is 9,000 sq. ft.

Additional plaster samples were collected from each of the other rooms that have plaster plus the additional plaster surfaces in the 1st floor living room. If at least one plaster sample had previously been collected from other rooms, no additional samples were collected during the supplemental inspection.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents. The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) included plaster. This material was sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
44-1926a	1 st floor – living room – west wall – plaster skim coat	Negative	N/A	SPI
44-1926b	1 st floor – living room – west wall – plaster skim coat 2	Negative	N/A	SPI
44-1926c	1 st floor – living room – west wall – plaster base coat	Trace <1% Actinolite/ Tremolite	N/A	SPI
44-1926c	POINT COUNT RESULT	Positive 1.50% Actinolite/ Tremolite	550 Sq. Ft.	SPI
45-1926a	1 st floor – living room – north wall – plaster skim coat	Negative	N/A	SPI
45-1926b	1 st floor – living room – north wall – plaster skim coat 2	Negative	N/A	SPI
45-1926c	1 st floor – living room – north wall – plaster base coat	Positive 2% Actinolite/ Tremolite	N/A	SPI
45-1926c	POINT COUNT RESULT	Positive 4.0% Actinolite/ Tremolite	Reference 44-1926c	SPI
46-1926a	1 st floor – living room – east wall – plaster skim coat	Negative	N/A	SPI

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
46-1926b	1 st floor – living room – east wall – plaster skim coat 2	Negative	N/A	SPI

60-1926b	2 nd floor – hall – north wall – plaster base coat	Negative	N/A	SPI
61-1926	2 nd floor – living room – south wall – plaster skim coat	Trace <1% Actinolite/ Tremolite	N/A	SPI
61-1926	POINT COUNT RESULT	Trace <0.25% Actinolite/ Tremolite	N/A	SPI
62-1926a	2 nd floor – dining room – east wall – plaster skim coat	Negative	N/A	SPI
62-1926b	2 nd floor – dining room – east wall – plaster base coat	Negative	N/A	SPI
63-1926a	2 nd floor – west bedroom – west wall – plaster skim coat	Negative	N/A	SPI
63-1926b	2 nd floor – west bedroom – west wall – plaster base coat	Negative	N/A	SPI
64-1926a	2 nd floor – west closet – north wall – plaster skim coat	Negative	N/A	SPI
64-1926b	2 nd floor – west closet – north wall – plaster base coat	Negative	N/A	SPI
65-1926a	2 nd floor – front stair – north wall – plaster skim coat	Negative	N/A	SPI
65-1926b	2 nd floor – front stair – north wall – plaster base coat	Negative	N/A	SPI
66-1926a	Basement - stair – east wall – plaster skim coat	Negative	N/A	SPI
66-1926b	Basement - stair – east wall – plaster base coat	Negative	N/A	SPI

Plaster results from initial inspection August 2013:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
4-1926a	1 st floor – living room – south wall – plaster skim coat	Negative	N/A	SPI
4-1926b	1 st floor – living room – south wall – plaster base coat	Positive 3% Actinolite/ Tremolite	Reference 44-1926c	SPI
5-1926a	1 st floor – west bedroom – west wall – plaster skim coat	Negative	N/A	SPI
5-1926b	1 st floor – west bedroom – west wall – plaster base coat	Negative	N/A	SPI
6-1926a	2 nd floor – kitchen – north wall – plaster skim coat	Negative	N/A	SPI
6-1926b	2 nd floor – kitchen – north wall – plaster base coat	Negative	N/A	SPI
7-1926a	1 st floor – bathroom – east wall – plaster skim coat	Negative	N/A	SPI
7-1926b	1 st floor – bathroom – east wall – plaster base coat	Negative	N/A	SPI
8-1926	Basement – ceiling – plaster skim coat	Negative	N/A	SPI

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet

Asbestos containing plaster (SPI) observed in 1st floor living room west, north, and south walls, and ceiling.

Homogeneous Material Codes

SPI Plaster

Note#1: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#2: A copy of this report should be transmitted to the demolition contractor.

Note#3: Asbestos containing linoleum, window glazing compound, ceramic tile, aircell, fittings, and duct paper were also identified during the initial inspection in August 2013.

Note#4: Estimated cost for asbestos containing plaster, linoleum, window glazing compound, ceramic tile, aircell, fittings, and duct paper removal..... 

V. EXCLUSIONS

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the front dwelling at 2543 North 27th Street, Milwaukee, Wisconsin.

The inspection included plaster, fiberboard, blown in insulation, magnesia insulation, aircell insulation, linoleum, drywall/joint compound, ceiling tile, paper insulation, flue pack, and window glazing compound to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On February 24, 2014 HMG conducted an asbestos inspection of a two family front dwelling, scheduled for mechanical demolition, located at 2543 North 27th Street, Milwaukee, Wisconsin. The inspection was conducted by Demicca Coe, Wisconsin License No. AII – 156385.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk

sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) plaster, fiberboard, blown in insulation, magnesia insulation, aircell insulation, linoleum, drywall/joint compound, ceiling tile, paper insulation, flue pack, and window glazing compound. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1	Exterior – south wall under wood siding – fiberboard	Negative	N/A	MFB
2	Exterior – west wall under wood siding – fiberboard	Negative	N/A	MFB
3	Exterior – east wall under wood siding – fiberboard	Negative	N/A	MFB
4	2 nd floor – kitchen – on floor – blown in insulation	Negative	N/A	MBI
5	2 nd floor – east room – on floor – blown in insulation	Negative	N/A	MBI

44	Basement – on chimney – flue packing	Positive 60% Chrysotile	2 Sq. Ft.	TFP

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	1,100 Sq. Ft.
1 st	All	Floor Mastic	700 Sq. Ft.
2 nd	All	Floor Mastic	800 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
MFB	Fiberboard
MFB2	Fiberboard #2
MBI	Blown in Insulation
MFLt	Tan Linoleum
MFLd	Gold Linoleum
MFLn	Brown Linoleum
MFLg	Green Linoleum
MFLpr	Pink & Red Linoleum
MFLnt	Brown & Tan Linoleum
MFLl	Yellow Linoleum
MFLtk	Tan & Black Linoleum
MDW	Drywall/Joint Compound
MSCT11	1' x 1' Ceiling Tile
MPI	Paper Insulation
MPG	Glazing Compound
TFP	Flue Packing
TM	Magnesia Insulation
TA	Aircell Insulation

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

Note#4: Additional magnesia and aircell may be within walls and ceilings.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>1</u>	Fluorescent Lights – Basement
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>N/A</u>	Old Thermostats
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 2 Breaker Boxes in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>1</u>	Oil Tanks – Basement
<u>N/A</u>	Well Abandonment
<u>N/A</u>	Junk Auto Tires
<u>N/A</u>	Junk Vehicles

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the rear dwelling at 2543 North 27th Street, Milwaukee, Wisconsin.

The inspection included plaster, texture, flue packing, drywall/joint compound, window glazing compound, ceiling tile, linoleum, blown in insulation, and fiberboard to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On February 25, 2014 HMG conducted an asbestos inspection of a two family rear dwelling, scheduled for mechanical demolition, located at 2543 North 27th Street, Milwaukee, Wisconsin. The inspection was conducted by Demicca Coe, Wisconsin License No. AII – 156385.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk

sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) plaster, texture, flue packing, drywall/joint compound, window glazing compound, ceiling tile, linoleum, blown in insulation, and fiberboard. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1	Basement – on north side of chimney – gray flue packing	Negative	N/A	TFP
1	Basement – on north side of chimney – white flue packing	Negative	N/A	TFP
2	Basement – on east side of chimney – flue packing #2	Negative	N/A	TFP2
3a	Basement – stair – north wall – joint compound	Negative	N/A	MDW
3b	Basement – stair – north wall – drywall	Negative	N/A	MDW
4a	1 st floor – bathroom – east wall – joint compound	Negative	N/A	MDW
4b	1 st floor – bathroom – east wall – drywall	Negative	N/A	MDW
5	2 nd floor – east room – west wall – drywall	Negative	N/A	MDW
6	1 st floor – bathroom – west window – glazing compound	Negative	N/A	MPG
7	1 st floor – living room – north window – glazing compound	Negative	N/A	MPG
8	2 nd floor – east room – east window – glazing compound	Negative	N/A	MPG
9	1 st floor – living room south side – ceiling – texture	Negative	N/A	STX
10	1 st floor – living room north side – ceiling – texture	Negative	N/A	STX
11	1 st floor – living room east side – ceiling – texture	Negative	N/A	STX
12	1 st floor – dining room – 1’ x 1’ ceiling tile	Negative	N/A	MSCT11
13	2 nd floor – hall – 1’ x 1’ ceiling tile	Negative	N/A	MSCT11
14	2 nd floor – west bedroom – 1’ x 1’ ceiling tile	Negative	N/A	MSCT11
15	1 st floor – dining room – tan linoleum	Negative	N/A	MFLt
16	1 st floor – bathroom – under floor tile – cream linoleum	Negative	N/A	MFLc
18	1 st floor – front stair – on floor – blown in insulation	Negative	N/A	MBI
19	2 nd floor – front stair – on floor – blown in insulation	Negative	N/A	MBI
20	2 nd floor – hall – on floor – blown in insulation	Negative	N/A	MBI
21	2 nd floor – east room – north wall – texture #2	Negative	N/A	STX2
22	2 nd floor – west room – north wall – texture #2	Trace <1% Chrysotile	N/A	STX2
22	POINT COUNT RESULT	Trace 0.25% Chrysotile	N/A	STX2

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
23	2 nd floor – west room – south wall – texture #2	Negative	N/A	STX2
24a	2 nd floor – front stair – north wall – plaster skim coat	Negative	N/A	SPI
24b	2 nd floor – front stair – north wall – plaster base coat	Negative	N/A	SPI
25a	2 nd floor – southwest bedroom – north wall – plaster skim coat	Negative	N/A	SPI
25b	2 nd floor – southwest bedroom – north wall – plaster base coat	Negative	N/A	SPI
26a	1 st floor – living room – east wall – plaster skim coat	Negative	N/A	SPI
26b	1 st floor – living room – east wall – plaster base coat	Negative	N/A	SPI
27a	1 st floor – dining room – ceiling – plaster skim coat	Negative	N/A	SPI
27b	1 st floor – dining room – ceiling – plaster base coat	Negative	N/A	SPI
28a	1 st floor – kitchen – north wall – plaster skim coat	Negative	N/A	SPI
28b	1 st floor – kitchen – north wall – plaster base coat	Negative	N/A	SPI
29	1 st floor – kitchen – north side – 2' x 4' ceiling tile	Negative	N/A	MSCT24
30	1 st floor – kitchen – east side – 2' x 4' ceiling tile	Negative	N/A	MSCT24
31	1 st floor – kitchen – south side – 2' x 4' ceiling tile	Negative	N/A	MSCT24
32a	Exterior – south wall under asphalt siding – tar paper	Negative	N/A	MFB
32b	Exterior – south wall under asphalt siding – fiberboard	Negative	N/A	MFB
33a	Exterior – east wall under asphalt siding – tar paper	Negative	N/A	MFB
33b	Exterior – east wall under asphalt siding – fiberboard	Negative	N/A	MFB
34a	Exterior – west wall under asphalt siding – tar paper	Negative	N/A	MFB
34b	Exterior – west wall under asphalt siding – fiberboard	Negative	N/A	MFB

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	700 Sq. Ft.
1 st / 2 nd	Dwelling	Asphalt Shingle Siding	900 Sq. Ft.
1 st	Kitchen/Bathroom/Stair	Floor Tile & Mastic	220 Sq. Ft.
1 st	Dining Room	Floor Mastic	70 Sq. Ft.
2 nd	All	Floor Tile & Mastic	400 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
STX	Texture
STX	Texture #2
MDW	Drywall/Joint Compound
MPG	Glazing Compound
MSCT11	1' x 1' Ceiling Tile
MSCT24	2' x 4' Ceiling Tile
MFLt	Tan Linoleum
MFLc	Cream Linoleum
MBI	Blown in Insulation
MFB	Fiberboard
TFP	Flue Packing
TFP2	Flue Packing #2

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>N/A</u>	Fluorescent Lights
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>N/A</u>	Old Thermostats
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS – 1 Furnace in Attic.

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 1 Breaker Box in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>N/A</u>	Oil Tanks
<u>N/A</u>	Well Abandonment
<u>N/A</u>	Junk Auto Tires
<u>N/A</u>	Junk Vehicles

* 1 Gas Meter on Exterior

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the dwelling at 2532-34 North 39th Street, Milwaukee, Wisconsin.

The inspection included plaster, texture, transite, tar paper, window glazing compound, linoleum, paper insulation, drywall/joint compound, linoleum, felt paper, blown in insulation, duct paper, and flue packing to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On March 6, 2014 HMG conducted an asbestos inspection of a three family dwelling, scheduled for mechanical demolition, located at 2532-34 North 39th Street, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14730.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk

sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, texture, transite, tar paper, window glazing compound, linoleum, paper insulation, drywall/joint compound, linoleum, felt paper, blown in insulation, duct paper, and flue packing. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1	Exterior – west wall under vinyl siding – transite siding	Positive 30% Chrysotile	2,500 Sq. Ft.	MTP
2	Exterior – south wall under vinyl siding – transite siding	Positive 30% Chrysotile	Reference Sample 1	MTP
3	Exterior – east wall under vinyl siding – transite siding	Positive 30% Chrysotile	Reference Sample 1	MTP
4	Exterior – west wall under transite – tar paper	Negative	N/A	MPT
5	Exterior – south wall under transite – tar paper	Negative	N/A	MPT

TFPyLight	Light Gray Flue Packing
TFPt	Tan Flue Packing
TDW	Duct Paper

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

Note#4: Additional duct paper may be within walls and ceilings.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>N/A</u>	Fluorescent Lights
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>1</u>	Old Thermostats – 2 nd Floor Dining Room
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS – 2 Furnaces in Basement

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 2 Breaker Boxes in Basement.

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>N/A</u>	Oil Tanks
<u>N/A</u>	Well Abandonment
<u>N/A</u>	Junk Auto Tires
<u>N/A</u>	Junk Vehicles

* 3 Gas Meters on Exterior

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the building at 2001 West Clarke Street, Milwaukee, Wisconsin.

The inspection included plaster, paper insulation, ceiling tile, linoleum, tar paper, window glazing compound, flue packing, aircell pipe insulation, and fittings to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On February 17, 2014 HMG conducted an asbestos inspection of a mixed use building, scheduled for mechanical demolition, located at 2001 West Clarke Street, Milwaukee, Wisconsin. The inspection was conducted by Demicca Coe, Wisconsin License No. AII – 156385.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk

sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, paper insulation, ceiling tile, linoleum, tar paper, window glazing compound, flue packing, aircell pipe insulation, and fittings. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1-2001	Exterior – south wall under wood – tar paper	Negative	N/A	MPT
2-2001	Exterior – west wall under wood – tar paper	Negative	N/A	MPT
3-2001	Exterior – west wall under wood – tar paper	Negative	N/A	MPT
4-2001	1 st floor – living room – west side – 1' x 1' ceiling tile	Negative	N/A	MSCT11
5-2001	1 st floor – living room – east side – 1' x 1' ceiling tile	Negative	N/A	MSCT11
6-2001	2 nd floor – south room – 1' x 1' ceiling tile	Negative	N/A	MSCT11
7-2001a	2 nd floor – bedroom – west wall – plaster skim coat	Negative	N/A	SPI
7-2001b	2 nd floor – bedroom – west wall – plaster base coat	Negative	N/A	SPI
8-2001a	2 nd floor – pantry – south wall – plaster skim coat	Negative	N/A	SPI
8-2001b	2 nd floor – pantry – south wall – plaster base coat	Negative	N/A	SPI
9-2001a	1 st floor – bathroom – south wall – plaster skim coat	Negative	N/A	SPI
9-2001b	1 st floor – bathroom – south wall – plaster base coat	Negative	N/A	SPI
10-2001a	2 nd floor – stair – north wall – plaster skim coat	Negative	N/A	SPI
10-2001b	2 nd floor – stair – north wall – plaster base coat	Negative	N/A	SPI
11-2001	1 st floor – bathroom – west wall – plaster	Negative	N/A	SPI
12-2001	1 st floor – pantry – black linoleum	Negative	N/A	MFLk
13-2001	1 st floor – bathroom – remnant on floor – beige linoleum	Negative	N/A	MFLe
14-2001	1 st floor – bathroom – remnant on floor – tan linoleum	Negative	N/A	MFLt
15-2001	1 st floor – bathroom – remnant on floor – orange linoleum	Negative	N/A	MFLo
16-2001	1 st floor – sink room – under floor tile – tar paper	Negative	N/A	MPT
17-2001	1 st floor – closet – west window – glazing compound	Negative	N/A	MPG
18-2001	2 nd floor – bedroom – east window – glazing compound	Negative	N/A	MPG
19-2001	Basement – north window – glazing compound	Negative	N/A	MPG
20-2001	1 st floor – store area – under floor tile – green linoleum	Negative	N/A	MFLg
21-2001	Basement – on southeast chimney – flue packing	Positive 10% Chrysotile	2 Sq. Ft.	TFP

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
22-2001	Basement – on northeast chimney north side – flue packing #2	Negative	N/A	TFP2
23-2001	Basement – on northeast chimney north side – flue packing #3	Negative	N/A	TFP3
24-2001	Basement – <5” diameter pipe insulation fitting	Positive 20% Chrysotile	28 Fittings	TM5
25-2001	Basement northeast – <5” diameter aircell pipe insulation 100 sq. ft. of floor contaminated	Positive 70% Chrysotile	220 Ln. Ft.	TA5
26-2001	Basement southeast – <5” diameter aircell pipe insulation	Positive 75% Chrysotile	Reference 25-2001	TA5
27-2001	Basement oil tank room – <5” diameter aircell pipe insulation	Positive 85% Chrysotile	Reference 25-2001	TA5
28-2001	2 nd floor – stair – on landing – brown linoleum	Negative	N/A	MFLn
29-2001	2 nd floor – bedroom – black and green linoleum	Negative	N/A	MFLkg

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet
Ln. Ft. = Linear Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	1,100 Sq. Ft.
1 st	Hall/Store/Sink Room/Kitchen	Floor Tile & Mastic	750 Sq. Ft
1 st	Living Room/Pantry/Bathroom/ Stair	Floor & Ceiling Mastic	220 Sq. Ft
2 nd	Bedroom	Floor Mastic	130 Sq. Ft

Homogeneous Material Codes

SPI	Plaster
MPI	Paper Insulation
MSCT11	1' x 1' Ceiling Tile
MPT	Tar Paper
MPG	Glazing Compound
MFLk	Black Linoleum
MFLe	Beige Linoleum
MFLt	Tan Linoleum
MFLo	Orange Linoleum
MFLg	Green Linoleum
MFLn	Brown Linoleum
MFLkg	Black & Green Linoleum
TFP	Flue Packing
TFP2	Flue Packing #2
TFP3	Flue Packing #3
TM5	<5” Diameter Pipe Insulation Fitting
TA5	<5” Diameter Aircell Pipe Insulation

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

Note#4: Additional aircell and fittings may be within walls and ceilings.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>4</u>	Fluorescent Lights – 1 st Floor Office & Bathroom
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>N/A</u>	Old Thermostats
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 3 Breaker Boxes in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>2</u>	Oil Tanks – Basement
<u>N/A</u>	Well Abandonment
<u>N/A</u>	Junk Auto Tires
<u>N/A</u>	Junk Vehicles

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the dwelling at 1303 West Meinecke Avenue, Milwaukee, Wisconsin.

The inspection included plaster, texture, window glazing compound, paper insulation, linoleum, fiberboard, ceiling tile, leveling compound, aircell insulation, flue packing, floor tile, and drywall/joint compound and to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On March 13, 2014 HMG conducted an asbestos inspection of a three family dwelling, scheduled for mechanical demolition, located at 1303 West Meinecke Avenue, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14370.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled except where on concrete.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, texture, window glazing compound, paper insulation, linoleum, fiberboard, ceiling tile, leveling compound, aircell insulation, flue packing, floor tile, and drywall/joint compound. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1	Basement – south window – glazing compound	Negative	N/A	MPG
2	Exterior – east wall under wood siding – paper insulation	Negative	N/A	MPI
3	Exterior – north wall under wood siding – paper insulation	Negative	N/A	MPI
4	Exterior – west wall under wood siding – paper insulation	Negative	N/A	MPI
5	1 st floor – kitchen – brown linoleum	Negative	N/A	MFLn
6	1 st floor – west entry – brown and black linoleum	Negative	N/A	MFLnk
7	1 st floor – west entry – under linoleum – fiberboard	Negative	N/A	MFB
8a	1 st floor – living room – east side under carpet – black linoleum	Negative	N/A	MFLk
8b	1 st floor – living room – east side under black linoleum – red linoleum	Negative	N/A	MFLr
9	1 st floor – living room – west side under carpet – black linoleum	Negative	N/A	MFLk
10	1 st floor – living room – north side under carpet – black linoleum	Negative	N/A	MFLk
11	1 st floor – bathroom – 2' x 4' grooved ceiling tile	Negative	N/A	MSCT24G
12	2 nd floor – kitchen - brown and tan linoleum	Negative	N/A	MFLnt
13	2 nd floor – bathroom - brown and gray linoleum	Negative	N/A	MFLny
14	2 nd floor – bathroom – at door – leveling compound	Negative	N/A	MLC
15	2nd floor – north bedroom – north side under carpet – orange linoleum	Positive 25% Chrysotile	180 Sq. Ft.	MFLo
16	2nd floor – north bedroom – south side under carpet – orange linoleum	Positive 25% Chrysotile	Reference Sample 15	MFLo
17	2nd floor – north bedroom – west side under carpet – orange linoleum	Positive 25% Chrysotile	Reference Sample 15	MFLo
18	2nd floor – west bedroom – under carpet – gold linoleum	Positive 25% Chrysotile	125 Sq. Ft.	MFLd
19	2 nd floor – living room – 2' x 4' pinholed and grooved ceiling tile	Negative	N/A	MSCT24PG

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
20a	2 nd floor – north bedroom – east wall – plaster skim coat	Negative	N/A	SPI
20b	2 nd floor – north bedroom – east wall – plaster base coat	Negative	N/A	SPI
21	2 nd floor – living room – west wall – plaster	Negative	N/A	SPI
22a	2 nd floor – bathroom – south wall – plaster skim coat	Negative	N/A	SPI
22b	2 nd floor – bathroom – south wall – plaster base coat	Negative	N/A	SPI
23a	Basement – living room – ceiling – patch layer	Negative	N/A	SPI
23b	Basement – living room – ceiling – plaster skim coat	Negative	N/A	SPI
23c	Basement – living room – ceiling – plaster base coat	Negative	N/A	SPI
24	Basement – bedroom – south wall – plaster	Negative	N/A	SPI
25	2 nd floor – kitchen – ceiling north side – texture	Negative	STX	MDW
26	2 nd floor – kitchen – ceiling west side – texture	Negative	STX	MDW
27	2 nd floor – kitchen – ceiling south side – texture	Negative	STX	MDW
28	Basement – stair landing – tan linoleum	Negative	N/A	MFLt
29	Basement – stair – debris on steps – aircell insulation <i>Quantity is area of contaminated floor on steps and east room</i>	Positive 65% Chrysotile	120 Sq. Ft.	TA
30	Basement – east room – on west wall – flue packing	Positive 15% Chrysotile	2 Sq. Ft.	TFP
31	Basement – stair – on lower concrete landing – 12” red floor tile	Positive 3% Chrysotile	45 Sq. Ft.	MF12r
31	Basement – stair – on lower concrete landing – under floor tile – mastic	Negative	N/A	MF12r
31	Basement – stair – on lower concrete landing – under mastic – leveling compound	Negative	N/A	MF12r
32	Basement – hall under carpet - 12” gray floor tile	Positive 4% Chrysotile	20 Sq. Ft.	MF12y
32	Basement – hall under gray floor tile – mastic	Negative	N/A	MF12y
32	Basement – hall 3rd layer - 12” yellow and brown floor tile on concrete	Positive 4% Chrysotile	20 Sq. Ft.	MF12ln
32	Basement – hall under yellow and brown floor tile – mastic	Negative	N/A	MF12ln
33a	Basement – bathroom – 12” yellow floor tile	Negative	N/A	MF12l
33b	Basement – bathroom – under yellow floor tile – mastic	Negative	N/A	MF12l
34	Basement – bathroom – 1’ x 1’ ceiling tile	Negative	N/A	MSCT11
35	Basement – bathroom wall – fiberboard	Negative	N/A	MFB
36	Basement – kitchen – south side – beige and gray linoleum	Negative	N/A	MFLeY
37	Basement – kitchen – center – beige and gray linoleum	Negative	N/A	MFLeY
38	Basement – kitchen – north side – beige and gray linoleum	Negative	N/A	MFLeY
39	Basement – kitchen – ceiling – texture #2	Negative	N/A	STX2
40	Basement – living room – ceiling – texture #2	Negative	N/A	STX2
41	Basement – bedroom – ceiling – texture #2	Negative	N/A	STX2

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
42a	2 nd floor – bathroom – west wall – joint compound	Negative	N/A	MDW
42b	2 nd floor – bathroom – west wall – drywall	Negative	N/A	MDW

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	700 Sq. Ft.
1 st	Kitchen/Bathroom/Stair	Floor Tile & Mastic	380 Sq. Ft.
1 st	Entry	Floor Mastic	80 Sq. Ft.
2 nd	Bathroom	Floor Mastic	40 Sq. Ft.
2 nd	Kitchen	Floor Tile & Mastic	200 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
STX	Texture
STX2	Texture #2
MPG	Glazing Compound
MFLn	Brown Linoleum
MFLnk	Brown & Black Linoleum
MFLk	Black Linoleum
MFLr	Red Linoleum
MFLnt	Brown & Tan Linoleum
MFLny	Brown & Gray Linoleum
MFLo	Orange Linoleum
MFLd	Gold Linoleum
MFLt	Tan Linoleum
MFLye	Gray & Beige Linoleum
MLC	Leveling Compound
MSCT24G	2' x 4' Grooved Ceiling Tile
MSCT24PG	2' x 4' Pinholed & Grooved Ceiling Tile
MSCT11	1' x 1' Ceiling Tile
MF12r	12" Red Floor Tile
MF12y	12" Gray Floor Tile
MF12ln	12" Yellow & Brown Floor Tile
MF12l	12" Yellow Floor Tile
MPI	Paper Insulation
MFB	Fiberboard
MFB2	Fiberboard #2
MDW	Drywall/Joint Compound
TA	Aircell Insulation
TFP	Flue Packing

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

Note#4: Additional aircell may be within walls and ceilings.

V. EXCLUSIONS

Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>N/A</u>	Refrigerators, Freezers, Chillers
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>N/A</u>	Fire Extinguishers (both portable and installed HALON suppression systems)
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>N/A</u>	Fluorescent Lights
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>N/A</u>	Old Thermostats
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>N/A</u>	Space Heaters

ELECTRICAL SYSTEMS – 1 Breaker Box & 1 Electric Meter in Basement

<u>N/A</u>	Load Meters and Supply Relays
<u>N/A</u>	Phase Splitters
<u>N/A</u>	Microwave Relays
<u>N/A</u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building where PCBs may be found:

<u>N/A</u>	Transformers
<u>N/A</u>	Capacitors (appliances, electronic equipment)
<u>N/A</u>	Heat Transfer Equipment
<u>N/A</u>	Light Ballasts
<u>N/A</u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u>N/A</u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u>N/A</u>	Hazardous Waste
<u>N/A</u>	Oil Tanks
<u>N/A</u>	Well Abandonment
<u>N/A</u>	Junk Auto Tires
<u>N/A</u>	Junk Vehicles

I. INTRODUCTION

Harenda Management Group (HMG) was retained by the City of Milwaukee Department of Neighborhood Services to conduct an inspection for possible asbestos containing materials in the dwelling 1865 North Humboldt Avenue Street, Milwaukee, Wisconsin.

The inspection included plaster, texture, flue packing, linoleum, window glazing compound, and fiberboard to determine if asbestos containing materials were present within the space as required by *US EPA NESHAP regulation 40 CFR 61 Subpart M*.

II. BUILDING SURVEY

Marge Piwaron, of the City of Milwaukee Department of Neighborhood Services, authorized HMG to conduct a building survey and to analyze samples taken during the inspection.

On February 27, 2014 HMG conducted an asbestos inspection of a three family dwelling, scheduled for mechanical demolition, located at 1865 North Humboldt Avenue, Milwaukee, Wisconsin. The inspection was conducted by Dean Jacobsen, Wisconsin License No. AII – 14730.

The inspection was comprised of three elements:

1. A visual determination as to the extent of suspect materials within the building.
2. Sampling and documentation of observable suspect materials. Category I non-friable materials were assumed to be asbestos containing and not sampled.
3. Quantification of observable positive materials existing within the spaces.

The results of the survey integrated with the Polarized Light Microscopy with Dispersion Staining (PLM/DS) analysis of bulk samples taken are outlined in this document. If you have any questions please contact HMG at (414) 383-4800.

III. THE LABORATORY

A. METHOD OF ANALYSIS

Analysis is performed by using the bulk samples for visual observation and slide preparation(s) for microscopical examination and identification. The slides are analyzed for asbestos (chrysotile, amosite, crocidolite, anthophyllite, and actinolite/ tremolite), fibrous non asbestos constituents (mineral wool, paper, etc.), and nonfibrous constituents. Asbestos is identified by refractive indices (obtained by using dispersion staining), morphology, color, pleochroism, birefringence, extinction characteristics, and signs of elongation. The same characteristics are used to identify the non asbestos constituents.

The microscopist visually estimates relative amounts of each constituent using a stereoscope if necessary. The test results are based on a visual determination of relative volume of the bulk sample components. The results are valid only for the item tested. Current US EPA NESHAP

regulations state asbestos materials means material containing more than 1% asbestos as determined using the method specified in Appendix E, Subpart E, 40 CFR Part 763 Section I, Polarized Light Microscopy. Refer to 29 CFR 1926.1101 (Construction) and 29 CFR 1910.1001 (General Industry) for specific OSHA requirements.

IV. FINDINGS AND OBSERVATIONS

The materials identified as suspect asbestos containing materials (ACM) include plaster, texture, flue packing, linoleum, window glazing compound, and fiberboard. These materials were sampled and the following results were noted:

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
1	Basement – on chimney – flue packing	Negative	N/A	TFP
2	1 st floor – bathroom – white and gray linoleum	Negative	N/A	MFLwy
3a	1st floor – northwest bedroom – west wall – patch layer	Positive 3% Chrysotile	80 Sq. Ft.	SPI
3b	1 st floor – northwest bedroom – west wall – plaster skim coat	Negative	N/A	SPI
3c	1 st floor – northwest bedroom – west wall – plaster base coat	Negative	N/A	SPI
4a	1 st floor – southwest bedroom – east wall – plaster skim coat	Negative	N/A	SPI
4b	1 st floor – southwest bedroom – east wall – plaster base coat	Negative	N/A	SPI
5a	1 st floor – dining room – south wall – plaster skim coat	Negative	N/A	SPI
5b	1 st floor – dining room – south wall – plaster base coat	Negative	N/A	SPI
6a	1 st floor – living room – north wall – plaster skim coat	Negative	N/A	SPI
6b	1 st floor – living room – north wall – plaster base coat	Negative	N/A	SPI
7a	1 st floor – front entry – east wall – plaster skim coat	Negative	N/A	SPI
7b	1 st floor – front entry – east wall – plaster base coat	Negative	N/A	SPI
8	1st floor – kitchen – north window – glazing compound	Positive 2% Chrysotile	35 Windows	MPG
9	1 st floor – dining room – south window – glazing compound	Negative	N/A	MPG
10	Basement – east window – glazing compound	Positive 3% Chrysotile	Reference Sample 8	MPG
11	1 st floor – dining room closet – ceiling – texture	Negative	N/A	STX
12a	1 st floor – dining room closet – west wall – texture	Negative	N/A	STX
12b	1 st floor – dining room closet – west wall – texture layer 2	Negative	N/A	STX
13	1 st floor – dining room closet – south wall – texture	Negative	N/A	STX
14	1 st floor – bathroom ceiling – texture #2	Negative	N/A	STX2

Sample #	Location and Description	Results	Approximate Quantity	Homogeneous Code
15a	Exterior – east wall under shingle siding – tar paper	Negative	N/A	MPT
15b	Exterior – east wall under shingle siding – fiberboard	Negative	N/A	MFB
16a	Exterior – south wall under shingle siding – tar paper	Negative	N/A	MPT
16b	Exterior – south wall under shingle siding – fiberboard	Negative	N/A	MFB
17a	Exterior – west wall under shingle siding – tar paper	Negative	N/A	MPT
17b	Exterior – west wall under shingle siding – fiberboard	Negative	N/A	MFB

Notes: N/A = Not Applicable
Sq. Ft. = Square Feet

Assumed Category I Non-Friable Asbestos Containing Material:

Floor Level	Location	Description	Approximate Quantity
Roof	Dwelling	Asphalt Shingles & Flashing	1,000 Sq. Ft.
1 st / 2 nd	Dwelling	Asphalt Shingle Siding	2,800 Sq. Ft.
1 st	Bathroom	Floor Mastic	40 Sq. Ft.

Homogeneous Material Codes

SPI	Plaster
STX	Texture
STX2	Texture #2
MPG	Glazing Compound
MFLwy	White & Gray Linoleum
MFB	Fiberboard
MPT	Tar Paper
TFP	Flue Packing

Note#1: Category I – Non-Friable Asbestos Containing Materials may become friable during mechanical demolition activities or maybe considered friable prior to demolition activities due to its current condition.

Note#2: If additional materials are discovered during demolition that are not listed above they are to be assumed to be asbestos containing.

Note#3: A copy of this report should be transmitted to the demolition contractor.

V. EXCLUSIONS

Stair missing – no access to 2nd floor or attic. East ½ basement floor covered with debris and not accessible. Roof visible only from ground. No visible or accessible areas were excluded from the scope of work.

HMG is not and shall not represent the building owner as its agent or representative for the purpose of the US EPA/NESHAP and/or the WDNR/NR447 regulations, as owner/operator.

This report represents the condition of the building and its visible/accessible suspect asbestos containing materials at the date and the times of the onsite inspection. Hidden materials or those materials that could be present at the point of inspection, over and above those stated in the inspection report, are the responsibility of the building owner and the demolition contractor.

VI. LIMITATIONS

The care and skill given to our procedures insures the most reliable test results possible. HMG utilizes Quantem Laboratories for our Polarized Light Microscopy, unless otherwise specified by the client. The findings and conclusions of HMG represent our professional opinions extrapolated from limited data. Significant limited data is gathered during the course of the preliminary asbestos specific site assessment. No other warranty is expressed or implied. Prior to any abatement or renovation activities, it is recommended that HMG be provided the opportunity to review such plans in order that the inspection and assessments contained herein are properly interpreted and implemented.

This report and the information contained herein are prepared for the sole and exclusive use and possession of the City of Milwaukee Department of Neighborhood Services. No other person or entity may rely on this report or any information contained herein. Any dissemination of the Report or any information contained herein is strictly prohibited without prior written authorization from Harenda Management Group.

VII. PRE-DEMOLITION ENVIRONMENTAL CHECKLIST

This guide lists materials and products commonly found in buildings with examples. It is not intended as a substitute for reading the rules and statutes and making your own independent determination of their applicability to your demolition project. These examples presented here do not represent an exhaustive listing of types of materials that may be required to be removed from the building prior to demolition.

ASBESTOS

Persons conducting inspections for asbestos must hold a valid asbestos inspector certification card issued by the State of Wisconsin, Dept. of Health & Family Services. **Please follow the Asbestos Inspection and Sampling Protocol for Buildings to be Demolished or Renovated.**

CFCs and HALONS

Equipment that may contain CFCs and Halons:

<u>N/A</u>	Air Conditioners (roof top, room, and central)
<u>N/A</u>	Dehumidifiers
<u>N/A</u>	Heat Pumps
<u>2</u>	Refrigerators , Freezers, Chillers – 1 st Floor Kitchen
<u>N/A</u>	Vending Machines, Food Display Cases
<u>N/A</u>	Walk-in Coolers
<u>N/A</u>	Water Fountains (bubblers)
<u>1</u>	Fire Extinguishers (both portable and installed HALON suppression systems) – 1 st Floor Kitchen
<u>N/A</u>	Water Coolers

LEAD

Lead or Lead Based Paint (LBP) is common in many older buildings. When recycling construction and demolition debris, be aware that wood containing lead paint may not be chipped and spread for landscaping. State law also prohibits the sale or transfer of any fixture or other object containing LBP that might be placed upon any surface of a dwelling, which is ordinarily accessible to children.

MERCURY

Products that may contain mercury:

LIGHTING

<u>6</u>	Fluorescent Lights - 1 st Floor Bedroom, Basement
<u>N/A</u>	High Intensity Discharge -Metal Halide -High Pressure Sodium -Mercury Vapor
<u>N/A</u>	Neon
<u>N/A</u>	Switches for lighting using mercury relays -Look for any control associated with exterior or automated lighting systems such as "Silent" wall switches.

HVAC

Check thermostats and any control associated with air handling units for switches containing mercury.

HEATING, VENTILATING AND AIR CONDITIONING SYSTEMS

<u>1</u>	Old Thermostats – 1 st Floor Dining Room
<u>N/A</u>	Aquastats
<u>N/A</u>	Firestats
<u>N/A</u>	Manometers
<u>N/A</u>	Thermometers

BOILERS, FURNACES, HEATERS AND TANKS – 2 Furnaces, 1 Boiler, & 2 Water Heaters in Basement

<u>N/A</u>	Mercury Flame Sensors by pilot lights
<u>N/A</u>	Manometers, Thermometers, Gauges
<u>N/A</u>	Pressure-trol
<u>N/A</u>	Float or Level Controls
<u>1</u>	Space Heaters – Basement

ELECTRICAL SYSTEMS – 3 Electric Meters on Exterior. 3 Breaker Boxes in Basement

<u> N/A </u>	Load Meters and Supply Relays
<u> N/A </u>	Phase Splitters
<u> N/A </u>	Microwave Relays
<u> N/A </u>	Mercury Displacement Relays

PCBs

For electrical devices manufactured prior to 1987, it is safe to assume that they contain PCBs and should be managed accordingly. Most equipment manufactured after this time will say "PCB Free". The following is a list of areas in a building were PCBs may be found:

<u> N/A </u>	Transformers
<u> N/A </u>	Capacitors (appliances, electronic equipment)
<u> N/A </u>	Heat Transfer Equipment
<u> 1 </u>	Light Ballasts - Basement
<u> N/A </u>	Specialty Paints (such as for swimming pools or other industrial applications)
<u> N/A </u>	Sumps or Oil Traps (in maintenance and industrial facilities)

OTHER ENVIRONMENTAL ISSUES

<u> N/A </u>	Hazardous Waste
<u> N/A </u>	Oil Tanks
<u> N/A </u>	Well Abandonment
<u> 1 </u>	Junk Auto Tires – Basement
<u> N/A </u>	Junk Vehicles

* 3 Gas Meters, 1 Gallon Pesticide, 3 Gallons Paint, & 1 Gallon Antifreeze in Basement

Polarized Light Microscopy Asbestos Analysis Report

Quantem Lab No. 232504	Client: Harenda Management Group
Account Number: B929	Jolene Harenda
Date Received: 02/28/2014	1237 West Bruce St.
Received By: Joanna Mueller	Milwaukee, WI 53204
Date Analyzed: 03/05/2014	Project: DNS
Analyzed By: Gayle Ooten	Project Location: Milwaukee, WI
Methodology: EPA/600/R-93/116	Project Number: 14-200-061.1865

Quantem Sample ID	Client Sample ID	Composition	Color / Description	Asbestos (%)	Non-Asbestos Fiber (%)	Non Fibrous
009	9	Homogeneous	White Window Glazing	Asbestos Not Present	NA	CaCO3
010	10	Homogeneous	White Window Glazing	Asbestos Present Chrysotile 3	NA	CaCO3
011	11	Homogeneous	White Texture	Asbestos Not Present	NA	CaCO3 Paint
012	12	Layered	White Texture	Asbestos Not Present	NA	CaCO3 Paint
012a		Layered	White Texture	Asbestos Not Present	NA	CaCO3 Paint
013	13	Homogeneous	White Texture	Asbestos Not Present	NA	CaCO3 Paint
014	14	Homogeneous	White Texture	Asbestos Not Present	NA	CaCO3 Paint

Unless otherwise noted, upon receipt the condition of the sample was acceptable for analysis.

Quantem is a NVLAP accredited PLM laboratory (Lab Code: 101959-0). This report relates only to the specific items tested. NVLAP accreditation applies only to analysis performed utilizing EPA/600/M4-82-020 and EPA/600/R-93/116 methods. This report may not be used to claim product endorsement by NVLAP or any agency of the US Government. This report may not be reproduced except in full, without the written approval of the laboratory.
