Rehabilitation of West Becher Street Bridge over the Kinnickinnic River South 1st Street to South 4th Street

The City of Milwaukee will rehabilitate the West Becher Street Bridge over the Kinnickinnic River between South 1st Street and South 4th Street. The project will consist of replacing the existing bridge deck with a new concrete deck; replacing the existing steel railing with a new aluminum railing; replacing the bearing assemblies for the steel girders; and sandblasting and painting the steel members.

It is anticipated that construction will **begin May 2015** and **end November 2015**. **One lane of traffic will remain open in each direction during the construction.**

The West Becher Street Bridge will continue to be the major detour route for Milwaukee County Transit System "Flyers" #40, #43 and #46 from the south side to downtown until the Hoan Bridge project is complete.
