

WEST LAYTON AVENUE RESURFACING PROJECT

Start: End of June 2019
Completion: November 2019

PROJECT OVERVIEW

The West Layton Avenue resurfacing project from South 27th Street to South Howell Avenue will consist of milling the existing asphalt pavement and replacing the 4-lane divided roadway with a new asphalt surface; curb and gutter, driveway approaches and sidewalks will be replaced where necessary, pedestrian curb ramps will be reconstructed and utility improvements will be made to sewer structures, traffic signals and signs, and street lighting. There will be modifications to the median, where necessary, to enhance safety and improve the overall operation of the roadway. Once completed, the roadway will accommodate for two driving lanes and a 5-foot bicycle lane in each direction.

WHAT TO EXPECT DURING CONSTRUCTION

The project will be split into two stages to minimize how construction will impact residents, businesses, and the traveling public.

Stage 1: The work zone will shut down the outside (curbside) lanes on both sides of the median. A lane of traffic moving in each direction will be maintained on the inside lanes.

Stage 2: The work zone will shut down the inside lanes on both sides of the median. A lane of traffic moving in each direction will be maintained on the outside lanes.

*When the contractor is removing the pavement, access to driveways and side streets may be temporarily restricted until the new surface is established. Access will also be temporarily restricted when the contractor is paving through the area.

Driveway Access: City staff and the contractor will work to minimize the amount of time any driveway access is restricted and will notify property owners in advance of any driveway work. Short-term disruptions will occur when driveway approaches are being removed and rebuilt.

Pedestrian Access: Short-term disruptions will occur when sidewalk is being removed and rebuilt. Temporary pedestrian accommodations can be provided and the contractor will work with property owners to minimize impact.

Bus Routes: #55, 80, 19, and Purpleline will maintain their regular routes within the work zone. Stop alterations will be signed to redirect passengers as needed.

Parking: On-street parking is not allowed.

Construction Hours: Work is allowed from 7:00 a.m. to 9:00 p.m.

All work is weather dependent and subject to change.
