How to Switch to Clean & Affordable Energy in the Home

Why Switch? Benefits to Your Home, Health & the Environment

Produce and Use Electricity More Efficiently to:

- Reduce the amount of fuel needed to make electricity
- Reduce the amount of greenhouse gases and other air pollution that contribute to climate change
- Reduce your electric bill, improve indoor air quality, and make your home more comfortable

ENERGY EFFICIENCY

Me² Milwaukee Energy Efficiency Program

- Easy, affordable energy-saving upgrades like insulation, air sealing, furnaces, boilers, hot water heaters, air conditioners, and windows
- Combines an accessible, low interest loan from Summit Credit Union with incentives from Focus on Energy
- On average, participants have reduced their annual energy use by 30%

Phone: 414-604-6450

WEATHERIZATION ASSISTANCE

Social Development Commission (SDC) Weatherization Assistance Program

- No-cost, basic weatherization services that can reduce home heating bills and save energy

Weatherization services may include:

- Insulation of walls and attics
- Air sealing
- Installation of energy efficient compact fluorescent bulbs
- Testing, repair or replacement of furnaces and water heaters
- Replacement of inefficient refrigerators with Energy Star units
- Home Energy Plus (HE+) Furnace Program
