Council approves legislation creating a City Board of Health

The Common Council today approved legislation creating a **Board of Health** to play a multifaceted role in helping to promote, protect and improve the health and wellbeing of Milwaukee residents.

The measure to create the Board of Health – Council File #180919 – is an ordinance authored by **Alderman Chantia Lewis**, and was unanimously approved by the Council. The ordinance creates a nine-member Board to be appointed by the Mayor and confirmed by the Council.

“The Board of Health will function as a partner with the Mayor, Common Council, and the Milwaukee Health Department (MHD), and will work to improve overall public health outcomes by ensuring a constant flow of information focused on key health issues,” said Ald. Lewis. “This effort and focus will allow the Council to allocate resources for MHD programming and other services to citizens where needed.”

“It is my belief and hope that the Board will help all of us achieve a much healthier Milwaukee for our current residents and future generations,” continued Ald. Lewis.

According to the ordinance, the Board would:

- Assure the enforcement of state public health statutes and public health rules of the state Department of Health Services as prescribed for a level III local health department.

-More-

Board of Health/ADD ONE

- Assure the Health Department operates as a level III local health department as defined by the state.
- Report to the state Department of Health Services as required.
- Meet at least quarterly.
- Assess public health needs and advocate for the provision of reasonable and necessary public health services.
- Develop policy and provide leadership that fosters local involvement and commitment, that emphasizes public health needs and that advocates for equitable distribution of public health resources and complementary private activities commensurate with public health needs.
- Assure that measures are taken to provide an environment in which individuals can be healthy.
