**Overview**

The Hampton Avenue construction project, from North Teutonia Avenue to North Green Bay Avenue began on May 21st. The project completion date is November 2014. The project includes:

- Replacing the existing pavement with a new concrete pavement
- New curbs and gutters, driveway approaches and sidewalks at most locations
- Replacing storm sewer inlets
- “Green” sustainable infrastructure improvements

The project will be accomplished in two phases:

**Phase 1**

*(May 21 through approximately July 21)*

Reconstruction work on the north side of West Hampton Avenue (westbound lanes). Two-way traffic will continue to operate on the south side of the street, one lane in each direction. Pavement gaps are being provided at intervals to maintain access to properties located along the street.

**Phase 2**

*(Approximately July 21 through November 1)*

Reconstruction moves to the south side of West Hampton Avenue (eastbound lanes). Two-way traffic – one in each direction – moves to the recently completed westbound lanes.

Businesses and organizations along the construction corridor will be open as usual. The Department of Public Works’ Support for Business program is providing signage throughout the area to help direct motorists and pedestrians to their destinations.

To accommodate construction and keep traffic flowing in both directions, parking is not allowed on West Hampton Avenue during the project. Parking will remain available on most side streets. The owners of **Carter’s Creations**, **Marv’s Barber Salon** and **Colbert Beer and Liquor**, all located in the 1700 block of Hampton Avenue, requested permission from **Zion Hill Missionary Baptist Church** to utilize their parking lot for their customers. The church agreed to let customers park on the lot

when the lot is not being used for church activities.

The Milwaukee County Transit System will maintain its current bus service on West Hampton Avenue with the bus stops moving to the medians when construction prevents stopping at the curb.
