

Certificate of Recording Officer
WEST CAPITOL DRIVE AND NORTH 35TH STREET "CENTURY CITY" PROJECT AREA

I, Joel Brennan, Assistant Executive Director-Secretary of the Redevelopment Authority of the City of Milwaukee, do certify that the attached Redevelopment Plan for the West Capitol Drive and North 35th Street "Century City" Project Area is a true and exact copy of the redevelopment plan as adopted and approved for recording by, respectively, the Redevelopment Authority of the City of Milwaukee on May 19, 2005, in Resolution Number 9718, and by the Common Council of the City of Milwaukee on June 14, 2005 in Resolution Number 050190, on file and record, pursuant to Section 66.113, Wisconsin Statutes.

In Testimony Whereof, for and on behalf of the Redevelopment Authority of the City of Milwaukee, I have hereunto sent my hand and caused the seal of said authority to be affixed this 2nd day of Nov., 2005.

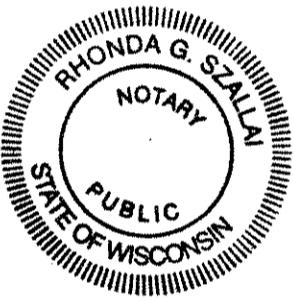

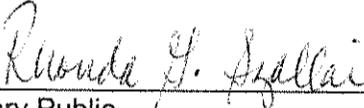

Joel Brennan
Assistant Executive Director-Secretary
Redevelopment Authority of the City of Milwaukee

STATE OF WISCONSIN)
)SS
COUNTY OF MILWAUKEE)

Personally came before me this 2nd day of November, 2005, Joel Brennan, who acknowledged himself to be the Assistant Executive Director-Secretary of the Redevelopment Authority of the City of Milwaukee, a Corporation, and that he, as such officer of said Corporation, being authorized so to do, executed the foregoing instrument as such officer of said Redevelopment Authority, by its authority.

This document was drafted by the City of Milwaukee, Department of City Development.

Notary Public
My commission expires 11-2-2008

A. INTRODUCTION

On March 16, 2005, the Common Council adopted resolution file no. 041510 approving the boundary for the West Capitol and North 35th Street Redevelopment Project Area and authorized the Redevelopment Authority of the City of Milwaukee (RACM) to prepare a Plan in accordance with Section 66.1333, Wisconsin Statutes. The Mayor signed the resolution on March 23, 2005.

This redevelopment plan is prepared pursuant to Section 66.1333(6)(b)(2), formerly a subsection of Section 66.431, Wisconsin Statutes, which requires, "Approval by the authority and by two-thirds of the local legislative body of the redevelopment plan of the project area which has been prepared by the authority. The redevelopment plan shall conform to the general plan of the city and shall be sufficiently complete to indicate its relationship to definite local objectives as to appropriate land uses, improved traffic, public transportation, public utilities, recreational and community facilities, and other public improvements in the project area. The redevelopment plan shall include a statement of the boundaries of the project area; a map showing existing uses and conditions of the real property; a land use plan showing proposed uses of the area; information showing the standards of population density, land coverage and building intensity in the area after redevelopment; present and potential equalized value for property tax purposes; a statement of proposed changes in zoning ordinances or maps and building codes or ordinances; a statement as to the kind and number of site improvements and additional public utilities which will be required to support the new land uses in the area after redevelopment; and a statement of a feasible method proposed for the relocation of families to be displaced from the project area".

B. DESCRIPTION OF THE PROJECT

The 35th St. and Capitol Dr. Project Area (also known as Tower Automotive and previously known as A. O. Smith) was entirely in use as a motor vehicle frame manufacturing site. The southern portion of the Project Area continues to be used for that purpose. The rest of the site consists of vacant buildings and property. The Canadian Pacific (Soo Line) railroad runs through the Project Area in a roughly north-south direction. The portion of the site west of the railroad has recently been re-subdivided and two parcels sold, one for a city maintenance facility and the other for use by two small industrial companies.

The Project Area comprises 156.25 net acres and 20 parcels. It is a prominent location in the north central area of the city and provides an opportunity to develop attractive and productive business sites, thus providing jobs for surrounding communities. Two large central contiguous areas of 61.36 and 74.04 acres are separated from each other by the railroad and from nearby smaller parcels by arterial streets. These smaller parcels could be used for a number of purposes, but are currently parking lots or vacant. The site has known environmental contamination problems regarding both soils and buildings. The extent of these problems is not entirely known, creating a disincentive to market re-investment and master planning for the site's redevelopment.

The City of Milwaukee has an agreement to purchase 24.64 acres of the Project Area for the future home of the Department of Public Works Field Headquarters. Demolition and site preparation is underway. The City's existing Traser Yard facilities and the Milwaukee Water Works' Lincoln Avenue and Cameron Avenue distribution facilities will be combined in a newly constructed modern \$24 million complex between Nash and Melvina Streets on N. 35th St. More than 480 city workers will work out of the facility.

Capitol Drive has seen significant reinvestment one mile west and two miles east of the site in the form of the \$53 million Midtown Center and the Riverworks mixed-use commercial area, respectively.

1. Plan Objectives

The primary goal of this Project is to promote the attractive, productive and efficient use or reuse of land and buildings (where possible) in the Project Area in a manner that provides high quality sites for business and industry while benefiting the surrounding community.

- a. Promote land uses in the project area that tend to lead to relatively more capital investment and more family-supporting jobs by restricting land uses that tend not to do so.
- b. Promote development that provides a minimum job density of 15 jobs per acre and compensation of \$11.58 or more per hour in 2005 dollars. (This level of pay permits two working people to support a family of four according to the Wisconsin Women's Network in partnership with Wider Opportunities for Women, a national women's employment organization. See <http://www.jsonline.com/news/state/apr04/222099.asp> for more information.)
- c. Develop a detailed master plan for the Project Area or encourage current and future owners, developers and lessees to develop and implement individual redevelopment plans that remodel, adaptively reuse or enlarge existing buildings, or build new buildings.
- d. Mitigate environmental contamination in the soils and buildings that interfere with investment in and the use/reuse of land and buildings in the Project Area through state-of-the-art means.
- e. Avoid buildings and land being vacant and unused for long periods of time, which results in a blighting influence on the surrounding community.
- f. Assure that all of the project area is platted in a manner that optimizes business development. Encourage use of the site by businesses and industries that require large sites.

- g. Assure that the project's developer provides necessary transportation and utility improvements to support the productive and efficient use of land in the Project Area.
- h. Assure that any new development in the Project Area presents attractive massing, form, materials, and landscaping to major streets from which the development is visible, appropriate to its zoning.
- i. Assure that all development complies with all storm water regulations and contemporary practices.

RACM will use these objectives in its review of all development proposals.

2. Proposed Renewal Actions

To accomplish the objectives of this plan the Redevelopment Authority may exercise any or all of the powers provided to it under Section 66.1133 (4) Wisconsin Statutes.

- a. Further limit permitted land uses within the portion of the Project Area now zoned Industrial Heavy. RACM reserves the right to recommend future zoning changes pursuant to the above primary goal and objectives.
- b. Work with the owner/developer to design and implement new street and parcel configurations if necessary to support redevelopment of the project area.
- c. Work with the owner/developer to attract development projects that provide the desired recommended job density and pay levels.
- d. All proposals and plans for new construction within the project area, including substantial remodeling, conversion or rebuilding, enlargement, or extension of major structural improvements on existing buildings or structures, and for any related improvements on the subject site, shall be referred to and reviewed by RACM to determine conformance with the objectives of the Plan. Proposals and plans not in conformance shall not be approved for permit.

3. Land Use Provisions

Any new tax-exempt use in the Project Area must be approved by both the Authority and the Common Council before a building and/or occupancy permit will be issued by the City of Milwaukee.

Currently the Project Area is mostly zoned IH, with smaller but substantial areas of LB2 and IO2, as shown on Map No. 2. (A remnant parcel is also zoned RT3.) The purposes of these zoning districts are explained in Exhibit B at the end of this Plan.

This Plan places further restrictions on permitted land uses on the portions of the Project Area zoned Industrial Heavy (IH) as indicated below. The following use table indicates how land currently zoned IH will be regulated by the adoption of this Redevelopment Plan for the 35th St. and Capitol Dr. Project Area. The column headed "Current IH Use Classification" shows how land uses are classified by Chapter 295 of the City of Milwaukee Zoning Code for the IH zoning district. The column headed "Additional Use Restrictions" indicates restrictions added by this Redevelopment Plan for 35th St. and Capitol Dr. Project Area to the uses classified in IH.

- a. "Y" indicates a permitted use. This use is permitted as a matter of right subject to all development standards in this plan.
- b. "L" indicates a limited use for 35th St. and Capitol Dr. Project Area. This use is permitted only when the commissioner finds that the use will meet the standards of this table. If the use cannot meet these standards, it shall be permitted only if the Board of Zoning Appeals approves a special use permit pursuant to s. 295-305-2 of the Milwaukee Code, unless otherwise prohibited by the use table.
- c. "C" indicates a conditional use wherein the use is permitted only if the Redevelopment Authority formally approves the conditional use, after due notice to the parties of interest, finds that the following facts and conditions exist, and so indicates in the minutes of its proceedings or its decision:
 1. Protection of Public Health, Safety and Welfare. The use will be designed, located and operated in a manner so that the public health, safety and welfare are protected.
 2. Protection of Property. The use, value and enjoyment of other property in the neighborhood will not be substantially impaired or diminished by the establishment, maintenance or operation of the special use.
 3. Traffic and Pedestrian Safety. Adequate measures have been or will be taken to provide safe pedestrian and vehicular access.
 4. Consistency With Comprehensive Plan. The special use will be designed, located and operated in a manner consistent with all applicable elements of the city's comprehensive plan.

Conditions Of Approval. Conditions of approval may be imposed by the Authority to prevent or minimize adverse impacts upon the public and the city's neighborhoods and to ensure compatibility of land uses and consistency with the purposes and intent of this chapter. Conditions of approval may include, but shall not be limited to: limitations on size, bulk and location; standards for landscaping, buffering and lighting; limitations on emissions of odors, dust, smoke, refuse matter, vibration, noise and other factors affecting the comfort, enjoyment, health or safety of residents, workers or visitors in the surrounding area; adequate ingress and egress; and other on-site improvements.

- d. "S" indicates a special use wherein the use is permitted only if the Board of Zoning Appeals approves a special use permit pursuant to s. 295-305-2 of the Milwaukee Code.
- e. "-" indicates no change from IH.

4. General Development Standards

Any proposed action is subject to all applicable City of Milwaukee codes and requirements and the primary goal and objectives listed in sub-section B.1. of this Plan.

This Plan seeks a pattern of private development, public rights-of-way, and open space that represents the optimal redevelopment of the entire Project Area. Subdivision of parcels may be allowed if appropriate to this end, although the Plan emphasizes the unique opportunity to locate businesses and industries here that need larger parcels than typically found in the city. Additional public rights-of way may be introduced into the Project Area if they contribute to the optimal redevelopment of the site or enhance traffic circulation of the surrounding community.

A number of public rights-of-way at locations to be determined may be added to the Project Area as necessary by RACM Area without modification of this Plan.

Site and building design standards may be adopted as amendments to this Plan, provided that such standards benefit the surrounding community and land use, do not adversely affect the original primary goal and objectives of this Plan, as determined by RACM,

5. Duration of Land Use Provisions and Development Standards

The provisions and guidelines enumerated above shall be in full force and effect from the date this plan is certified to the Common Council of the City of Milwaukee as provided by section 66.1133 (5)(a) 1, Wisconsin Statutes. They will continue to be in full force and effect for a period of twenty years unless earlier terminated by a record of instrument of the Authority.

6. Land Acquisition

All parcels to be acquired now for private or public redevelopment in accordance with the objectives, land use provisions, and building requirements set forth in this Plan are identified on Map No. 5, titled "Acquisition Map," and on the "Schedule of Lands and Interests to be Acquired" attached thereto. No parcels are identified for acquisition now.

C. CONFORMANCE TO STATE AND LOCAL REQUIREMENTS

1. Conformance to the Comprehensive Plan of the City of Milwaukee

This plan was reviewed by the City Plan Commission of the City of Milwaukee and determined to be in conformance with the City's Comprehensive Plan.

2. Conformance to Local Objectives

This plan has been prepared to conform to the following local objectives:

a. Appropriate Land Use

Any rezoning of property will be made by in accordance with applicable state and local regulations and procedures.

b. Public Improvements

Any future public improvements will be consistent with all City of Milwaukee Codes and Ordinances.

3. Present and Potential Equalized Value for Property Tax Purposes

See Exhibit A for worksheet.

4. Standards of Population Density

Not applicable.

5. Land Coverage and Building Density

These objectives shall be achieved according to the zoning provisions and Section 4, General Development Standards, in this Plan.

6. Statement of a Feasible Method Proposed for Relocation of Displaced Families

Not applicable.

D. PROCEDURE FOR CHANGES IN THE APPROVED PLAN

At any time after this project area plan has been approved by the Authority and the Common Council of the City of Milwaukee, it may be amended in accordance with the provisions and procedures established in the applicable subsections of section 66.1333(6)(d), Wisconsin Statutes.

Exhibit B

Explanation of Land Use Categories

INDUSTRIAL-HEAVY (IH). This district accommodates high-intensity industry and often includes very large structures, extensive exterior storage, exterior mechanical operations, or heavy truck or equipment operations. It also accommodates uses that require large or isolated sites or harbor, airport or rail service. This district includes the historic industrial core of the city. It has a strong relationship to shipping and rail services and includes the port of Milwaukee, the Menomonee valley and various railroad corridors. Most sites within the IH district have already been developed or redeveloped. These sites seldom have excess land to provide buffer areas. Where possible, the IH district should be separated from residential neighborhoods with less intensive, non-residential districts.

INDUSTRIAL-OFFICE (IO). This district provides sites for modern, clean industry and supporting, non-residential land uses that complement industrial uses or require an industrial environment. Older portions of this zoning district (IO2) often form corridors which provide a buffer between residential areas and more intensive industrial districts. The newer portions of this district (IO1) are in the form of office-industrial parks or business parks with campus-style layouts and designs. The IO district has a performance-oriented transition area where it adjoins residential neighborhoods. Buffering and other requirements in the transition area are intended to protect the character of such neighborhoods.

LOCAL BUSINESS DISTRICTS (LB1-LB2). These districts provide a wide range of goods and services to a large consumer population coming from an extensive area. Within these districts, motor-vehicle-related activities are of major significance. Good access by motor vehicle or public transit is important to local business districts, which are often located adjacent to intersections of major thoroughfares and in close proximity to bus transfer locations. The LB1 district is characterized by a more suburban development pattern, with larger lots and deeper setbacks, while the development pattern in the LB2 district tends to be more urban, with smaller lots and smaller setbacks.

RT3 District. The purpose of the RT3 district is to promote, preserve and protect neighborhoods intended primarily for two-family dwellings with a traditional urban character. This district, much like the RT4 district, allows smaller lots, smaller setbacks and a higher lot coverage than the RT1 and RT2 districts. Unlike the RT4 district, this district does not allow traditional corner commercial establishments. Nor does it allow the establishment of new, small multi-family buildings. The neighborhoods in this district were platted and developed, in large part, in the early 1900s and tend to be more uniform than those of the RT4 district.
