Commissioner of Health Statement Regarding Mildred Leigh-Gold

Mildred Leigh-Gold was one of the most dedicated and passionate individuals in the fight against breast and cervical cancer. Mildred spent 17 years at the helm of the City of Milwaukee's Breast and Cervical Cancer Awareness Program. She was a true inspiration for women and families coping with disease and worked tirelessly to advocate for improved healthcare and benefits for low-income women. She received countless well-deserved national and state commendations for her work. Her passing will be felt by many, but her contributions in the field of breast and cervical cancer reduction will benefit many more for years to come.
