Project Description	The project provides energy efficiency retrofits to homes receiving lead remediation and lead hazard reduction services. A free home energy audit identifies improvements that can reduce energy costs. The homeowner is involved in determination projects that provide energy and cost savings and projects are funded using contractors. Eligible home improvements include insulation, air sealing, electrical wiring upgrades, cold-climate air source heat pumps, water heaters and replacement of gas appliances with electric. The target population is low-income families in underserved areas, in qualified census tracts. Impact is measured by the estimated energy use savings for weatherized homes.

Project Description	This project will support development of the new Martin Luther King (MLK) branch library, a public/private development. The goal is to modernize a branch library in a manner that support new mixed-use development and housing in a Qualified Census Tract that serves a predominantly African-American neighborhood. The project will create construction jobs while ensuring vital services to an economically disadvantaged community. The redeveloped branch will also support the public health response to COVID by offering improved space for testing and vaccination. Impact is measured by the number of jobs created, number of low income/minorities obtaining jobs, the number of affordable housing units created, and the number of COVID related events hosted.

	The Community Supported Traffic Safety Improvements

Project Description

project will install traffic safety improvements along various streets in the City of Milwaukee to address reckless driving. The project aims to eliminate fatal and severe crashes along the most dangerous streets in Milwaukee, of which a majority of these streets are located in communities of color and/or low-income neighborhoods with compounding disparities particularly related to public health outcomes. Success will be determined by measuring the reduction in crashes along these corridors, specifically fatal and serious injury crashes, and crashes impacting vulnerable roadway users such as people walking, biking, and using transit. Successful projects will also increase the number of students walking and biking to school in targeted neighborhoods. The City of Milwaukee will measure success through crash and user count data evaluation in its annual Complete Streets Health and Equity Report.
