Overview

County

- There were zero of influenza-associated hospitalization reported in Milwaukee County during the week ending in March 11, 2023. From October 1, 2022 through March 11, 2023, there have been 655 reported influenza-associated hospitalizations in Milwaukee County (474 City of Milwaukee residents).

State

- Influenza-like illness (ILI) levels continued to remain below baseline both statewide and in the southeastern region of the state.
- Outpatient ILI activity and the percent positive influenza lab tests continue to decline in Wisconsin.
- Rhinovirus/enterovirus and Human metapneumovirus are the predominant viruses for this week.

National

- 4 states/jurisdictions experienced moderate ILI activity and 2 experienced high ILI activity. Wisconsin had minimal ILI activity in outpatient visits.
- 7 influenza-associated pediatric deaths were reported during this week.
- The predominant influenza type is influenza A(H1N1).

Influenza Vaccine Composition 2022-2023 Influenza Season

All standard-dose flu shots will be quadrivalent (no trivalent standard-dose flu shots will be available this season). The quadrivalent vaccines for use in the 2022-2023 influenza season contain the following:

- an A/Victoria/2570/2019 (H1N1)pdm09-like virus;
- an A/Darwin/9/2021 (H3N2)-like virus;
- a B/Austria/1359417/2021-like virus (B/Victoria lineage); and
- a B/Phuket/3073/2013-like virus (B/Yamagata lineage)

CDC Pediatric Data (Since Week 40)

2022-23 To Date: Total Deaths	2021-22 To Date: Total Deaths	Pediatric Deaths Reported this Week	Notes on Deaths	Unusual Pediatric Hospitalizations
132	45	7	The deaths occurred between week 47 of 2022 (the week ending November 26, 2022) and week 9 of 2023 (the week ending March 4, 2023). All seven deaths were associated with influenza A viruses. Four of the influenza A viruses had subtyping performed; one was an A(H1N1) virus and three were A(H3) viruses.	-

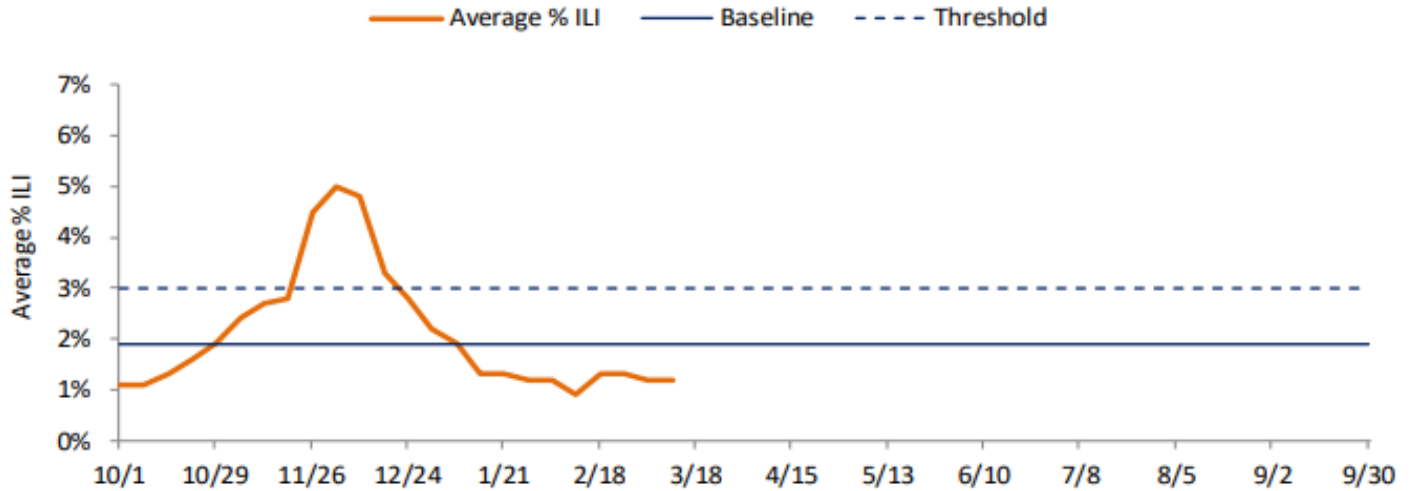

Statewide and Regional Influenza Activity

Influenza-like illness levels were below baseline statewide and in the southeastern region of the state.

Milwaukee County Influenza Activity

From October 1, 2022 through March 11, 2023 there have been 655 reported influenza-associated hospitalizations in Milwaukee County. Statewide hospitalization data are not yet available.

Milwaukee County Influenza-Associated Hospitalizations

Influenza Activity by Week in Milwaukee County

*Flu activity was unusually low in the 2020-2021 flu season, despite high levels of testing. COVID-19 mitigation measures such as wearing face masks, social distancing, staying home, and school closures, in addition to flu vaccination, likely contributed to the low flu activity during this season.

Milwaukee County Influenza-Associated Hospitalizations by Age Group MMWR Week 40, 2022 through Week 10, 2023

Cumulative Influenza Activity by Age Group, Milwaukee County, 2022-23 Flu Season

Influenza Testing Data

Public Health Laboratory Influenza Testing Data To-Date (Since Week 40)

Lab	Number Tested to date	Number Positive to date	Most Recent Week Percent Positive	Predominant A Subtype and Strain	Predominant B Strain	Predominant Type (A or B)
CDC	201,965	28,045	79/6,258(1.3%)	(H1N1)pdm09	Victoria	A
WSLH			113/10,395 (1.1%)	Unknown	Unknown	A
MHDL	55	10	0/3 (0.0%)	H3N2	N/A	A

COVID-19 Activity

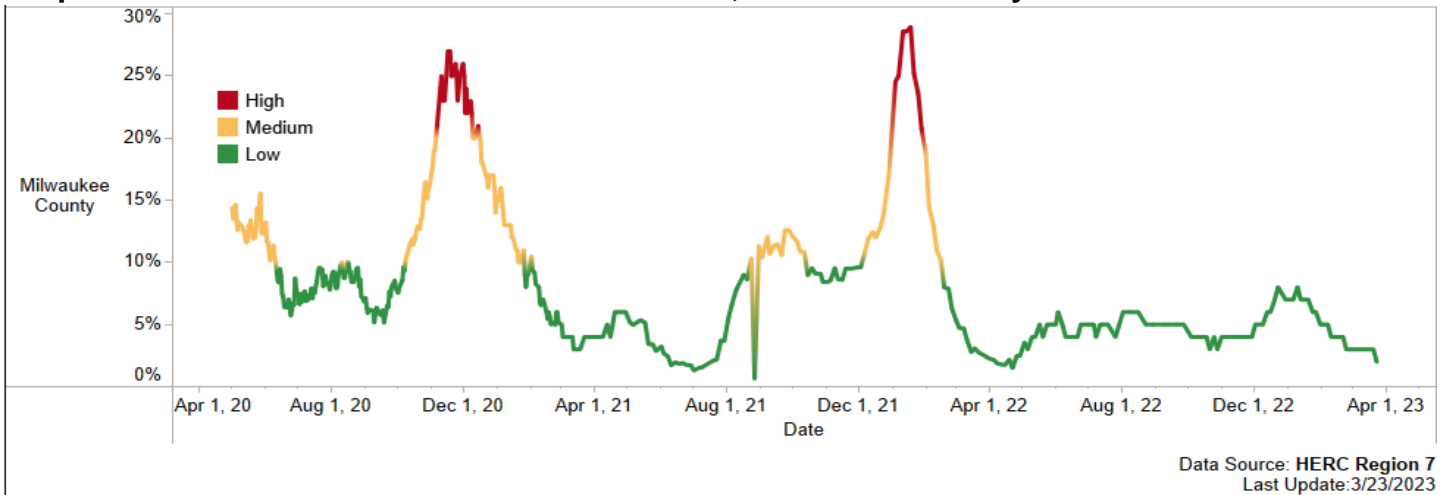

City of Milwaukee Overview

- From March 1, 2020 through March 23, 2023, there have been 180,998 reported confirmed positive COVID-19 cases and 1,120 COVID-19 associated deaths in the City of Milwaukee.
- Considering vaccination status, as of March 16, 2023:
 - 54.9% of city residents have completed their primary COVID-19 vaccination series
 - 30.2% of city residents have received at least one COVID-19 booster

COVID-19 Community Metrics, Updated March 24, 2023

COVID-19 Community Level - Low		
<u>County</u> Weekly Metrics Used to Determine the COVID-19 Community Level	Comparison to Last Week	
Case Rate per 100,000 population (Milwaukee County; includes City rate of <u>53.0</u>)	67.25	Down from 69.47
New COVID-19 admissions per 100,000 population	7	Down from 8.3
% Staffed inpatient beds in use by patients with confirmed COVID-19	3.1%	Up from 2.9%

Hospitalized Patients that are COVID-19 Positive, Milwaukee County

Percent Positive COVID-19 Tests, City of Milwaukee

Please Note: Positivity is presented as positivity by PCR testing only. Changes to testing policies over time and rising usage of at-home tests as opposed to laboratory-based tests may affect positivity rates and incidence rates and should be interpreted accordingly.

SARS-CoV-2 Wastewater Surveillance

Category: Compared with the last 6 months of data, the average of the three most recent SARS-CoV-2 measurements is **low** for both the Jones Island and South Shore sewersheds.

Trajectory: Between 3/1/2023 and 3/15/2023, wastewater concentrations of SARS-CoV-2 **did not significantly** increase in the Jones Island or South Shore sewersheds.

Milwaukee (Jones Island) ■ Estimated population served: 470,007	Category:	Trajectory:
	Low	No alert

90-Day Wastewater Trend for Milwaukee Jones Island (Dec 23, 2022–Mar 23, 2023)

◆ - Significant Increase

Milwaukee (South Shore) ■ Estimated population served: 615,934	Category:	Trajectory:
	Low	No alert

90-Day Wastewater Trend for Milwaukee South Shore (Dec 23, 2022–Mar 23, 2023)

◆ - Significant Increase
