

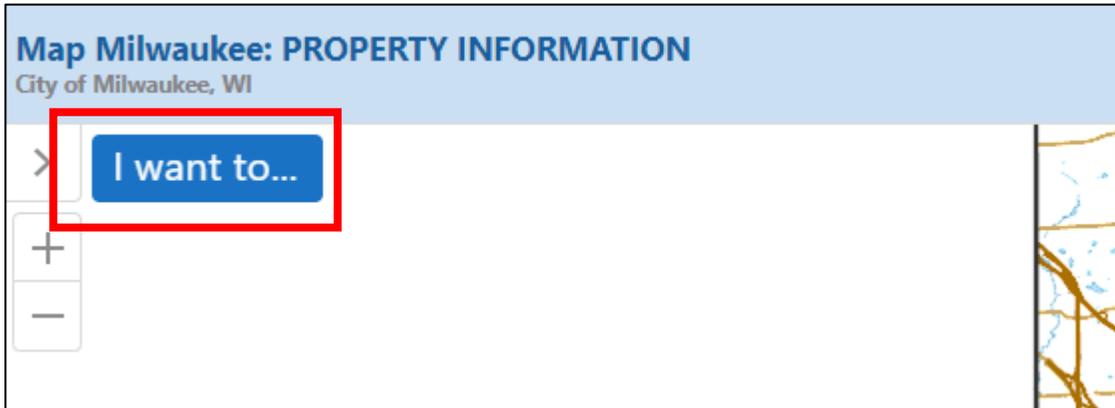

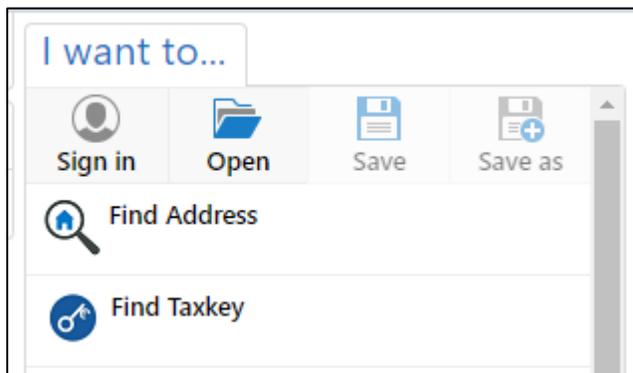

Map Milwaukee – How to Find a Property

Below is the most effective way to search for a property in Map Milwaukee.

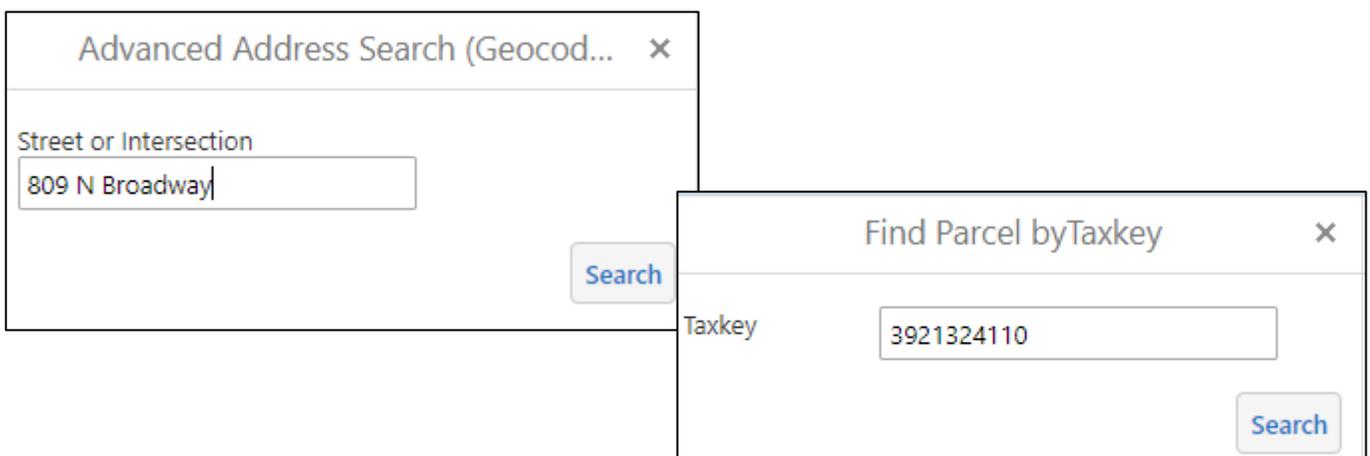

Click on the **I Want To...** button in the upper right corner of the screen.

Click on either **Search Address** or **Search Taxkey** from the dropdown depending on what information you have about a parcel. Intersections of streets will also be valid to search in the address search option.

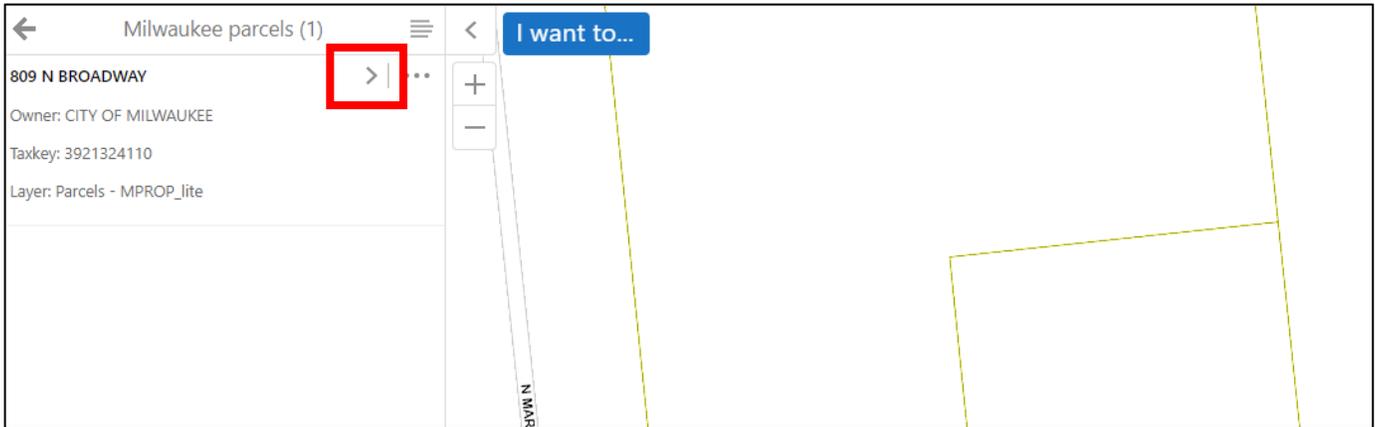

Click on either **Search Address** or **Search Taxkey** from the dropdown depending on what information you have about a parcel and click **Search**. Intersections of streets will also be valid to search in the address search option.

Map Milwaukee – How to Find a Property

If there are multiple options for the address, the list of properties will appear in the left pane and the map will zoom to focus on an area involving all of those properties. If there is only one property found that matches the input information, the map will zoom to the parcel and provide a short description in the left pane. Click on the > to learn more about a property.

The parcel details will then be shown in the left pane.
