

# CarePlus Dental Plans

## The CarePlus Difference

### Members' oral health is our top priority.

Because CarePlus is an affiliate of Dental Associates, a top dental provider with locations throughout Wisconsin, our members are our patients - so we always consider your oral health our primary focus. Enrolling with CarePlus provides many benefits to you in addition to exceptional dental care, including:

- **Integrated provider network.** Our partnership with Dental Associates allows for direct, immediate communication and hassle free claims.
- **No barriers to care.** We don't mandate deductibles, waiting periods, or missing tooth exclusions.
- **Better benefits for major dental services.** Our comprehensive benefits offer members significant savings on major and restorative services.
- **Lower plan rates.** Our rates are lower than a typical group plan, which means your contribution may be less.
- **Cutting-edge technology.** Our network dentists operate in a modern environment using the latest technology including digital impressions and 3D X-Rays.
- **Low-cost supplemental coverage.** We offer additional insurance coverage that can save you as much as 20% on non-covered charges.
- **Local, exceptional customer service.** We are a family and dentist owned, Wisconsin based company - and we treat our members accordingly.

# The advantages of an integrated group dental plan

## Everyone is searching for the key to wellness.

Overall health starts with maintaining a healthy mouth. A quality, appropriately-designed and utilized dental plan can help improve your wellness **without breaking the bank.**

## Not all dental plans are equal!

CarePlus offers a **comprehensive dental plan** with **exceptional customer service.**

With a typical dental insurance company, the only relationship between the company and the dentist is a fee schedule. However, CarePlus' managed care plans are integrated with Dental Associates, our principal provider partner\*. This unique partnership allows for frequent and real-time communication between the two entities. With traditional dental insurance, a dentist must file a claim with the insurance company and then you wait and wonder what will be covered. With a CarePlus Group Managed Care Plan, **there is no filing of claims at Dental Associates because our systems are integrated, so you know what is covered before you leave the chair.** At CarePlus, we handle all of this, offering you **peace of mind and ease of administration.**

## CarePlus also values transparency with our members.

In fact, you can **read real ratings and comments from Dental Associates' patients on their website!** We want you to feel comfortable when choosing your dental provider and rest assured they'll provide you the quality care you deserve.

## Access to a comprehensive dental network.

As a member of a CarePlus Group Managed Care Plan, your provider network is integrated. Many of Dental Associates' offices provide all specialties, including **general dentistry, pediatric dentistry, braces and clear aligners, oral surgery, dental implants, endodontics, dentures, and more!** All these dental specialists work together on a consultative basis to ensure your care is integrated, effective, and comprehensive. **Scan the QR to learn more >>**

\*Integrated oral health services are provided when you visit Dental Associates – the principal provider partner in the CarePlus network. Dental services may also be available through additional network providers with lesser degrees of integration.
