# DPW PEER SUPPORT

Many times the first person we go to when we have a problem is not a professional counselor, doctor or even a family member. Often we reach out to someone like us, someone that would best understand what we are going through.

- A **Peer Support Team** aims to provide a safe, non-judgmental, confidential avenue for employees to connect with trained peers who understand the unique stressors of the work environment.
- A **Peer Support Team Member** is a confidential resource for an employee experiencing a crisis, work or non-work related, a “listening ear” and healthy wellbeing advocate that connects employees to other available help when needed.

For Peer Support assistance, contact your department **Peer Support Team Member** or any member you choose.

*We are here for you!*
